Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Leather tanning and finishing (SIC 3111)	Boot and shoe cut stock and findings (SIC 3131)	House slippers (SIC 3142)	Men's footwear, except athletic (SIC 3143)	Women's footwear, except athletic (SIC 3144)	Footwear, except rubber, n.e.c. Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

Footnotes continued on next page.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A)—Continued

- Represents zero. (X) Not applicable. (NA) Not available. ^eQuantity for this item estimated based on the unit price relationship for all other items of this product class.

¹More detailed statistics for 1967 are shown in Volume II, Industry Statistics, Part 2, 1967 Census of Manufactures.

²For 1972, monthly production figures were collected and published in Current Industrial Reports Series M31A, Shoes and Slippers. The 1967 data are shown in CIR Summary, Shoes and Slippers, for 1967.

³For 1972, annual production figures were collected and published in Current Industrial Reports Series MA-31A, Footwear Production by Manufacturers' selling price. For 1971 and earlier periods, detailed information is available by type of construction, age, and sex in this same series.

⁴For 1967, separate information was not listed for dress and casual boots; such data were reported in dress and casual shoes.

⁵Quantities estimated using the average unit-value reported by other shoe-producing companies reporting both quantity and value of shipments.

⁶With the breakout of three separate industries for 1972, data are included in the report entitled, "Footwear, Except Rubber, N.E.C.," SIC code 3149.

⁷These data represent the total, n.s.k., as estimated for plants coded to SIC code 3141 in 1967 and are shown in three separate industries: 3143, Men's Footwear, Except Athletic; 3144, Women's Footwear, Except Athletic; and 3149, Footwear, Except Rubber, N.E.C., for 1972. The 1967 consolidated n.s.k. for industry 3141 has not been included in the new industry total.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

(NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Data for 1972 are shown on the new SIC basis. For 1971 and prior years, these data were included in industry 3141, Shoes, Except Rubber, on the old SIC basis.

³Data for 1972 are shown on the new SIC basis. For 1971 and prior years these data were included in old SIC product classes as follows:

New SIC basis	Old SIC basis	New SIC basis	Old SIC basis	New SIC basis	Old SIC basis

EXPLANATORY TEXT

LEATHER GLOVES; LUGGAGE; AND MISCELLANEOUS LEATHER GOODS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3151—Leather Gloves and Mittens

3161—Luggage

3171—Women's Handbags and Purses

3172—Personal Leather Goods, Except Women's Handbags and Purses*

3199—Leather Goods, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3151.—LEATHER GLOVES AND MITTENS

This industry comprises establishments primarily engaged in the manufacture of dress, semidress, and work gloves exclusively of leather or leather with lining of other material. Establishments primarily engaged in manufacturing sporting and athletic gloves are classified in industry 3949; and dress, semidress, and work gloves and mittens of cloth or cloth and leather combined, in industry 2381. For a detailed list of products of industry 3151, refer to table 6A, product codes 31510 10 to 31510 89.

*Note that the "short title" for this industry is used throughout the report.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Leather Gloves and Mittens Industry in 1972 totaled \$98.2 million. This included shipments of leather gloves and mittens (primary products) valued at \$67.8 million, shipments of other products (secondary products) valued at \$5.4 million, and miscellaneous receipts (mainly resales) of \$24.9 million.

Shipments of leather gloves and mittens (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of fabric dress and work gloves at \$4.8 million.

Shipments of leather dress and work gloves (primary products) from establishments classified in industry 3151 in 1972 represented 84 percent (coverage ratio) of these products valued at \$82.7 million shipped by all industries. In 1967, the coverage ratio was 84 percent. Other industries shipping leather gloves and mittens consisted mainly of industry 2381, Fabric Dress and Work Gloves, (\$10.6 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3151, these establishments accounted for 6 percent of value of shipments.

INDUSTRY 3161.—LUGGAGE

This industry comprises establishments primarily engaged in the manufacture of luggage of leather or other material. For a detailed list of products of industry 3161, refer to table 6A, product codes 31610 16 to 31610 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Luggage Industry in 1972 totaled \$364.5 million. This included shipments of luggage (primary products) valued at \$314.0 million, shipments of other products (secondary products) valued at \$25.5 million, and miscellaneous receipts (mainly resales) of \$25.0 million.

Shipments of luggage (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 96 percent. Secondary products shipped by this industry in 1972 consisted mainly of housefurnishings, n.e.c., (\$5 to \$10 million) and sporting and athletic goods, n.e.c., (over \$2 million).

Shipments of luggage (primary products) from establishments classified in industry 3161 in 1972 represent 97 percent (coverage ratio) of these products valued at \$321.9 million shipped by all industries. In 1967, the coverage ratio was 94 percent. Other industries shipping luggage consisted mainly of industry 3172, Personal Leather Goods, at \$3.7 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3161, these establishments accounted for 11 percent of value of shipments.

INDUSTRY 3171.—WOMEN'S HANDBAGS AND PURSES

This industry comprises establishments primarily engaged in manufacturing women's handbags and purses of leather or other materials, except precious metals, (industry 3911). For a detailed list of products of industry 3171, refer to table 6A, product codes 31710 11 to 31710 71.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Women's Handbags and Purses Industry in 1972 totaled \$365.0 million. This included shipments of women's handbags and purses (primary products) valued at \$334.2 million, shipments of other products (secondary products) valued at \$15.0 million, and miscellaneous receipts (mainly resales) of \$15.7 million.

Shipments of women's handbags and purses (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 98 percent. Secondary products shipped by this industry in 1972 consisted mainly of personal leather goods (\$6.1 million) and apparel belts (\$5 to \$10 million).

Shipments of women's handbags and purses (primary products) from establishments classified in industry 3171 in 1972 represented 97 percent (coverage ratio) of these products valued at \$344.4 million shipped by all industries. In 1967, the coverage ratio was 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3171, these establishments accounted for 12 percent of value of shipments.

INDUSTRY 3172.—PERSONAL LEATHER GOODS, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in the manufacture of small articles, such as billfolds, key cases, and coin purses of leather or other materials, except precious metal, (industry 3911). For a detailed list of products of industry 3172, refer to table 6A, product codes 31720 11 to 31720 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Personal Leather Goods, N.E.C., Industry in 1972 totaled \$242.2 million. This included shipments of personal leather goods (primary products) valued at \$211.0 million, shipments of other products (secondary products) valued at \$12.7 million, and miscellaneous receipts (mainly resales) of \$18.4 million.

Shipments of personal leather goods (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 94 percent. Secondary products shipped by this industry in 1972 consisted mainly of luggage (\$3.7 million) and women's handbags and purses (\$2.5 million).

Shipments of personal leather goods (primary products) from establishments classified in industry 3172 in 1972 represented 91 percent (coverage ratio) of these products valued at \$231.8 million shipped by all industries. In 1967, the coverage ratio was 92 percent. Other industries shipping personal leather goods consisted mainly of industry 3171, Women's Handbags and Purses, (\$6.1 million) and industry 3199, Leather Goods, N.E.C., (over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3172, these establishments accounted for 12 percent of value of shipments.

INDUSTRY 3199.—LEATHER GOODS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing leather goods, not elsewhere classified, such as saddlery, harness, and whips; embossed leather goods; leather desk sets; and industrial leather belting. For a detailed list of products of industry 3199, refer to table 6A, product codes 31990 11 to 31990 98.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual by the transfer of the industrial product, industrial leather belting, from SIC 3121 to SIC 3199. However, the SIC numbers and titles are unchanged. The effect of the revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC." During the 1972 processing, each establishment was classified according to both the old and new SIC. As can be seen from table 1C, 50 establishments with 800 total employees and \$13 million value added would have been classified in different industries under the old SIC.

Value of shipments and other receipts of the Leather Goods, N.E.C., Industry in 1972 totaled \$161.3 million. This included shipments of leather goods, n.e.c., (primary products)

valued at \$132.1 million, shipments of other products (secondary products) valued at \$10.1 million, and miscellaneous receipts (mainly resales) of \$19.2 million.

Shipments of leather goods, n.e.c., (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent. Secondary products shipped by this industry in 1972 consisted mainly of personal leather goods at over \$2 million.

Shipments of leather goods, n.e.c., (primary products) from establishments classified in industry 3199 in 1972 represented 90 percent (coverage ratio) of these products valued at \$146.1 million shipped by all industries. In 1967, the coverage ratio was 86 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3199, these establishments accounted for 26 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972—Continued

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio
	Total	With 20 employees or more	Number	Payroll	Number	Man-hours	Wages								
	(number)	(number)	(1,000)	(million dollars)	(1,000)	(millions)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(million dollars)	(percent)	(percent)
INDUSTRY 3199.--LEATHER GOODS, N.E.C.															
1972 Census, new SIC..	448	99	7.2	42.5	6.1	11.2	29.4	84.3	81.0	161.3	2.2	(NA)	30.2	92	90
1972 Census, old SIC..	398	88	6.4	35.1	5.3	9.6	25.3	71.3	69.2	134.6	1.8	(NA)	20.6	(NA)	(NA)
1967 Census, old SIC..	365	83	6.1	26.4	5.3	10.0	19.0	45.5	50.8	96.5	1.4	12.9	12.4	94	86

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3151	Industry 3161	Industry 3171	Industry 3172	Industry 3199
1972.....	95	266	431	238	433
1967.....	136	328	488	293	(NA)
1963.....	160	377	539	325	(NA)

(NA) Not available. (S) Withheld because the data did not meet publication standards. (Z) Less than half of the unit of measurement shown. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments

TABLE 2A. General Statistics by Geographic Area: 1972 and 1967—Continued

(Footnotes for table 2A)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

²New industry 3199 for 1972. Prior years data are only slightly noncomparable with the new SIC 3199 (less than 15 percent).

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balance of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization--the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization--the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Leather gloves and mittens (SIC 3151)	Luggage (SIC 3161)	Women's handbags and purses (SIC 3171)	Personal leather goods (SIC 3172)	Leather goods, n.e.c. (SIC 3199)	Other industries

31720 00	Small leather goods, n.s.k., for companies with 10 employees or more. (See note.).....		(X)	26.7	(X)	12.0
31720 02	Small leather goods, n.s.k., for companies with less than 10 employees. (See note.).....		(X)	7.8	(X)	7.0
1972 product code	Product		Total receipts including interplant transfers (million dollars)		1972	1967
3199- --	LEATHER GOODS, N.E.C., TOTAL.....				146.1	⁶ 109.0
31990 11	Leather novelties.....				9.2	16.8
31990 31	Saddlery and harness and accouterments.....				32.0	26.4
31990 91	Industrial leather belting and other industrial leather products made wholly or partly of leather, including textile leather, but excluding gaskets and washers ⁶				12.1	13.5
31990 98	Other leather goods (desk sets, holsters, dog collars, leashes, etc.).....				40.1	21.2
31990 00	Leather goods, n.s.k., represents companies with 10 employees or more. (See note.) ⁷				35.0	^r 17.4
31990 02	Leather goods, n.s.k., represents companies with less than 10 employees. (See note.) ⁸				17.7	^r 13.7

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. ^r Revised.

¹Includes only all leather gloves and mittens. Leather and fabric combinations are classified in industry 2381, Fabric Dress and Work Gloves.

²Quantity estimated based on the average unit value reported by other glove producing companies reporting both quantity and value of shipments.

³For SIC industry 3151, the Census Bureau collects annual statistics on selected products. These data appear in Current Industrial Reports, series MA-23D, Gloves and Mittens. The difference in Current Industrial Reports series and the census of manufactures is due to reporting differences for individual plants furnishing data in both surveys.

⁴20 to 50 percent of the quantity data are estimated.

⁵10 to 30 percent of the quantity data are estimated.

⁶Data for this product in 1967 were classified in industry 3121, Industrial Leather Belting and Packing, product codes 31210 13 and 31210 98.

⁷Data for 1967 revised to include \$3.3 million reported under product code 31210 00.

⁸Data for 1967 revised to include \$2.3 million reported under product code 31210 02.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

(NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²For 1958 and prior years, data represent value of production rather than value of shipments.

³New SIC basis.

(NA) Not available. ^eFrom 20 to 50 percent of this figure was estimated.¹This item represents the total cost of materials for establishments that did not report detailed materials data. For both years this includes estimates for companies that were not mailed report forms.²Included with "Other materials, parts, containers, and supplies."

MAJOR GROUP 32

Stone, Clay, and Glass Products

- 32A Glass products
- 32B Cement and structural clay products
- 32C Pottery and related products
- 32D Concrete, plaster, and cut stone products
- 32E Abrasive, asbestos, and miscellaneous non-metallic mineral products

This major group includes establishments engaged in manufacturing flat glass and other glass products, cement, structural clay products, pottery, concrete and gypsum products, cut stone, abrasive and asbestos products, etc., from materials taken principally from the earth in the form of stone, clay, and sand. When separate reports are available for mines and quarries operated by manufacturing establishments classified in this major group, the mining and quarrying activities are classified in Division B, Mining. When separate reports are not available, the mining and quarrying activities other than those of industry 3295 are classified herein with the manufacturing operations.

If separate reports are not available for crushing, grinding, and other preparation activities of industry 3295, these establishments are classified in Division B, Mining.

(X) Not applicable. (NA) Not available.

¹Figures for establishments primarily engaged in producing ready-mixed concrete are excluded for 1954, 1947, and 1939. In 1958, the value added in ready-mixed concrete establishments represented 12 percent of the total value added for the stone, clay, and glass products, and in 1937, less than 1 percent. As indicated in the introductory text, certain quarries, operated as parts of manufacturing establishments, are included in the stone, clay, and glass products industries but separate figures for such mining activity were also obtained in the last three censuses. The value added at quarries operated in conjunction with these manufacturing establishments (including value added in producing mineral products consumed in the same establishment) was \$321,240 thousand in 1963; \$360,992 thousand in 1958; and \$193,636 thousand in 1954. Further detail on such mining operations are included in the Census of Mineral Industries reports.

²The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

³For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.

⁴The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

⁵The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.

⁶See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.

⁷Similar data are shown for the years 1949 to 1967 in the annual survey of manufactures volumes. Data for these establishments are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, and prior to 1949.

⁸These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

TABLE 2. General Statistics by Geographic Area: 1972 and 1967

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

²The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

EXPLANATORY TEXT

Glass Products

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3211—Flat Glass

3221—Glass Containers

3229—Pressed and Blown Glass and Glassware, N.E.C.*

3231—Glass Products, Made of Purchased Glass*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3211.—FLAT GLASS

This industry comprises establishments primarily engaged in manufacturing flat glass. This industry also produces laminated glass, but establishments primarily engaged in manufacturing laminated glass from purchased flat glass are classified in industry 3231. For a detailed list of products of industry 3211, refer to table 6A.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Flat Glass Industry in 1972 totaled \$937 million. This included shipments of flat glass (primary products) and other products

(secondary products) valued at \$920 million and miscellaneous receipts (mainly resales) of \$18 million.

Shipments of flat glass (primary products) in 1972 represented more than 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also more than 85 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3211, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3221.—GLASS CONTAINERS

This industry comprises establishments primarily engaged in manufacturing glass containers for commercial packing and bottling and for home canning. For a detailed list of products of industry 3221, refer to table 6A, product codes 32210 11 to 32210 62.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Glass Containers Industry in 1972 totaled \$2,126 million. This included shipments of glass containers (primary products) valued at \$2,080 million, shipments of other products (secondary products) valued at \$23 million, and miscellaneous receipts (mainly resales) of \$24 million.

Shipments of glass containers (primary products) in 1972 represented 99 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 99 percent. Secondary products shipped by this industry in 1972 consisted mainly of pressed and blown glass, n.e.c., (\$17 million) and corrugated and solid fiber boxes (over \$2 million).

Shipments of glass containers (primary products) from establishments classified in industry 3221 in 1972 represented 99 percent (coverage ratio) of these products valued at \$2,085 million shipped by all industries. In 1967, the coverage ratio was also 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail

*Note that the "short title" for this industry is used throughout the report.

portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3221, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3229.—PRESSED AND BLOWN GLASS, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in manufacturing glass and glassware, not elsewhere classified, pressed, blown, or shaped from glass produced in the same establishment. This industry also includes establishments primarily engaged in manufacturing textile glass fibers, but establishments primarily engaged in manufacturing glass wool insulation products are classified in industry 3296.

Establishments primarily engaged in the production of pressed lenses for vehicular lighting, beacons, and lanterns are also included in this industry, but establishments primarily engaged in the production of optical lenses are classified in industry 3832. Establishments primarily engaged in manufacturing glass containers are classified in industry 3221, and complete electric light bulbs in industry 3641.

For a detailed list of products of industry 3229, refer to table 6A, product codes 32291 21 to 32294 29.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Pressed and Blown Glass, N.E.C., Industry in 1972 totaled \$1,267 million. This included shipments of pressed and blown glass, n.e.c., (primary products) valued at \$1,215 million, shipments of other products (secondary products) valued at \$44 million, and miscellaneous receipts (mainly resales) of \$8 million.

Shipments of pressed and blown glass, n.e.c., (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent. Secondary products shipped by this industry in 1972 consisted mainly of household cooking equipment and flat glass.

Shipments of pressed and blown glass, n.e.c., (primary products) from establishments classified in industry 3229 in 1972 represented 96 percent (coverage ratio) of these products valued at \$1,262 million shipped by all industries. In 1967, the

coverage ratio was 98 percent. Other industries shipping pressed and blown glass, n.e.c., consisted mainly of industry 3221, Glass Containers; industry 3296, Mineral Wool; and industry 3564, Blowers and Fans.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the the time data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3229, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3231.—PRODUCTS OF PURCHASED GLASS (Short Title)

This industry comprises establishments primarily engaged in manufacturing glass products from purchased glass. Establishments primarily engaged in manufacturing optical lenses and ophthalmic lenses are classified in SIC Major Group 38. For a detailed list of products of industry 3231, refer to table 6A, product codes 32315 11 to 32316 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Products of Purchased Glass Industry in 1972 totaled \$1,328 million. This included shipments of products of purchased glass (primary products) and other products (secondary products) valued at \$1,232 million and miscellaneous receipts (mainly resales) of \$96 million.

Shipments of products of purchased glass (primary products) in 1972 represented over 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also over 90 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3231, these establishments accounted for 7 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3211	Industry 3221	Industry 3229	Industry 3231
1972.....	10	27	211	817
1967.....	(NA)	39	139	845
1963.....	11	40	75	1,016

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²This is a minimum percentage. The exact figure cannot be shown without disclosing figures of individual companies.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those states where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

(See appendix, Explanation of terms)

(D) Withheld to avoid disclosing figures for individual companies.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E10--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

(D) Withheld to avoid disclosing figures for individual companies.

¹This is a minimum percentage. The exact percentage cannot be shown without disclosing figures for individual companies.

²This includes laminated glass (product classes 32113 and 32313) which is primary to industry 3211 when made by primary glass producers, and industry 3231 when made from purchased glass. Separate totals have been withheld to avoid disclosing figures for individual companies.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 5A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Flat glass (SIC 3211)	Glass containers (SIC 3221)	Pressed and blown glass, n.e.c. (SIC 3229)	Products of purchased glass (SIC 3231)	Other industries

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts				All industries	Flat glass (SIC 3211)	Glass containers (SIC 3221)	Pressed and blown glass, n.e.c. (SIC 3229)	Products of purchased glass (SIC 3231)	Other industries

32316 21	Stained, leaded, and faceted glass and colored glass slabs	Million sq.ft.	(S)	4.8	(S)	6.2
32316 33	Table, kitchen, art, and novelty glassware (handmade and machine made)	do.	(X)	39.7	(S)	28.7
32316 37	Lighting and electronic glassware, such as tubing and cane for electric light bulbs and fluorescent and neon lighting; bowls and enclosing globes; and other interior and exterior lighting glassware		(X)	21.7		
32316 38	All other glassware (excluding flat glass products), including scientific, laboratory, industrial or technical glassware; glass blocks and Christmas tree ornaments, etc.		(X)	135.0	(X)	119.3
32316 71	Multiple-glazed, sealed insulating glass units		(X)	78.5	(X)	37.6
32316 81	Tempered glass for automotive use	Million sq.ft.	240.9	153.6	86.3	59.1
32316 83	Tempered glass for architectural and construction purposes, including glass for shower doors and entrance doors	do.	(S)	(S)	(S)	18.8
32316 89	Tempered glass for other uses, such as for appliances	do.	(S)	(S)	52.1	24.6
32316 98	Other flat glass products (excluding laminated glass, tempered glass, and mirrors), including such items as bent (except when made into tableware) or enameled, sheet, plate, float and rolled glass; shower doors and tub enclosures (except tempered); watch crystals		(X)	84.7	(X)	42.1
32316 00	Other glass products made from purchased glass, n.s.k.		(X)	13.7	(X)	15.7
32310 00	Products made of purchased glass, n.s.k., for companies with 10 employees or more. (See note.)		(X)	64.0	(X)	37.8
32310 02	Products made of purchased glass, n.s.k., for companies with less than 10 employees. (See note.)		(X)	32.8	(X)	17.5

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹Includes laminated glass (product codes 32113 11 to 32113 71 and 32313 98 to 32313 98).

²Detail does not add to total due to independent rounding.

³Includes glass of which one or both surfaces are roughed, figured, ribbed, or otherwise impressed; excludes glass block and tile.

⁴Combined to avoid disclosing figures for individual companies.

⁵Includes laminated glass made in the Flat Glass Industry (3211) and laminated glass made in Products of Purchased Glass Industry (3231), combined to avoid disclosing figures for individual companies. For 1972, no production of shipments of "Laminated plate over 1/4 inch" (code 32113 31), "Laminated sheet (window) glass" (code 32113 51), or "Other laminated glass" (code 32113 71) were reported in the Flat Glass Industry (3211). The same was true for 1967, except that a small amount of "Laminated plate over 1/4 inch" (code 32113 31) was produced in the Flat Glass Industry (3211).

⁶Includes all glassware shipped by establishments classified in industry 3229; that is, both glassware manufactured from glass produced in the same establishment and glassware manufactured from purchased glass.

⁷The 1972 category for "All Other Pressed and Blown Glassware" was overstated in the Current Industrial Report, series MA-32E, due to the misclassification of some establishments. Revisions to the 1972 data will be shown in the 1973 report.

⁸Total excludes product class 32313, laminated glass, which was combined with laminated glass made in the Flat Glass Industry (3211) to avoid disclosing figures of individual companies. The combined total for laminated glass was \$528.0 million for 1972 and \$361.7 million for 1967.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

- Represents zero. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments wither have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Includes laminated glass (product classes 32113 and 32213) which is primary to industry 3211 when made by primary glass producers, and industry 3231 when made from purchased glass. Separate totals withheld to avoid disclosing figures of individual companies.

³Excludes laminated glass, product class 32313.

EXPLANATORY TEXT

CEMENT AND STRUCTURAL CLAY PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3241—Cement, Hydraulic**
- 3251—Brick and Structural Clay Tile**
- 3253—Ceramic Wall and Floor Tile**
- 3255—Clay Refractories**
- 3259—Structural Clay Products, N.E.C.**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3241.—CEMENT, HYDRAULIC

This industry comprises establishments primarily engaged in the manufacture of hydraulic cement, including portland, natural, masonry, and pozzolan cements. For a detailed list of products of industry 3241, refer to table 6A, product codes 32410 11 to 32410 51.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Cement, Hydraulic, Industry in 1972 totaled \$1,798 million. This included shipments of hydraulic cement (primary products) valued at \$1,756 million, shipments of other products (secondary products) valued at \$21 million, and miscellaneous receipts (mainly resales) of \$21 million.

Shipments of hydraulic cement (primary products) in 1972 represented 99 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 99 percent. Secondary products shipped by this industry in 1972 consisted mainly of crushed and broken limestone (\$4 million) and minerals, ground or treated (\$4 million).

Shipments of hydraulic cement (primary products) from establishments classified in industry 3241 in 1972 represented 99 percent (coverage ratio) of these products valued at \$1,770 million shipped by all industries. In 1967, the coverage ratio was also 99 percent. Other industries shipping hydraulic cement consisted mainly of industry 2441, Nailed Wood Boxes and Shook; industry 2812, Alkalies and Chlorine; and industry 3273, Ready-Mixed Concrete (each over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3241, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3251.—BRICK AND STRUCTURAL CLAY TILE

This industry comprises establishments primarily engaged in the manufacture of brick and structural clay tile. Establishments primarily engaged in manufacturing clay firebrick are classified in industry 3255, nonclay firebrick in industry 3297, sand lime brick in industry 3299, and glass brick in industry 3229. For a detailed list of products of industry 3251, refer to table 6A, product codes 32511 11 to 32512 51.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Brick and Structural Clay Tile Industry in 1972 totaled \$513 million. This included shipments of brick and structural clay tile (primary products) valued at \$468 million, shipments of other products (secondary products) valued at \$11 million, and miscellaneous receipts (mainly resales) of \$34 million.

Shipments of brick and structural clay tile (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and second-

ary). The industry specialization ratio in 1967 was also 98 percent. Secondary products shipped by this industry in 1972 consisted mainly of structural clay products, n.e.c., \$5 million.

Shipments of brick and structural clay tile (primary products) from establishments classified in industry 3251 in 1972 represented 99 percent (coverage ratio) of these products valued at \$471 million shipped by all industries. In 1967, the coverage ratio was also 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3251, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3253.—CERAMIC WALL AND FLOOR TILE

This industry comprises establishments primarily engaged in the manufacture of ceramic wall and floor tile and includes glazed wall tile, ceramic mosaic tile, and quarry tile. Establishments primarily engaged in manufacturing structural clay tile and facing tile are classified in industry 3251 and drain tile in industry 3259. For a detailed list of products of industry 3253, refer to table 6A, product codes 32530 13 to 32530 71.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Ceramic Wall and Floor Tile Industry in 1972 totaled \$176 million. This included shipments of ceramic wall and floor tile (primary products) valued at \$151 million, shipments of other products (secondary products) valued at \$4 million, and miscellaneous receipts (mainly resales) of \$21 million.

Shipments of ceramic wall and floor tile (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent.

Shipments of ceramic wall and floor tile (primary products) from establishments classified in industry 3253 in 1972 represented 96 percent (coverage ratio) of these products valued at \$158 million shipped by all industries. In 1967, the coverage ratio was 99 percent. Other industries shipping ceramic wall and floor tile consisted mainly of industry 3263, Fine Earthenware Food Utensils (over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail

portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3253, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3255.—CLAY REFRACTORIES

This industry comprises establishments primarily engaged in the manufacture of clay firebrick and other heat resisting clay products. Establishments primarily engaged in manufacturing nonclay refractories, as well as all graphite refractories, whether of carbon bond or ceramic bond, are classified in industry 3297. For a detailed list of products of industry 3255, refer to table 6A, product codes 32550 11 to 32550 94.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Clay Refractories Industry in 1972 totaled \$337 million. This included shipments of clay refractories (primary products) valued at \$279 million, shipments of other products (secondary products) valued at \$42 million, and miscellaneous receipts (mainly resales) of \$16 million.

Shipments of clay refractories (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of nonclay refractories (\$31 million) and mineral wool (over \$2 million).

Shipments of clay refractories (primary products) from establishments classified in industry 3255 in 1972 represented 92 percent (coverage ratio) of these products valued at \$302 million shipped by all industries. In 1967, the coverage ratio was also 92 percent. Other industries shipping clay refractories consisted mainly of industry 3297, Nonclay Refractories (\$10 million) and industry 3356, Nonferrous Rolling and Drawing, N.E.C. (over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3255, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3259.—STRUCTURAL CLAY PRODUCTS, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of clay sewer pipe and structural clay products, not elsewhere classified, such as architectural terra cotta, roofing tile, conduit, chimney pipe, wall coping, adobe brick, etc. For a detailed list of products of industry 3259, refer to table 6A, product codes 32591 11 to 32592 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Structural Clay Products, N.E.C., Industry in 1972 totaled \$181 million. This included shipments of structural clay products, n.e.c. (primary products) valued at \$163 million, shipments of other products (secondary products) valued at \$8 million, and miscellaneous receipts (mainly resales) of \$10 million.

Shipments of structural clay products, n.e.c. (primary products) in 1972 represented 95 percent (specialization ratio)

of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastics products (over \$2 million) and clay refractories (\$2 million).

Shipments of structural clay products, n.e.c. (primary products) from establishments classified in industry 3259 in 1972 represented 96 percent (coverage ratio) of these products valued at \$169 million shipped by all industries. In 1967, the coverage ratio was also 96 percent. Other industries shipping structural clay products, n.e.c., consisted mainly of industry 3251, Brick and Structural Clay Tile (\$5 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3259, these establishments accounted for 1 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3241	Industry 3251	Industry 3253	Industry 3255	Industry 3259
1972.....	75	314	14	86	88
1967.....	65	377	57	83	110
1963.....	55	401	72	80	126

(NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 95 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio Col. B Col. F

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Cement, hydraulic (SIC 3241)	Brick and structural clay tile (SIC 3251)	Ceramic wall and floor tile (SIC 3253)	Clay refrac- tories (SIC 3255)	Structural clay products, n.e.c. (SIC 3259)	Other industries

32592 98	Other structural clay products such as terra cotta (architec- tural), roofing tile, conduit, chimney pipe, tops and thimbles, wall coping, and adobe brick.....		(X)	(X) 10.4	(X)	(X) 11.8
32592 00	Other structural clay products, n.e.c.....		(X)	(X) .6	(X)	(X) .5
32590 00	Structural clay products, n.e.c., for companies with 10 employees (See note.).....		(X)	(X) 4.3	(X)	(X) 3.5
32590 02	Structural clay products, n.e.c. for companies with less than 10 employees. (See note.).....		(X)	(X) 1.5	(X)	(X) .9

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹1967 data collected in millions of barrels was converted to short tons using conversion factor, 1 barrel equals 376 pounds for portland cement and 1 barrel equals 280 pounds for prepared or mixed hydraulic and masonry cements other than special portlands.

²Does not include shipments of ground crude fire clay, high alumina clay, silica fire clay, and dead-burned magnesia or magnesite for direct use as finished refractory products, but not classified as refractories under the Standard Industrial Classification system.

³The 1972 data shown below include all revised figures published in the 1973 Annual Summary. (It should be noted that Census form MQ32C does not include refractory materials shipped to refractory producers for reprocessing in the manufacture of brick and other refractories. Figures for these shipments are included in the 1972 Census of Manufactures.) The value of these products in 1972 was approximately \$5 to \$10 million.

⁴Combined in order to avoid disclosing the individual company data.

⁵Excludes data for mullite and extra high alumina refractories. These products are included in the nonclay refractories section.

⁶"Calcined" as applied to diaspor and bauxite implies heat treatment short of fusion for volume stability prior to use in a refractory product. In the process, volatile materials are driven off and chemical changes take place.

⁷The subdivisions are in accordance with the ASTM Classification C1 55, the respective groups being 16, 20, 23, 28, and higher.

⁸Includes bonding mortars which contain up to 60% Al₂O₃ dry basis. Bonding mortars which contain more than 60% Al₂O₃ dry basis are included in the nonclay refractories section.

⁹Includes products referred to as plastic fire brick and the less plastic materials intended for ramming into place after the addition of water (when shipped in dry form). Excludes mixes made of mullite or extra high alumina. Mixes made of these products are included in the nonclay refractories section.

¹⁰Includes shipments for direct use as finished refractory products by establishments classified in "manufacturing" industries and excludes shipments to refractory producers for reprocessing in the manufacture of brick and other refractories.

¹¹Includes data for calcined clay, ground brick, siliceous, and other gunning mixes.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)	
	1972	1967		1972	1967

- Represents zero. (X) Not applicable.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

EXPLANATORY TEXT

POTTERY AND RELATED PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3261—Vitreous China Plumbing Fixtures and China and Earthenware Fittings and Bathroom Accessories***
- 3262—Vitreous China Table and Kitchen Articles***
- 3263—Fine Earthenware (Whiteware) Table and Kitchen Articles***
- 3264—Porcelain Electrical Supplies**
- 3269—Pottery Products, N.E.C.**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3261.—VITREOUS PLUMBING FIXTURES (Short Title)

This industry comprises establishments primarily engaged in manufacturing china plumbing fixtures and china and earthenware fittings and bathroom accessories. For a detailed list of products of industry 3261, refer to table 6A, product codes 32610 10 to 32610 51.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

*Note that the "short title" for this industry is used throughout the report.

Value of shipments and other receipts of the Vitreous Plumbing Fixtures Industry in 1972 totaled \$270 million. This included shipments of vitreous plumbing fixtures (primary products) valued at \$228 million, shipments of other products (secondary products) valued at \$26 million, and miscellaneous receipts (mainly resales) of \$16 million.

Shipments of vitreous plumbing fixtures (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent.

Shipments of vitreous plumbing fixtures (primary products) from establishments classified in industry 3261 in 1972 represented 92 percent (coverage ratio) of these products valued at \$248 million shipped by all industries. In 1967, the coverage ratio was 96 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3261, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3262.—VITREOUS CHINA FOOD UTENSILS (Short Title)

This industry comprises establishments primarily engaged in manufacturing vitreous china table and kitchen articles for use in households and in hotels, restaurants, and other commercial institutions for preparing, serving, or storing food or drink.

Establishments primarily engaged in manufacturing fine (semivitreous) types of earthenware (whiteware) table and kitchen articles are classified in industry 3263. For a detailed list of products of industry 3262, refer to table 6A, product codes 32620 14 to 32620 52.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Vitreous China Food Utensils Industry in 1972 totaled \$82 million. This included shipments of vitreous china food utensils (primary products) valued at \$72 million, shipments of other products (secondary products) valued at \$9 million, and miscellaneous receipts of \$1 million.

Shipments of vitreous china food utensils (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of pottery products, n.e.c., (over \$2 million).

Shipments of vitreous china food utensils (primary products) from establishments classified in industry 3262 in 1972 represented 88 percent (coverage ratio) of these products valued at \$82 million shipped by all industries. In 1967, the coverage ratio was 89 percent. Other industries shipping vitreous china food utensils consisted mainly of industry 3263, Fine Earthenware Food Utensils, (over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3262, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3263.—FINE EARTHENWARE FOOD UTENSILS (Short Title)

This industry comprises establishments primarily engaged in manufacturing fine (semivitreous) types of earthenware table and kitchen articles for preparing, serving, or storing food and drink.

Establishments primarily engaged in manufacturing vitreous china table and kitchen articles are classified in industry 3262. For a detailed list of products of industry 3263, refer to table 6A, product codes 32630 12 and 32630 52.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Fine Earthenware Food Utensils Industry in 1972 totaled \$74 million. This included shipments of fine earthenware food utensils (primary products) valued at \$56 million and shipments of other products (secondary products) and miscellaneous receipts of \$18 million.

Shipments of fine earthenware food utensils (primary products) in 1972 represented a minimum of 70 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 86 percent. Secondary products shipped by this industry in 1972 consisted mainly of vitreous china food utensils and ceramic wall and floor tile (each over \$2 million).

Shipments of fine earthenware food utensils (primary products) from establishments classified in industry 3263 in 1972 represented 97 percent (coverage ratio) of these products valued at \$58 million shipped by all industries. In 1967, the coverage ratio was 86 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3263, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3264.—PORCELAIN ELECTRICAL SUPPLIES

This industry comprises establishments primarily engaged in manufacturing porcelain electrical insulators, molded porcelain parts for electrical devices, spark plug and steatitic porcelain, and other electrical supplies from clay and other ceramic materials. For a detailed list of products of industry 3264, refer to table 6A, product codes 32640 12 to 32640 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Porcelain Electrical Supplies Industry in 1972 totaled \$275 million. This included shipments of porcelain electrical supplies (primary products) valued at \$247 million, shipments of other products (secondary products) valued at \$23 million, and miscellaneous receipts (mainly resales) of \$4 million.

Shipments of porcelain electrical supplies (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent.

Shipments of porcelain electrical supplies (primary products) from establishments classified in industry 3264 in 1972 represented 95 percent (coverage ratio) of these products valued at \$259 million shipped by all industries. In 1967, the coverage ratio was 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3264, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3269.—POTTERY PRODUCTS, N.E.C.

This industry comprises establishments primarily engaged in firing and decorating white china and earthenware for the trade and manufacturing art and ornamental pottery, industrial and laboratory pottery, stoneware and coarse earthenware table and kitchen articles, unglazed red earthenware florists' articles, and other pottery products, not elsewhere classified. For a detailed list of products of industry 3269, refer to table 6A, product codes 32690 11 to 32690 91.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Pottery Products, N.E.C., Industry in 1972 totaled \$134 million. This included shipments of pottery products, n.e.c., (primary products) valued at \$124 million, shipments of other products (secondary products) valued at \$4 million, and miscellaneous receipts (mainly resales) of \$6 million.

Shipments of pottery products, n.e.c., (primary products) in 1972 represented 97 percent (specialization ratio) of the

industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 97 percent.

Shipments of pottery products, n.e.c., (primary products) from establishments classified in industry 3269 in 1972 represented 84 percent (coverage ratio) of these products valued at \$147 million shipped by all industries. In 1967, the coverage ratio was 87 percent. Other industries shipping pottery products, n.e.c., consisted mainly of industry 3262, Vitreous China Food Utensils; industry 3264, Porcelain Electrical Supplies; and industry 2771, Greeting Card Publishing (each over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3269, these establishments accounted for 18 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3261	Industry 3262	Industry 3263	Industry 3264	Industry 3269
1972.....	43	32	17	74	417
1967.....	34	35	20	65	424
1963.....	34	26	20	74	449

(NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²This is a minimum percentage. The exact percentage is withheld to avoid disclosing figures for individual companies.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

D) Withheld to avoid disclosing figures for individual companies

Z: Less than half of the unit of measurement shown.

¹The proportion of product shipments both primary and secondary of the industry represented by primary products.

²This is a minimum percentage. The exact percentage is withheld to avoid disclosing figures for individual companies.

³The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to the industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number	Payroll	Number	Man-hours	Wages

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F

(D) Withheld to avoid disclosing figures for individual companies.

¹This is a minimum percentage. The exact percentage is withheld to avoid disclosing figures for individual companies.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Vitreous plumbing fixtures (SIC 3261)	Vitreous china food utensils (SIC 3262)	Fine earthenware food utensils (SIC 3263)	Porcelain electrical supplies (SIC 3264)	Pottery products, n.e.c. (SIC 3269)	Other industries
	Total shipments and miscellaneous receipts.....	(X)	270.0	81.9	74.3	274.6	134.0	(X)

1972 product code	Product	Total product shipments including interplant transfers (million dollars)	
		1972	1967
3269- --	POTTERY PRODUCTS, N.E.C., TOTAL.....	146.9	96.0
32690 --	Pottery Products, N.E.C., Including China Decorating for the Trade: Art, decorative and novelty potteryware, including vases, lamp bases, figures, plaques, book ends, garden pottery, and ash trays:		
32690 11	China and porcelain.....	34.5	25.2
32690 31	Earthenware and stoneware.....	39.0	21.6
32690 41	Stoneware table and kitchen articles, household and commercial (for serving, cooking, preparing, and storing food and drink).....	(D)	1.9
	Other pottery products, not elsewhere classified:		
32690 61	Chemical, technical, and industrial potteryware (including chemical stoneware and porcelain, pyrometric tubes, etc.).....	14.7	15.0
32690 71	Red unglazed earthenware (flowerpots, etc.).....	8.7	5.8
32690 81	All other pottery products, including pyrometric cones, veritas rings, etc.....	6.7	4.0
32690 91	China decorating for trade.....	(D)	1.5
32690 00	Pottery products, n.e.c., n.s.k., for companies with 10 employees or more. (See note.).....	22.3	14.1
32690 02	Pottery products, n.e.c., n.s.k., for companies with less than 10 employees. (See note.).....	13.2	6.8

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹Includes value of metal fittings when shipped as an integral part of the ceramic product.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

(Not applicable to this report)

**TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments:
1958, 1963, 1967 to 1972**

(In millions of dollars)

1972 code	Product class	1972	1971 ¹	1970 ¹	1969 ¹	1968 ¹	1967	1963	1958
32610	Vitreous plumbing fixtures.....	248.3	202.8	180.8	196.2	180.1	148.9	143.8	130.5
32620	Vitreous china food utensils.....	82.0	75.6	78.7	80.2	71.2	69.6	51.9	46.9
32630	Fine earthenware food utensils.....	58.1	52.4	51.7	58.3	59.2	46.7	58.2	53.5
32640	Porcelain electrical supplies ²	259.0	227.5	242.7	219.6	200.1	188.6	121.5	91.1
32690	Pottery products, n.e.c.....	146.9	128.9	112.9	107.7	100.0	96.0	81.4	75.0

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Includes value of metal fittings when shipped as an integral part of the ceramic product.

EXPLANATORY TEXT

CONCRETE, PLASTER, AND CUT STONE PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3271—Concrete Block and Brick
- 3272—Concrete Products, Except Block and Brick*
- 3273—Ready-Mixed Concrete
- 3274—Lime
- 3275—Gypsum Products
- 3281—Cut Stone and Stone Products

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3271.—CONCRETE BLOCK AND BRICK

This industry comprises establishments primarily engaged in the manufacture of concrete building block and brick from a combination of cement and aggregate. Contractors primarily engaged in concrete construction are classified in the construction industries, and building materials dealers primarily engaged in mixed and mixing ready-mixed concrete in industry 3273. For a detailed list of products of industry 3271, refer to table 6A, product codes 32710 13 to 32710 51.

*Note that the "short title" for this industry is used throughout the report.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Concrete Block and Brick Industry in 1972 totaled \$856 million. This included shipments of concrete block and brick (primary products) valued at \$677 million, shipments of other products (secondary products) valued at \$51 million, and miscellaneous receipts (mainly resales) of \$128 million.

Shipments of concrete block and brick (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of concrete products, n.e.c. (\$25 million), and ready-mixed concrete (\$15 million).

Shipments of concrete block and brick (primary products) from establishments classified in industry 3271 in 1972 represented 85 percent (coverage ratio) of these products valued at \$796 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping concrete block and brick consisted mainly of industry 3273, Ready-Mixed Concrete (\$90 million), and industry 3272, Concrete Products, N.E.C. (\$25 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3271, these establishments accounted for 14 percent of value of shipments.

INDUSTRY 3272.—CONCRETE PRODUCTS, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in the manufacture of concrete products, except block and brick, from a combination of cement and aggregate. Contractors primarily engaged in concrete construction work are classified in the construction industries, and establishments primarily engaged in mixing and delivering ready-mixed concrete in

industry 3273. For a detailed list of products of industry 3272, refer to table 6A, product codes 32721 12 to 32723 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Concrete Products, N.E.C., Industry in 1972 totaled \$1,961 million. This included shipments of concrete products, n.e.c., (primary products) valued at \$1,776 million, shipments of other products (secondary products) valued at \$76 million, and miscellaneous receipts (mainly resales) of \$110 million.

Shipments of concrete products, n.e.c., (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 96 percent. Secondary products shipped by this industry in 1972 consisted mainly of concrete block and brick (\$25 million) and ready-mixed concrete (\$24 million).

Shipments of concrete products, n.e.c., (primary products) from establishments classified in industry 3272 in 1972 represented 95 percent (coverage ratio) of these products valued at \$1,865 million shipped by all industries. In 1967, the coverage ratio was 94 percent. Other industries shipping concrete products, n.e.c., consisted mainly of industry 3273, Ready-Mixed Concrete, (\$48 million) and industry 3271, Concrete Block and Brick (\$25 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3272, these establishments accounted for 18 percent of value of shipments.

INDUSTRY 3273.—READY-MIXED CONCRETE

This industry comprises establishments primarily engaged in the manufacture of portland cement concrete manufactured and delivered to a purchaser in a plastic and unhardened state. This industry includes production and sale of central-mixed concrete, shrink-mixed concrete, and transit-mixed concrete.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Ready-Mixed Concrete Industry in 1972 totaled \$4,051 million. This included shipments of ready-mixed concrete (primary products) valued at \$3,494 million, shipments of other products

(secondary products) valued at \$282 million, and miscellaneous receipts (mainly resales) of \$275 million.

Shipments of ready-mixed concrete (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of concrete block and brick (\$90 million), construction sand and gravel (\$75 million), concrete products, n.e.c. (\$48 million), and paving mixtures and blocks (\$29 million).

Shipments of ready-mixed concrete (primary products) from establishments classified in industry 3273 in 1972 represented 98 percent (coverage ratio) of these products valued at \$3,579 million shipped by all industries. In 1967, the coverage ratio was also 98 percent. Other industries shipping ready-mixed concrete consisted mainly of industry 3272, Concrete Products, N.E.C., (\$24 million), industry 3271, Concrete Block and Brick (\$15 million), and industry 2951, Paving Mixtures and Blocks (\$15 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3273, these establishments accounted for 18 percent of value of shipments.

INDUSTRY 3274.—LIME

This industry comprises establishments primarily engaged in the manufacture of quicklime, hydrated lime, and "dead burned" dolomite from limestone, dolomite shells, or other substances. For a detailed list of products of industry 3274, refer to table 6A, product codes 32740 11 to 32740 71.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Lime Industry in 1972 totaled \$248 million. This included shipments of lime (primary products) valued at \$219 million, shipments of other products (secondary products) valued at \$26 million, and miscellaneous receipts (mainly resales) of \$2 million.

Shipments of lime (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 87 percent. Secondary products shipped by this industry in 1972 consisted mainly of crushed and broken limestone at \$19 million.

Shipments of lime (primary products) from establishments classified in industry 3274 in 1972 represented 92 percent (coverage ratio) of these products valued at \$238 million shipped by all industries. In 1967, the coverage ratio was 93 percent. Other industries shipping lime consisted mainly of industry 3297, Nonclay Refractories (over \$2 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3274, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3275.—GYPSUM PRODUCTS

This industry comprises establishments primarily engaged in the manufacture of plaster, plasterboard, and other products composed wholly or chiefly of gypsum. For a detailed list of products of industry 3275, refer to table 6A, product codes 32751 11 to 32752 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Gypsum Products Industry in 1972 totaled \$640 million. This included shipments of gypsum products (primary products) valued at \$580 million, shipments of other products (secondary products) valued at \$28 million, and miscellaneous receipts of \$33 million.

Shipments of gypsum products (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 96 percent. Secondary products shipped by this industry in 1972 consisted mainly of minerals, ground or treated, (\$10 million) and gypsum (\$8 million).

Shipments of gypsum products (primary products) from establishments classified in industry 3275 in 1972 represented 99 percent (coverage ratio) of these products valued at \$583 million shipped by all industries. In 1967, the coverage ratio was 98 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on

payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3275, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3281.—CUT STONE AND STONE PRODUCTS

This industry comprises establishments primarily engaged in cutting, shaping, and finishing marble, granite, slate, and other stone for building and miscellaneous uses. Establishments primarily engaged in buying or selling partly finished monuments and tombstones, but performing no work on the stones other than lettering, finishing, or shaping to custom order, are classified in trade industries. The cutting of grindstones, pulpstones, and whetstones at the quarry is classified as mining. For a detailed list of products of industry 3281, refer to table 6A, product codes 32811 13 to 32813 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Cut Stone and Stone Products Industry in 1972 totaled \$304 million. This included shipments of cut stone and stone products (primary products) valued at \$281 million, shipments of other products (secondary products) valued at \$12 million, and miscellaneous receipts (mainly resales) of \$11 million.

Shipments of cut stone and stone products (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent. Secondary products shipped by this industry in 1972 consisted mainly of dimension stone (\$4 million).

Shipments of cut stone and stone products (primary products) from establishments classified in industry 3281 in 1972 represented 98 percent (coverage ratio) of these products valued at \$287 million shipped by all industries. In 1967, the coverage ratio was 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3281, these establishments accounted for 24 percent of value of shipments.

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3271	Industry 3272	Industry 3273	Industry 3274	Industry 3275	Industry 3281
1972.....	1,300	3,199	3,978	69	44	874
1967.....	1,534	3,055	4,032	78	55	776
1963.....	1,786	3,130	3,999	81	60	857

(NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

- Represents zero. (D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above.
 (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Concrete block and brick (SIC 3271)	Concrete products, n.e.c. (SIC 3272)	Ready-mixed concrete (SIC 3273)	Lime (SIC 3274)	Gypsum products (SIC 3275)	Cut stone and stone products (SIC 3281)	Other industries

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Concrete block and brick (SIC 3271)	Concrete products, n.e.c. (SIC 3272)	Ready-mixed concrete (SIC 3273)	Lime (SIC 3274)	Gypsum products (SIC 3275)	Cut stone and stone products (SIC 3281)	Other industries

32813 00	Dressed dimension marble and other stone, n.s.k.....	..do.	(S)	6.4	(S)	4.3		
32810 00	Cut stone and stone products, n.s.k., for companies with 10 employees or more. (See note.).....	...	(X)	61.0	(X)	38.4		
32810 02	Cut stone and stone products, n.s.k., for companies with less than 10 employees. (See note.).....		(X)	30.4	(X)	16.0		

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review.

¹From 10 to 30 percent of this figure was estimated.

²From 30 to 50 percent of this figure was estimated.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

- Represents zero. (NA) Not available. ^eFrom 10 to 30 percent of this figure was estimated.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

EXPLANATORY TEXT

ABRASIVE, ASBESTOS, AND MISCELLANEOUS NONMETALLIC MINERAL PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3291—Abrasive Products
- 3292—Asbestos Products
- 3293—Gaskets, Packing and Sealing Devices
- 3295—Minerals and Earths, Ground or Otherwise Treated*
- 3296—Mineral Wool
- 3297—Nonclay Refractories
- 3299—Nonmetallic Mineral Products, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3291.—ABRASIVE PRODUCTS

This industry comprises establishments primarily engaged in the manufacture of abrasive grinding wheels of natural or synthetic materials, and other abrasive products. Establishments primarily engaged in the cutting of grindstones, pulpstones, and whetstones at the quarry are classified in mining industries. For a detailed list of products of industry 3291, refer to table 6A, product codes 32911 17 to 32914 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

*Note that the "short title" for this industry is used throughout the report.

Value of shipments and other receipts of the Abrasive Products Industry in 1972 totaled \$888 million. This included shipments of abrasive products (primary products) valued at \$782 million, shipments of other products (secondary products) valued at \$60 million, and miscellaneous receipts (mainly resales) of \$45 million.

Shipments of abrasive products (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of paper coating and glazing (\$10 to \$20 million).

Shipments of abrasive products (primary products) from establishments classified in industry 3291 in 1972 represented 88 percent (coverage ratio) of these products valued at \$892 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping abrasive products consisted mainly of industry 2641, Paper Coating and Glazing, (\$50 to \$100 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3291, these establishments accounted for 5 percent of value of shipments.

INDUSTRY 3292.—ASBESTOS PRODUCTS

This industry comprises establishments primarily engaged in the manufacture of asbestos textiles, asbestos building materials, except asbestos paper (industry 2661), insulating materials for covering boilers and pipes, and other commodities composed wholly or chiefly of asbestos. Establishments primarily engaged in manufacturing gaskets and steam and other packing are classified in industry 3293. For a detailed list of products of industry 3292, refer to table 6A, product codes 32922 11 to 32927 98.

Although the SIC number and title of industry 3292 are unchanged, the 1972 definition of this industry has been revised from that used in the 1967 SIC manual. Insulation materials containing asbestos, which were previously classified in industry 3293, are now included in this industry. The effect of these revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC."

Value of shipments and other receipts of the Asbestos Products Industry in 1972 totaled \$763 million. This included shipments of asbestos products (primary products) valued at \$654 million, shipments of other products (secondary products) valued at \$62 million, and miscellaneous receipts (mainly resales) of \$48 million.

Shipments of asbestos products (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of gaskets, packing and sealing devices, (\$25 million) and miscellaneous plastics products (\$10 to \$20 million).

Shipments of asbestos products (primary products) from establishments classified in industry 3292 in 1972 represented 88 percent (coverage ratio) of these products valued at \$743 million shipped by all industries. In 1967, the coverage ratio was 90 percent. Other industries shipping asbestos products consisted mainly of industry 2952, Asphalt Felts and Coatings, and industry 3996, Hard Surface Floor Coverings, (each \$20 to \$50 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3292, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3293.—GASKETS, PACKING AND SEALING DEVICES

This industry comprises establishments primarily engaged in the manufacture of gaskets, gasketing materials, compression packing, molded packings, oil seals, and mechanical seals. Included are gaskets, packing and sealing devices, made of leather, rubber, metal, asbestos, and plastics.

Establishments primarily engaged in manufacturing insulation materials containing asbestos are classified in industry 3292. For a detailed list of products of industry 3293, refer to table 6A, product codes 32932 13 to 32933 71.

Although the SIC number and title of industry 3293 are unchanged, the 1972 definition of this industry has been revised from that used in the 1967 SIC manual.

Molded packings and seals, except plastics (formerly classified in industry 3069), axial mechanical face seals (formerly in industry 3599), plastics packing and seals (formerly in industry 3079), and leather packings, oil and grease retainers, including seals (formerly in industry 3121), are now included in

this industry. Also, insulation materials containing asbestos, which were previously classified in industry 3293, are included in industry 3292 for 1972. The effect of these revisions on the data are summarized in table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC."

Value of shipments and other receipts of the Gaskets, Packing and Sealing Devices, Industry in 1972 totaled \$665 million. This included shipments of gaskets, packing and sealing devices, (primary products) valued at \$576 million, shipments of other products (secondary products) valued at \$68 million, and miscellaneous receipts (mainly resales) of \$21 million.

Shipments of gaskets, packing and sealing devices, (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of fabricated rubber products, n.e.c., (\$16 million) and asbestos products (\$10 to \$20 million).

Shipments of gaskets, packing and sealing devices, (primary products) from establishments classified in industry 3293 in 1972 represented 81 percent (coverage ratio) of these products valued at \$715 million shipped by all industries. Other industries shipping gaskets, packing and sealing devices, consisted mainly of industry 3069, Fabricated Rubber Products, N.E.C., (\$59 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3293, these establishments accounted for 5 percent of value of shipments.

INDUSTRY 3295.—MINERALS, GROUND OR TREATED (Short Title)

This industry comprises establishments primarily engaged in the crushing, grinding, pulverizing, and otherwise preparing certain earths, rocks, minerals, or slag for sale for industrial uses or for further manufacture.

Establishments primarily engaged in the beneficiation of ores and the cleaning and grading of coal performed at the mine or by primary preparation plants are classified in the mining industries. For a detailed list of products of industry 3295, refer to table 6A, product codes 32950 11 to 32950 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Minerals, Ground or Treated, Industry in 1972 totaled \$414 million. This included shipments of minerals, ground or treated, (primary products) valued at \$350 million, shipments of other products (secondary products) valued at \$19 million, and miscellaneous receipts (mainly resales) of \$46 million.

Shipments of minerals, ground or treated, (primary products) in 1972 represented 95 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 96 percent.

Shipments of minerals, ground or treated, (primary products) from establishments classified in industry 3295 in 1972 represented 89 percent (coverage ratio) of these products valued at \$392 million shipped by all industries. In 1967, the coverage ratio was also 89 percent. Other industries shipping minerals, ground or treated, consisted mainly of industry 3275, Gypsum Products, (\$10 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3295, these establishments accounted for 12 percent of value of shipments.

INDUSTRY 3296.—MINERAL WOOL

This industry comprises establishments primarily engaged in the manufacture of mineral wool and mineral wool insulation products made of such siliceous materials as rock, slag, and glass, or combinations thereof. Establishments primarily engaged in manufacturing asbestos insulation products and textile glass fibers are classified in industries 3292 and 3229, respectively. For a detailed list of products of industry 3296, refer to table 6A, product codes 32961 11 to 32962 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Mineral Wool Industry in 1972 totaled \$755 million. This included shipments of mineral wool (primary products) valued at \$687 million, shipments of other products (secondary products) valued at \$49 million, and miscellaneous receipts (mainly resales) of \$20 million.

Shipments of mineral wool (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of

pressed and blown glass and glassware, n.e.c.; blowers and exhaust and ventilation fans; and paddings and upholstery filling (\$10 to \$20 million each).

Shipments of mineral wool (primary products) from establishments classified in industry 3296 in 1972 represented 93 percent (coverage ratio) of these products valued at \$739 million shipped by all industries. In 1967, the coverage ratio was 95 percent. Other industries shipping mineral wool consisted mainly of industry 2661, Building Paper and Board Mills, (\$34 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3296, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3297.—NONCLAY REFRACTORIES

This industry comprises establishments primarily engaged in the manufacture of refractories and crucibles made of materials other than clay. Establishments primarily engaged in manufacturing clay refractories are classified in industry 3255. For a detailed list of products of industry 3297, refer to table 6A, product codes 32970 12 to 32970 94.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Nonclay Refractories Industry in 1972 totaled \$342 million. This included shipments of nonclay refractories (primary products) valued at \$313 million, shipments of other products (secondary products) valued at \$22 million, and miscellaneous receipts (mainly resales) of \$8 million.

Shipments of nonclay refractories (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of clay refractories (\$10 million) and lime (\$5 to \$10 million).

Shipments of nonclay refractories (primary products) from establishments classified in industry 3297 in 1972 represented 84 percent (coverage ratio) of these products valued at \$372 million shipped by all industries. In 1967, the coverage ratio was 88 percent. Other industries shipping nonclay refractories consisted mainly of industry 3255, Clay Refractories, (\$33 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3297, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3299.—NONMETALLIC MINERAL PRODUCTS, N.E.C.

This industry comprises establishments primarily engaged in the factory production of statuary and art goods made of plaster of paris and papier mache, and in manufacturing sand lime products and other nonmetallic mineral products, not elsewhere classified. For a detailed list of products of industry 3299, refer to table 6A, product codes 32990 53 to 32990 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Nonmetallic Mineral Products, N.E.C., Industry in 1972 totaled \$166

million. This included shipments of nonmetallic mineral products, n.e.c., (primary products) valued at \$152 million, shipments of other products (secondary products) valued at \$9 million, and miscellaneous receipts (mainly resales) of \$5 million.

Shipments of nonmetallic mineral products, n.e.c., (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 82 percent.

Shipments of nonmetallic mineral products, n.e.c., (primary products) from establishments classified in industry 3299 in 1972 represented 90 percent (coverage ratio) of these products valued at \$170 million shipped by all industries. In 1967, the coverage ratio was 89 percent. Other industries shipping nonmetallic mineral products, n.e.c., consisted mainly of industry 3291, Abrasive Products, and industry 2851, Paints and Allied Products, (each \$5 to \$10 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3299, these establishments accounted for 18 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3291	Industry 3292	Industry 3293	Industry 3295	Industry 3296	Industry 3297	Industry 3299
1972.....	130	87	346	349	66	60	480
1967.....	320	81	(NA)	382	77	59	325
1963.....	340	73	(NA)	313	89	51	313

(NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²The 1972 data on the new SIC basis are not strictly comparable to 1972 and previous-year data on the old SIC basis because as a result of the 1972 Standard Industrial Classification revisions, several establishments previously classified in industry 3293 are now included in industry 3292. (See table 1C.) Also, as a result of the SIC revisions, the product mix of several establishments has changed such that these establishments have moved into or out of industry 3292 on the new SIC basis.

³Comparable data for previous years are not available because a large number of establishments previously classified in industries 3069, 3079, 3121, and 3599 are now included in industry 3293, and several establishments previously classified in industry 3293 are now included in industry 3292. (See table 1C.)

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent

E3--30 to 39 percent

E5--50 to 59 percent

E7--70 to 79 percent

E9--90 to 99 percent

E2--20 to 29 percent

E4--40 to 49 percent

E6--60 to 69 percent

E8--80 to 89 percent

E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for the industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

(NA) Not available.

¹Data for 1972 and 1967 are not directly comparable because insulation materials containing asbestos, which were previously classified in industry 3293, are included in this industry for 1972.

²Data for 1972 and 1967 are not comparable because of significant shifting of products into and out of this industry.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Abrasive products (SIC 3291)	Asbestos products (SIC 3292)	Gaskets, packing and sealing devices (SIC 3293)	Minerals, ground or treated (SIC 3295)	Mineral wool (SIC 3296)	Nonclay refractories (SIC 3297)	Nonmetallic mineral products, n.e.c. (SIC 3299)	Other industries
	Total shipments and miscellaneous receipts.....	(X)	888.1	763.4	665.4	414.4	755.4	342.1	166.5	(X)

See footnotes at end of table.

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Unit of measure	Total product shipments including interplant transfers			
			1972		1967	
			Quantity	Value (million dollars)	Quantity	Value (million dollars)
3299- --	NONMETALLIC MINERAL PRODUCTS, N.E.C., TOTAL.....		(X)	169.7	(X)	87.5
	Sheet mica products:					
32990 53	Built-up sheet mica products.....		(X)	18.5	(X)	23.0
32990 55	Other sheet mica products.....		(X)	24.1	(X)	19.2
32990 61	Sand-lime brick, block, and tile (2-1/4" x 3-5/8" x 7-5/8" equivalent).....	Million bricks.	237.0	8.0	66.7	2.9
32990 81	Statuary and art goods (factory production).....		(X)	17.5	(X)	12.8
32990 98	Other nonmetallic mineral products, including magnesite floor composition, stucco, sapphire boule, etc.....		(X)	59.6	(X)	(S)
32990 00	Nonmetallic mineral products, n.e.c., n.s.k., for companies with 10 employees or more. (See note.).....		(X)	23.3	(X)	6.9
32990 02	Nonmetallic mineral products, n.e.c., n.s.k., for companies with less than 10 employees. (See note.).....		(X)	18.8	(X)	7.0

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the estimate did not meet publication standards either on the basis of the associated standard error of estimate or on the basis of a consistency review. (Z) Less than half of the unit of measurement shown (less than 0.1 when rounded).

¹In 1967, code 32911 17 combined with 32911 29.

²In 1967, code 32912 67 combined with codes 32912 31, 32912 37, 32912 42, 32912 44, and 32912 65.

³Insulation materials containing asbestos, which were previously classified in product class 32933, are now included in this product class for 1972. This shift into product class 32927 represents approximately 4 percent of the total 1967 shipments at the U.S. level.

⁴Product code 32927 51 combined with 32927 98 for 1972.

⁵Molded packings and seals, except plastics (formerly classified in product class 30695), axial mechanical face seals (formerly classified in product class 35992), plastics packing and seals (formerly classified in product class 30795), and leather packings, oil and grease retainers, including seals (formerly classified in product class 31210), are included in this product class for 1972. This shift of products represents more than 15 percent of the total shipments value at the U.S. level.

⁶Included in figure for code 32933 39.

⁷Molten cast brick and shapes are included with "Forsterite, pyrophyllite, molten-cast dolomite, dolomite-magnesite, and other nonclay brick and shapes."

⁸Molten cast refractories are made by fusing refractory oxides as in an electric furnace, and pouring the molten material into molds to form finished shapes.

⁹"Fused" as applied to bauxite and alumina means complete melting, as in an electric furnace; after cooling, the product is crushed and graded for use in the refractory. Dense-sintered alumina refers to heat treatment (short of melting) to render it relatively volume-stable for use in a refractory.

¹⁰Data for carbon refractories are combined with "Forsterite, pyrophyllite, molten-cast dolomite, dolomite-magnesite, and other nonclay brick and shapes" to avoid disclosing figures of individual companies.

¹¹Includes shipments for direct use as finished refractory products by establishments classified in manufacturing industries, and excludes shipments to refractory producers for reprocessing in the manufacture of brick and other refractories.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9 CC.....\$5.0 to \$9.9 FF.....\$20.0 to \$49.9
BB.....\$2.0 to \$4.9 EE.....\$10.0 to \$19.9 GG.....\$50.0 and over

(NA) Not available.

¹Insulation materials containing asbestos, which were previously classified in product class 32933, are now included in this product class. Products shifting into this class of products represent approximately 4 percent of the total 1967 shipments at the U.S. level.

²Molded packings and seals, except plastics (formerly classified in product class 30695), axial mechanical face seals (formerly classified in product class 35992), plastics packing and seals (formerly classified in product class 30795), and leather packings, oil and grease retainers, including seals (formerly classified in product class 31210), are included in this product class. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

TABLE 6C. Product Classes—Quantity and Value Shipped by All Manufacturing Establishments:
1958, 1963, 1967 to 1972

(NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Not directly comparable with 1958. In 1958, synthetic diamonds were classified in industry 3913, Lapidary Work. The amount is withheld to avoid disclosing figures for individual companies.

³Insulation materials containing asbestos, which were previously classified in product class 32933, are included in this product class for 1972. This shift into product class 32927 represents approximately 4 percent of the total 1967 shipments at the U.S. level.

⁴Molded packings and seals, except plastics (formerly classified in product class 30695), axial mechanical face seals (formerly classified in product class 35992), plastics packing and seals (formerly classified in product class 30795), and leather packings, oil and grease retainers, including seals (formerly classified in product class 31210), are included in this product class for 1972. This shift of products represents more than 15 percent of the total shipments value at the U.S. level.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

1972 code	Material	Unit of measure	1972		1967	
			Quantity	Delivered cost (million dollars)	Quantity	Delivered cost (million dollars)

Note: In 1967, data for manufactured mixed gas, blast furnace gas, and coke oven gas were included in code 131300, natural gas. In 1971, data for these gases were included in code 960011, other fuels.

- Represents zero. (X) Not applicable. (NA) Not available.
(S) Withheld because the estimates did not meet publication standards.

(D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than half of the unit of measurement shown.

MAJOR GROUP 33

Primary Metal Industries

- 33A Blast furnaces, steelworks, and rolling and finishing mills
- 33B Ferrous and nonferrous foundries
- 33C Smelting and refining of nonferrous metals and alloys
- 33D Nonferrous metal mills and miscellaneous primary metal products

This major group includes establishments engaged in the smelting and refining of ferrous and nonferrous metals from ore, pig, or scrap; in the rolling, drawing, and alloying of ferrous and nonferrous metals; in the manufacture of castings and other basic products of ferrous and nonferrous metals; and in the manufacture of nails, spikes, and insulated wire and cable. This major group also includes the production of coke. Establishments primarily engaged in manufacturing metal forgings or stampings are classified in group 346.

TABLE 1. General Statistics: 1972 and Earlier Years

(See appendix, Explanation of Terms)

Year and item	Establishments		All employees ¹		Production workers			Value added by manufacture ²	Cost of materials ³	Value of industry shipments ³	Capital expenditures, new ⁴

(X) Not applicable. (NA) Not available.

¹The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

²For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.

³The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

⁴The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.

⁵Data for 1972 are not directly comparable to 1971 and earlier years. See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.

⁶In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative office and auxiliary units are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these units are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, and prior to 1949.

⁷The 1957 edition of the Standard Industrial Classification classified beehive coke ovens and by-product coke ovens in Major Group 33. Such establishments were previously included in Major Group 29, Petroleum and Coal Products. However, this change was reflected in the tabulations for the 1955 to 1957 annual survey of manufactures. Data for 1954 were retabulated on this basis and are the source of the data labeled (original).

⁸These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. The estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

⁹The figures for 1939 to 1958 are not entirely comparable with those for 1937 because the 1937 figures (a) include data for establishments primarily engaged in producing certain nonferrous bearings and aluminum products, ship bunks, ornamental metal work, stampings, novelties, valves and fittings, machined castings, and tags, and (b) exclude data for establishments primarily engaged in making electrometallurgical products, non-ferrous die castings and forgings, cast aluminum cooking ware, and in the heat treating of steel. Value added by manufacture for 1939 on a basis strictly comparable with 1937 was \$2,131.2 million. Figures have not been compiled for 1935 and prior years because of large elements of noncomparability in the earlier statistics of a number of industries included in the primary metal group.

TABLE 2. General Statistics by Geographic Area: 1972 and 1967

EXPLANATORY TEXT

BLAST FURNACES, STEEL WORKS, AND ROLLING AND FINISHING MILLS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3312—Blast Furnaces (Including Coke Ovens), Steel Works, and Rolling Mills***
- 3313—Electrometallurgical Products**
- 3315—Steel Wiredrawing and Steel Nails and Spikes***
- 3316—Cold Rolled Steel Sheet, Strip, and Bars***
- 3317—Steel Pipe and Tubes**

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3312.—BLAST FURNACES AND STEEL MILLS (Short Title)

This industry comprises establishments primarily engaged in manufacturing hot metal, pig iron, silvery pig iron, and ferroalloys from iron ore and iron and steel scrap; converting pig iron, scrap iron, and scrap steel into steel; and in hot rolling iron and steel into basic shapes such as plates, sheets, strips, rods, bars, and tubing. Merchant blast furnaces and byproduct or beehive coke ovens are also included in this industry. Establishments primarily engaged in manufacturing ferro and nonferrous additive alloys by electrometallurgical processes are

classified in industry 3313. For a detailed list of products of industry 3312, refer to table 6A-1, product codes 33121 11 to 33121 89.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Included in this industry are all establishments engaged in the manufacture of blast furnace ferroalloys. However, establishments which manufacture ferro or nonferrous additive alloys by electrometallurgical process are classified in industry 3313, Electrometallurgical Products. Also, establishments which draw wire from purchased rod and bar; establishments which perform only cold rolling, drawing, or finishing operations; and establishments which produce welded, seamless, and heavy riveted pipe from purchased materials are not included in industry 3312, but are included in industry 3315, Steel Wire and Related Products; industry 3316, Cold Finishing of Steel Shapes; and industry 3317, Steel Pipe and Tubes, respectively.

Total cost of materials and the total value of shipments in industry 3312 include extensive duplication resulting from the use of the products of some establishments as materials by others. Some quantities of coke are transferred to blast furnaces which have no affiliated coke ovens, and considerable quantities of pig iron are transferred from blast furnaces to partially integrated mills. In addition, steel ingots, semifinished shapes, and finished shapes and forms are transferred from one establishment to another for further processing. The value of such shipments appears twice in the total value of shipments, and a corresponding duplication enters into the total cost of materials, etc. This duplication does not exist in the data on value added by manufacture.

As a means of developing a net value of shipments figure, the cost of steel shapes received by establishments in industry 3312 was collected as a separate materials consumed item, and, as shown in table 7A, totaled approximately \$2.31 billion. In addition, the cost of pig iron consumed in this industry totaled approximately \$0.50 billion. Also, a \$0.30 billion estimate of the cost of coke used as a fuel in this industry was derived from a historic analysis of fuels data. On this basis, the value of materials shipped or transferred between plants within this industry totaled approximately \$3.11 billion. Subtracting this value from the total value of shipments of approximately \$23.95 billion yields a net value, excluding duplication, of \$20.84 billion. A similar adjustment to the total cost of materials, supplies, etc., figure provides a net cost figure of \$9,483 million. Adjusting the cost of fuels on this same basis provides a net cost of fuels of \$563 million.

Based on departmental operations data, it was possible to further classify the establishments of this industry into four

*Note that the "short title" for this industry is used throughout the report.

subindustries; i.e., fully integrated establishments, partially integrated establishments with blast furnaces, partially integrated establishments without blast furnaces, and nonintegrated establishments. For purposes of this classification system, an establishment was defined as follows: Fully integrated if the establishment consisted of coke ovens, blast furnaces, steel furnaces, and rolling and finishing mills; partially integrated establishment with blast furnaces if the establishment consisted of blast furnaces, steel furnaces, and rolling and finishing mills; partially integrated establishment without blast furnaces if the establishment consisted of steel furnaces and either rolling and finishing mills or a forging department; and nonintegrated for all other establishments including beehive coke ovens, byproduct coke ovens operated independently of blast furnaces and steel departments, merchant blast furnaces, and establishments with hot rolling and finishing operations.

In a few cases, operations which are in fact fully integrated are classified as partially integrated or nonintegrated because separate reports were collected, either because the operations are conducted in different cities or counties or the company treats the operations separately for their own administrative reasons. The subindustry data shown in tables 1, 2, and 4 are based on this system of classification.

The 1972 census obtained data on shipments of steel mill shapes at broad product class levels only. This is the source of the data in table 6A-1 described "As reported in census of manufactures." More detailed product data were obtained on Annual Survey Form MA-33B, and published in Current Industrial Reports, series MA-33B, Steel Mill Products. These data are shown in tables 6A-2, 6A-3, and 6A-4.

Annual Survey Form MA-33B obtained data on the total production of steel at three broad levels of output: Ingots; semifinished shapes and forms (blooms, billets, wire rods, skelp, etc.); and finished mill shapes and forms. For each of these groups, the steel mills were requested to report production in the form in which the shape (a) passed from one group to the next, (b) was shipped from the establishment, or (c) was consumed in the establishment in the manufacture of fabricated products. The production figures shown in tables 6A-2 and 6A-3 include data on production derived from this method of reporting. Production figures shown for ingots represent the total production of ingots. Production figures shown for finished shapes and forms are the tonnages of these shapes produced at the steel mill for shipments (either outside the steel industry or to other steel mills) or for consumption in the manufacture of fabricated products. The production of all semifinished shapes and forms combined represent total production of semifinished shapes and forms for sale and transfer and also for use in the same plant in the manufacture of either other steel mill shapes or fabricated products.

Net shipments of steel products (as derived from Survey Form MA-33B) including both the shipments to establish-

ments outside the steel industry and the amounts consumed in the steel mills in the production of fabricated products and for maintenance, repair, and operating supplies, are shown in table 6A-4.

The figures on steel mill shapes shown in tables 6A-1 to 6A-4 include the manufacture of these products in separate cold rolling and drawing establishments, wiredrawing plants, and pipe mills as well as steel mills. The receipts of steel at these plants have been taken into account in deriving the net shipment figures shown in table 6A-4.

While the primary products of the industry include a broad range of products, the establishments tend to group themselves into specific product classes within the industry. The extent of this specialization is indicated in table 5A.

Data on shipments of pig iron, by grade, are published by the Bureau of Mines in its Minerals Yearbook. These data are reprinted in table 6A-5 and differ from the data reported in the census in that they include the tonnages of pig iron produced and consumed in the same establishment. Other differences of minor consequence also exist.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3312, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3313.—ELECTROMETALLURGICAL PRODUCTS

This industry comprises establishments primarily engaged in manufacturing ferro and nonferrous additive alloys by electrometallurgical or metallothermic processes, including high percentage ferroalloys and high percentage nonferrous additive alloys. For a detailed list of products of industry 3313, refer to table 6A, product codes 33131 11 to 33134 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Electrometallurgical Products Industry in 1972 totaled \$550 million. This included shipments of electrometallurgical products (primary products) valued at \$518 million.

Shipments of electrometallurgical products (primary products) in 1972 represented 85 to 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 85 to 90 percent.

Shipments of electrometallurgical products (primary products) from establishments classified in industry 3313 in 1972 represented 87 percent (coverage ratio) of these products valued at \$594 million shipped by all industries. In 1967, the coverage ratio was 82 percent. Other industries shipping electrometallurgical products consisted mainly of industry 3312, Blast Furnaces and Steel Mills, (\$42 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3313, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3315.—STEEL WIRE AND RELATED PRODUCTS (Short Title)

This industry comprises establishments primarily engaged in drawing wire from purchased iron or steel rods, bars, or wire, and which may be engaged in the further manufacture of products made from wire. Establishments primarily engaged in manufacturing steel nails and spikes from purchased materials are also included in this industry. Rolling mills engaged in the production of ferrous wire from wire rods or hot rolled bars produced in the same establishment are classified in industry 3312. Establishments primarily engaged in drawing nonferrous wire are classified in SIC group 335. For a detailed list of products of industry 3315, refer to table 6A, product codes 33151 11 to 33159 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Steel Wire and Related Products Industry in 1972 totaled \$1,240 million. This included shipments of steel wire and related products (primary products) valued at \$1,095 million, shipments of other products (secondary products) valued at \$66 million, and miscellaneous receipts (mainly receipts for resales) of \$80 million.

Shipments of steel wire and related products (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent.

Shipments of steel wire and related products (primary products) from establishments classified in industry 3315 in 1972 represented 42 percent (coverage ratio) of these products valued at \$2,600 million shipped by all industries. In 1967, the coverage ratio was 37 percent. Other industries shipping steel wire and related products consisted mainly of industry 3312,

Blast Furnaces and Steel Mills, (\$779 million); and industry 3496, Miscellaneous Fabricated Wire Products (\$703 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3315, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3316.—COLD FINISHING OF STEEL SHAPES (Short Title)

This industry comprises establishments primarily engaged in (1) cold rolling steel sheets and strip from purchased hot rolled sheets; (2) cold drawing steel bars and steel shapes from purchased hot rolled steel bars; and (3) producing other cold finished steel. Establishments primarily engaged in the production of steel, including hot rolled steel sheets, and further cold rolling such sheets are classified in industry 3312.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Cold Finishing of Steel Shapes Industry in 1972 totaled \$1,636 million. This included shipments of cold rolled steel shapes (primary products) valued at \$1,441 million, shipments of other products (secondary products) valued at \$148 million, and miscellaneous receipts of \$47 million.

Shipments of cold rolled sheet, strip, and bars (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent.

Shipments of cold rolled steel shapes (primary products) from establishments classified in industry 3316 in 1972 represented 29 percent (coverage ratio) of these products valued at \$4,890 million shipped by all industries. In 1967, the coverage ratio was 24 percent. Other industries shipping cold rolled sheet, strip, and bars consisted mainly of industry 3312, Blast Furnaces and Steel Mills (\$3,403 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3316, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3317.—STEEL PIPE AND TUBES

This industry comprises establishments primarily engaged in the production of welded or seamless steel pipe and tubes and heavy riveted steel pipe from purchased materials. Establishments primarily engaged in the production of steel, including steel skelp or steel blanks, tube rounds, or pierced billets, are classified in industry 3312.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Steel Pipe and Tubes Industry in 1972 totaled \$1,292 million. This included shipments of steel pipe and tubes (primary products) valued at \$1,162 million, shipments of other products (secondary products) valued at \$86 million, and miscellaneous receipts (mainly receipts for resales) of \$44 million.

Shipments of steel pipe and tubes (primary products) in

1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent.

Shipments of steel pipe and tubes (primary products) from establishments classified in industry 3317 in 1972 represented 42 percent (coverage ratio) of these products valued at \$2,766 million shipped by all industries. In 1967, the coverage ratio was 38 percent. Other industries shipping steel pipe and tubes consisted mainly of industry 3312, Blast Furnaces and Steel Mills (\$1,501 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3317, these establishments accounted for 1 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3312	Industry 3313	Industry 3315	Industry 3316	Industry 3317
1972.....	245	27	235	86	115
1967.....	200	21	200	77	123
1963.....	161	20	171	59	114

(NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²The value of shipments and cost of materials for this industry contain extensive duplication arising from shipments between establishments in the same industry classification.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

(See appendix, Explanation of Terms)

²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

TABLE 4. General Statistics, by Employment Size of Establishment: 1972

(See appendix, Explanation of Terms)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent

E3--30 to 39 percent

E5--50 to 59 percent

E7--70 to 79 percent

E9--90 to 99 percent

E2--20 to 29 percent

E4--40 to 49 percent

E6--60 to 69 percent

E8--80 to 89 percent

E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

See footnotes at end of table.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F
		A	B	C	D	E	F	G	H	I
3312	Blast furnaces and steel mills.....1972..	23,946.7	21,870.5	1,272.8	803.4	(¹)	25,781.6	21,870.5	3,911.1	(¹)
1967..	19,620.6	17,989.5	1,001.3	629.8	(¹)	20,869.1	17,989.5	2,879.6	(¹)
3313	Electrometallurgical products.....1972..	550.1	517.7	² 32.4	(²)	(85-90)	594.4	517.7	76.7	87
1967..	467.9	398.2	² 69.7	(²)	(85-90)	483.0	398.2	84.8	82
3315	Steel wire and related products.....1972..	1,240.4	1,095.3	65.6	79.5	94	2,599.8	1,095.3	1,504.5	42
1967..	845.2	738.0	80.2	27.0	90	2,004.4	738.0	1,266.4	37
3316	Cold finishing of steel shapes.....1972..	1,635.7	1,440.8	147.5	47.4	91	4,889.9	1,440.8	3,449.1	29
1967..	1,038.7	913.0	109.1	16.6	89	3,809.4	913.0	2,896.4	24
3317	Steel pipe and tubes.....1972..	1,292.1	1,161.7	86.1	44.3	93	2,765.5	1,161.7	1,603.8	42
1967..	1,148.6	994.8	117.7	36.1	89	2,629.1	994.8	1,634.3	38

¹Value of shipments for the industry in 1972 totaled \$23,947 million. This value, however, includes duplication in that the products of some establishments are used as materials by others. (See text for fuller explanation.) Specialization ratio, computed on the basis of net value of shipments (adjusted for estimated cost of coke used as fuel), is approximately 94 percent. Although the coverage ratio would exceed 83 percent, it cannot be precisely computed. Comparable ratios for 1967 were specialization, 94 percent, and coverage, 84 percent.

²Miscellaneous receipts are included with secondary products to avoid disclosing figures for individual companies.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

See footnotes at end of table.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	Other industries	Product code	Industry, class of products, and miscellaneous receipts	Other industries
	Listing of other industries with over \$2 million shipments of primary products			Listing of other industries with over \$2 million shipments of primary products--Continued

				3644 Noncurrent-carrying wiring devices.....	18.3
				3751 Motorcycles, bicycles, and parts.....	(5-10)

Note: Data shown parenthetically are ranges expressed in millions of dollars.

- Represents zero. (X) Not applicable.

¹The value of shipments of industry 3312 includes duplication in that the products of some establishments are used as materials by others. For 1972, it is estimated that the duplication amounted to \$3.1 billion and, accordingly, a net value of shipments would total \$20.8 billion (adjusted for estimated cost of coke used as a fuel). (See text for fuller explanation.)

²Includes total for product class 34629, Open die forgings, made in steel forgings and other industries which are primary to industry 3462.

³The totals for product classes 33151, 33156, 33157, and 33159 include, respectively, the totals for product classes 34961, 34966, 34964, and 34969, which are primary to industry 3496, Fabricated Wire Products, N.E.C. Shipments of these product classes totaled as follows:

Product class	Value (million dollars)
34961	96.4
34966	73.5
34964	75.3
34969	457.5

3317- --	STEEL PIPE AND TUBES ⁷					
33176 -- } 33126 -- }	As reported in the census of manufactures.....		(X)	2,765.5	(X)	2,629.1
33126 -- 33126 00	Made in steel works (industry 3312).....		(X)	1,501.0	(X)	1,554.1
33176 00	Made in steel pipe and tubes (industry 3317) and other industries.....		(X)	1,264.5	(X)	1,075.0
	As reported in Current Industrial Reports series MA-33B, "Steel Mill Products".....		(X)	2,620.7	(X)	2,440.5

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹Excludes quantities produced in byproduct coke ovens operated in conjunction with utilities producing and distributing gas.

²Data for 1972 for product code 33121 92 are combined with code 33121 94 in order to avoid disclosing figures for individual companies.

³Data for 1967 for product code 33121 83 included with product codes 33121 92, 33121 93, and 33121 94.

⁴Excludes shipments of steel processed on a conversion basis for non-steel-producing companies. Detailed data by shape and grade and net shipments figures appear in tables 6A-2 to 6A-7.

⁵These figures are not strictly comparable with tonnage shipments shown in Current Industrial Reports, series MA-33C, Commercial Steel Forgings, in that the latter includes only forgings for sale, whereas, the 1972 and 1967 censuses of manufactures include interplant transfers of forgings. Accordingly, a direct comparison with the Current Industrial Reports series is not possible. Forgings produced and consumed within the same plant are not included in either the census or the Current Industrial Reports figures. The totals reported in the Current Industrial Reports survey for commercial steel forgings were as follows:

Item	1972 (1,000 short tons)	1967 (1,000 short tons)
Open-die hammer forgings:		
Carbon.....	93.9	117.1
Alloy, including stainless.....	58.9	84.7
Open-die press forgings:		
Carbon.....	99.3	70.8
Alloy, including stainless.....	135.1	127.3

⁶Annual data are published for these products in Current Industrial Reports, series MA-33B, "Steel Mill Products."

⁷Excludes shipments of steel processed on a conversion basis for non-steel-producing companies. Detailed data by shape and grade and net shipments are published in Current Industrial Reports, series MA-33B, "Steel Mill Products," for 1972.

TABLE 6A-2. Receipts, Consumption, and Shipments of Steel Mill Products: 1972

- Represents zero. (D) Withheld to avoid disclosing figures of individual companies. In some cases, figures which are otherwise publishable are withheld to avoid indirect disclosure by subtraction from higher-level totals or from related figures.

¹Excludes receipts and shipments of steel processed on a conversion basis for non-steel-producing companies. Receipts data represent receipts at producing mills only, but include receipts from both domestic and foreign sources.

²Transfers to other plants of the same company are included with shipments to other companies. Such transfers constituted between 10 and 20 percent for all other carbon rails, carbon pressure tubing, carbon wire strand for prestressed concrete, cold-finished stainless steel bars, and stainless steel seamless pressure and mechanical tubing; and between 20 and 50 percent for carbon electrical sheets and strip, carbon concrete reinforcing bars rolled from old materials, carbon tool steel, carbon wire rope and cable, alloy hot-rolled sheets, alloy pressure tubing, and stainless wire rods. For all other cases, interplant transfers constitute less than 10 percent of the total.

³See footnote 2, table 6A-4.

- Represents zero. (D) Withheld to avoid disclosing figures of individual companies. In some cases, figures which are otherwise publishable are withheld to avoid indirect disclosure by subtraction from higher-level totals or from related figures.

¹Excludes receipts and shipments of steel processed on a conversion basis for non-steel-producing companies. Receipts data represent receipts at producing mills only, but include receipts from both domestic and foreign sources.

²Transfers to other plants of the same company are included with shipments to other companies. Such transfers constituted between 15 and 30 percent for carbon steel electrical sheets and strip, carbon steel wire rope and cable, alloy steel wire rods, and alloy steel electrical sheets and strip. For all other cases, such transfers are less than 5 percent of the total.

³See footnote 2, table 6A-4.

TABLE 6A-4. Net Shipments of Steel Mill Products: 1972 and 1967—Continued

(Footnotes for table 6A-4)

- Represents zero. (NA) Not available.

¹Net shipments are derived by subtracting the steel mills' receipts of each steel mill shape for the total of shipments to other companies, transfers to other plants, and tonnage consumed in steel mills in the production of fabricated products and as maintenance, repair, and operating supplies. For practical purposes, net shipments amount to zero for some products. Due to material in transit, this results in negative figures for a few items. Where products are grouped together for calculation of net shipments, some of the individual products within the group may represent negative figures. In such cases, the negative figures for the individual products were subtracted from the net shipments of the other products and an overall net shipments total is shown.

²Represents wire products produced within steel works and wiredrawing establishments. Such establishments accounted for approximately the following percentages of the total quantity of shipments of these products in 1972 based on data from the 1972 Census of Manufactures: Nails and staples, 76 percent; barbed and twisted wire, 93 percent; woven and welded wire fence, over 95 percent; bale ties, 71 percent; wire rope and cable, 41 percent; and wire strand, over 95 percent. Steel works and wiredrawing establishments accounted for 61 percent of the total value of shipments of woven wire netting.

³Data on structural pipe and tubes are included with Miscellaneous, including standard pipe, to avoid disclosing operations of individual companies.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

- Represents zero. (NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Some or all of the products primary to this industry are also primary to one or more other industries. The 4-digit product-group totals exclude the values produced by the other primary industries, and, therefore, are not comparable to product-group (4-digits) and product class (5-digits) totals shown in table 6A-1 and table 6B, respectively.

³In 1958, combined data were collected for ferrous and nonferrous woven wire products. This estimate of ferrous wire cloth is based on the ratio of ferrous cloth to total wire cloth and other woven wire products for 1963.

976000	Materials, n.s.k. ⁹	(X)	50.5	(X)	37.3

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹Total cost of materials, etc., contains extensive duplication. This duplication arises because the products of some establishments are used as materials by other establishments in the same industry. For the industry as a whole, the extent of this duplication is approximated by totaling the cost of pig iron, and ingots, and semifinished shapes purchased for further processing. Estimated unduplicated cost of materials obtained by this method is \$9,487 million. The comparable 1967 figure was \$7,061 million.

²Included with material code 970099, "All other materials and components, parts, containers, and supplies consumed," to avoid disclosing figures of individual companies.

³In addition, pig iron produced and consumed in the same establishment in 1972 was 73,126 thousand short tons. In 1967, the comparable figure was 70,547 thousand short tons.

⁴In addition, 277 thousand short tons of ferromanganese were produced and consumed in the same establishment in 1972.

⁵Excludes spiegeleisen produced and consumed in the same establishment.

⁶Excludes sulfuric acid produced and consumed in the same establishment.

⁷In addition, 16,731 million cubic feet of oxygen were produced and consumed in the same establishment in 1972. For 1967 the comparable figure was 10,981 million cubic feet.

⁸Excludes gray iron ingot molds produced and consumed in the same establishment.

⁹This item represents the total cost of materials for establishments that did not report detailed materials data.

¹⁰Includes cost for materials indicated by the symbol (D).

EXPLANATORY TEXT

FERROUS AND NONFERROUS FOUNDRIES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3321—Gray Iron Foundries**
- 3322—Malleable Iron Foundries**
- 3324—Steel Investment Foundries**
- 3325—Steel Foundries, N.E.C.**
- 3361—Aluminum Foundries (Castings)***
- 3362—Brass, Bronze, Copper, Copper Base Alloy Foundries (Castings)***
- 3369—Nonferrous Foundries (Castings), N.E.C.***

For these industries, captive production (that is, the tonnage of castings produced for incorporation into the final product of the plant or company) is a particularly important factor. Distinction is made between rough castings and castings which are machined or further processed and incorporated into other products. The removal of gates, risers, sprues, and tumbling, dipping, and sand blasting, do not constitute machining. Plants primarily engaged in manufacturing castings are included in the foundry industries; plants primarily engaged in further processing castings into parts for metal products or machinery are classified in other major groups.

For the 1972 Census of Manufactures, separate establishment reports were received from commercial (jobbing) foundries and from those captive foundries which were operated as separate establishments by the reporting companies. These two groups comprise the types of establishments included in the foundry industries listed above. However, where the captive foundry operation was completely integrated with the operation of the entire plant, no separate establishment report was received for the foundry activity. In these instances, data were obtained on the tonnage of castings produced and consumed and on the number of employees usually engaged in the captive foundry operation. However, establishments with such foundry departments were classified on the basis of the plant's final product and accordingly, the general statistics on employment, payrolls, cost of materials, etc., are included in the data for such industries as plumbing fixtures (3431) and farm machinery and equipment (3522).

*Note that the "short title" for this industry is used throughout the report.

The data shown in table 6A on shipments of transfers of gray iron, malleable iron, steel investment, and other steel castings represent total shipments and transfers including the quantity of castings shipped by establishments classified in industries other than industries 3321, 3322, 3324, and 3325. For those industries where captive foundry departments are particularly important, data on the tonnage of castings produced and consumed are shown in table 7A of the individual industry reports covering the specific industries.

The Bureau of the Census collects and publishes monthly data on shipments of iron and steel castings in Current Industrial Reports, series M33A, "Iron and Steel Castings." It also collects and publishes monthly data on shipments of nonferrous castings in Current Industrial Reports, series M33E, "Nonferrous Castings." The M33A and the M33E series include data for both commercial and captive foundry production and show, separately, shipments "for sale" and shipments "for own use."

It should be specifically noted that the value-of-shipments data in table 6A do not include the value of the large quantity of castings produced by establishments classified in other industries which produce castings only for incorporation into their own products or for internal use but not for sale as such.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3321.—GRAY IRON FOUNDRIES

This industry comprises establishments primarily engaged in the manufacture of gray iron castings, including cast iron pressure and soil pipes and fittings. For a detailed list of products of industry 3321, refer to table 6A, product codes 33215 33 to 33219 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Gray Iron Foundries Industry in 1972 totaled \$3,875 million. This included shipments of gray iron castings (primary products) valued at \$3,507 million, shipments of other products (secondary products) valued at \$232 million, and miscellaneous receipts (mainly resales) of \$136 million.

Shipments of gray iron castings (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of motor vehicle parts and accessories (\$50 to \$100 million); steel castings, n.e.c., (\$25 million); and malleable iron castings (\$24 million).

Shipments of gray iron castings (primary products) from establishments classified in industry 3321 in 1972 represented 87 percent (coverage ratio) of these products valued at \$4,034 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping gray iron castings consisted mainly of industry 3312, Blast Furnaces and Steel Mills, (\$148 million) and industry 3714, Motor Vehicle Parts and Accessories, (\$100 to \$200 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3321, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3322.—MALLEABLE IRON FOUNDRIES

This industry comprises establishments primarily engaged in the manufacture of malleable iron castings. For a detailed list of products of industry 3322 refer to table 6A, product codes 33221 31 and 33222 21.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Malleable Iron Foundries Industry in 1972 totaled \$508 million. This included shipments of malleable iron castings (primary products) valued at \$439 million, shipments of other products (secondary products) valued at \$65 million, and miscellaneous receipts (mainly resales) of \$4 million.

Shipments of malleable iron castings (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent. Secondary products shipped by this industry in 1972 consisted mainly of gray iron castings (\$37 million).

Shipments of malleable iron castings (primary products) from establishments classified in industry 3322 in 1972 represented 91 percent (coverage ratio) of these products valued at \$485 million shipped by all industries. In 1967, the coverage ratio was 89 percent. Other industries shipping malleable iron castings consisted mainly of industry 3321, Gray Iron Foundries, (\$24 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3322, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3324.—STEEL INVESTMENT FOUNDRIES

This industry comprises establishments primarily engaged in the manufacture of steel investment castings. For a detailed list of products of industry 3324, refer to table 6A, product codes 33240 63 and 33240 65.

The Steel Investment Foundries Industry is included for the first time in the census of manufactures for 1972. This industry and industry 3325, Steel Foundries, N.E.C., comprised industry 3323, Steel Foundries, in 1967.

Value of shipments and other receipts of the Steel Investment Foundries Industry in 1972 totaled \$262 million. This included shipments of steel investment castings (primary products) valued at \$224 million, shipments of other products (secondary products) valued at \$35 million, and miscellaneous receipts (mainly resales) of \$2 million.

Shipments of steel investment castings (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of steel investment castings (primary products) from establishments classified in industry 3324 in 1972 represented 94 percent (coverage ratio) of these products valued at \$238 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at

the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3324, these establishments accounted for 0 percent of value of shipments.

INDUSTRY 3325.—STEEL FOUNDRIES, N.E.C.

This industry comprises establishments primarily engaged in the manufacture of steel castings, not elsewhere classified. For a detailed list of products of industry 3325, refer to table 6A, product codes 33252 12 to 33255 59.

The Steel Foundries, N.E.C., Industry is included for the first time in the census of manufactures for 1972. This industry and industry 3324, Steel Investment Foundries, comprised industry 3323, Steel Foundries, in 1967.

Value of shipments and other receipts of the Steel Foundries, N.E.C., Industry in 1972 totaled \$1,067 million. This included shipments of steel castings, n.e.c., (primary products) valued at \$922 million, shipments of other products (secondary products) valued at \$116 million, and miscellaneous receipts (mainly resales) of \$29 million.

Shipments of steel castings, n.e.c., (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of gray iron castings (\$24 million).

Shipments of steel castings, n.e.c., (primary products) from establishments classified in industry 3325 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,050 million shipped by all industries. Other industries shipping steel castings, n.e.c., consisted mainly of industry 3312, Blast Furnaces and Steel Mills, (\$25 million) and industry 3321, Gray Iron Foundries, (\$25 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3325, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3361.—ALUMINUM FOUNDRIES (Short Title)

This industry comprises establishments primarily engaged in the manufacture of castings and diecastings of aluminum and

aluminum-base alloys. For a detailed list of products of industry 3361, refer to table 6A, product codes 33611 41 to 33612 73.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Aluminum Foundries Industry in 1972 totaled \$1,270 million. This included shipments of aluminum castings (primary products) valued at \$1,047 million, shipments of other products (secondary products) valued at \$206 million, and miscellaneous receipts (mainly resales) of \$17 million.

Shipments of aluminum castings (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 83 percent. Secondary products shipped by this industry in 1972 consisted mainly of nonferrous castings, n.e.c., (\$94 million).

Shipments of aluminum castings (primary products) from establishments classified in industry 3361 in 1972 represented 89 percent (coverage ratio) of these products valued at \$1,172 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping aluminum castings consisted mainly of industry 3369, Nonferrous Foundries N.E.C., (\$38 million) and industry 3362, Brass, Bronze, and Copper Foundries, (\$30 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3361, these establishments accounted for 7 percent of value of shipments.

INDUSTRY 3362.—BRASS, BRONZE, AND COPPER FOUNDRIES (Short Title)

This industry comprises establishments primarily engaged in the manufacture of castings and diecastings of copper and copper-base alloy. For a detailed list of products of industry 3362, refer to table 6A, product codes 33620 11 to 33620 71.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Brass, Bronze, and Copper Foundries Industry in 1972 totaled \$465 million. This included shipments of brass, bronze, and copper castings

(primary products) valued at \$377 million, shipments of other products (secondary products) valued at \$73 million, and miscellaneous receipts (mainly resales) of \$15 million.

Shipments of brass, bronze, and copper castings (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 83 percent. Secondary products shipped by this industry in 1972 consisted mainly of aluminum castings (\$30 million).

Shipments of brass, bronze, and copper castings (primary products) from establishments classified in industry 3362 in 1972 represented 81 percent (coverage ratio) of these products valued at \$463 million shipped by all industries. In 1967, the coverage ratio was 82 percent. Other industries shipping brass, bronze, and copper castings consisted mainly of industry 3361, Aluminum Foundries, (\$27 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3362, these establishments accounted for 9 percent of value of shipments.

INDUSTRY 3369.—NONFERROUS FOUNDRIES, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in the manufacture of castings and diecastings of nonferrous materials, except aluminum, copper, and copper-base alloys.

For a detailed list of products of industry 3369, refer to table 6A, product codes 33691 51 to 33693 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Nonferrous Foundries, N.E.C., Industry in 1972 totaled \$589 million. This included shipments of nonferrous castings, n.e.c., (primary products) valued at \$474 million, shipments of other products (secondary products) valued at \$100 million, and miscellaneous receipts (mainly resales) of \$15 million.

Shipments of nonferrous castings, n.e.c., (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 83 percent. Secondary products shipped by this industry in 1972 consisted mainly of aluminum castings (\$38 million).

Shipments of nonferrous castings, n.e.c., (primary products) from establishments classified in industry 3369 in 1972 represented 79 percent (coverage ratio) of these products valued at \$604 million shipped by all industries. In 1967, the coverage ratio was 82 percent. Other industries shipping nonferrous castings, n.e.c., consisted mainly of industry 3361, Aluminum Foundries, (\$94 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3369, these establishments accounted for 9 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 Industry 3321	1972 Industry 3322	1972 Industry 3324	1972 Industry 3325	1967 Industry 3323	1972 Industry 3361	1972 Industry 3362	1972 Industry 3369
1972.....	892	64	68	225	(X)	972	490	321
1967.....	969	72	(X)	(X)	256	970	516	352
1963.....	1,062	76	(X)	(X)	222	926	535	386

Although in 1967, industry 3323 is a combination of 1972 industries 3324 and 3325, the number of companies is not available for 1972 on the old SIC basis.

(X) Not applicable. (NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table I of the chapter devoted to this industry.

²The 1972 data are not strictly comparable with 1971 and prior years because of revisions in the 1972 Standard Industrial Classification. For 1972, these statistics are the combined totals for industries 3324 and 3325 on the new SIC basis. For 1971 and prior years, they are totals for industry 3323 as classified on the old SIC basis. The 1972 establishments included in industries 3324 and 3325 (combined) on the new SIC basis are not necessarily identical to the establishments included in industry 3323 on the old SIC basis (see table 1C). However, the effect of these changes is estimated to be less than one percent of the total value of shipments for industries 3324 and 3325 in 1972 (combined).

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

¹The figures for 1972 are not strictly comparable with 1971 and prior years. (See footnote 2, table 1A.)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees

BB--250 to 499 employees

CC--500 to 999 employees

EE--1,000 to 2,499 employees

FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (2) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down the industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Gray iron foundries (SIC 3321)	Malleable iron foundries (SIC 3322)	Steel investment foundries (SIC 3324)	Steel foundries, n.e.c. (SIC 3325)	Aluminum foundries (SIC 3361)	Brass, bronze, and copper foundries (SIC 3362)	Nonferrous foundries, n.e.c. (SIC 3369)	Other industries

33690 00	Nonferrous castings, n.e.c., n.s.k., for establishments with 10 employees or more. (See note.).....		(X)	54.3	(X)	44.5
33690 02	Nonferrous castings, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	11.6	(X)	5.0

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. ^eEstimated.

¹Differs from the tonnage figures published in Current Industrial Reports, series M33A, "Iron and Steel Castings," in that no figures are included above for castings produced by captive foundry departments of plants classified in other industries. As shown in the Current Industrial Report, captive production "for own use" including both interplant transfers and castings produced and consumed by the same plant for 1972 (revised) totaled as follows: Gray iron castings, 6,314 thousand tons; ductile (nodular) iron castings, 798 thousand tons; malleable iron castings, 382 thousand tons; and steel castings, 288 thousand tons. Of this total, only the following tonnages transferred to other plants are included above: Gray iron castings, 2,887 thousand tons; ductile (nodular) iron castings, 439 thousand tons; malleable iron castings, 274 thousand tons; and steel castings, 47 thousand tons. The differences between the tonnages shown above for "shipments to other companies" and the "for sale" figures in series M33A are due to differences in classification in the census and monthly survey with regard to such products as machinery parts, etc., and fiscal-year reports in the census.

²Includes, "not specified by kind," categories listed below for which quantity data were estimated.

³The 1972 and 1967 totals for this product class are not comparable since, for 1972, ductile iron castings are classified on a separate class of products (code 33215). The amount of ductile iron castings included in the 1967 totals for this product class is unknown.

⁴Figures for transfers to other plants of the same company are included with "Shipments to other companies" to avoid disclosing operations of individual companies.

⁵Heat and/or corrosion-resistant steel castings containing 8 percent more of chromium or nickel, or both, with or without molybdenum or other elements.

⁶The individual product codes included in this class of products for 1972 differ significantly from the prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

⁷Data for 1967 include ductile iron castings.

⁸"White iron castings" were collected with "All other gray iron castings" in 1967.

⁹These data differ from the quantities shown in Current Industrial Report series M33E, "Nonferrous Castings," in that no data are included above for castings produced by captive foundry departments of plants classified in other industries. In addition, certain products are reported as castings in the monthly survey which in the census of manufacturers are classified as finished products in other industries. As shown in the Current Industrial Report, captive production ("for own use") including both interplant transfers and castings produced and consumed by the same plant for 1972 (revised), totaled as follows: Copper and copper-base alloy castings, 231 thousand tons; aluminum and aluminum-base alloy castings, 496 thousand tons; zinc and zinc-base alloy castings, 157 thousand tons; magnesium and magnesium-base alloy castings, 3 thousand tons; and lead-base alloy castings, 3 thousand tons.

¹⁰For 1967, product code 33692 31 is included with product code 33692 41, "Other, including permanent and semipermanent mold magnesium and magnesium-base alloy castings."

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Areas: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9 CC.....\$5.0 to \$9.9 FF.....\$20.0 to 49.9
BB.....\$2.0 to \$4.9 EE.....\$10.0 to \$19.9 GG.....\$50.0 and over

(NA) Not available.

¹The 1972 and 1967 totals for this product class are not comparable since ductile iron castings have shifted out of this class of products in 1972. The amount of ductile iron castings included in the 1967 totals for this product class is unknown.

²Not a separate product class in 1967.

³The individual product codes included in this class of products for 1972 differ significantly from the prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the United States level.

(NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent either other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²The 1972 and 1967 totals for this product class are not comparable since, for 1972, ductile iron castings are classified in a separate class of products (code 33215). The amount of ductile iron castings included in the 1967 totals for this product class is unknown.

³Not a separate product class in 1972 and prior years.

⁴The individual product codes included in this class of products for 1972 differ significantly from the prior years. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level.

EXPLANATORY TEXT

SMELTING AND REFINING OF NONFERROUS METALS AND ALLOYS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3331—Primary Smelting and Refining of Copper*
- 3332—Primary Smelting and Refining of Lead*
- 3333—Primary Smelting and Refining of Zinc*
- 3334—Primary Production of Aluminum*
- 3339—Primary Smelting and Refining of Nonferrous Metals, N.E.C.*
- 3341—Secondary Smelting and Refining of Nonferrous Metals*

Industries in this group produce primary and secondary nonferrous metals and alloys from ores and concentrates and from scrap. The five primary industries (3331 to 3339) are chiefly engaged in extracting metals from ores, concentrates, precipitates, etc. They include (1) establishments which perform smelting operations only and produce metals such as blister copper and lead base bullion, that are not yet of commercial grades; (2) establishments which refine the products of the smelters and produce commercially pure metal; and (3) those which produce refined metals from the ores and concentrates in a single continuous operation. These industries do not include milling or concentrating operations since these are generally located at mine sites and are considered as mineral operations rather than manufacturing activities. Such operations are covered in the 1972 Census of Mineral Industries (SIC Major Group 10—Metal Mining). Also excluded are establishments which produce alumina from bauxite and those which process ores and concentrates primarily for the purpose of producing chemicals such as zinc oxide. Such establishments are included in the chemical group of manufacturing industries. Primary smelters and refiners may also produce considerable quantities of such chemicals as sulfuric acid, zinc oxide, etc.

Inasmuch as many of the companies in the smelting and refining field operate their own mines and milling and concentrating plants, it has been difficult to establish a satisfactory value of the ore or concentrate transferred from the mine to the smelter. In an effort to achieve uniformity and

to conform to reporting by smelters purchasing ore from other companies, the instructions accompanying the 1972 and 1967 report forms specified that such transfers should be reported at an approximate commercial value. In practice, this instruction was not feasible in all cases. In some instances, a comparable commercial form of the ore or concentrate transferred does not exist and, in others, to convert to an approximate commercial value would be unrealistic in view of the actual operations of the various establishments of an integrated company.

Since censuses of manufactures and of mineral industries were being conducted at the same time for 1972 and 1967, it was possible to check the reasonableness of the values of ores and concentrates transferred from mine and mill to smelter as reported by integrated companies. In a number of instances, the value f.o.b. mine and mills reported on the minerals form exceeded the cost of this material shown as an input on the manufactures report, whereas the latter figure should exceed the mine value by approximately the transportation and handling costs. In such cases, the respondent was queried and more reasonable value and cost figures were obtained. These adjustments usually resulted in increased cost figures on the manufactures report and, consequently, reduced the computed "value added by manufacture."

In addition to the integration of mine and smelter, some companies operate both smelting and refining facilities while some are fully integrated from mine through refinery. The transfer of blister copper to refineries operated by the same company was often reported at other than commercial value for the reasons cited above. However, inasmuch as both the smelter and refinery are classified in the same industry, these estimated value figures do not cause a distortion of "value added" for the industry as a whole. On the other hand, the commodity data on shipments of smelter product and materials data on the consumption of these items are affected. For the copper industry, separate data are shown on page 4 for smelters and for refineries. These data must also be interpreted in the light of these limitations.

While a few companies transfer their refined product to fabricating plants under their own ownership, the effect of transfer values on the total figures is much less in this area. Often, while the refinery and fabricating plants may be under the same general financial control, the organizations are so distinct that the transfer of materials is made on the same basis as a commercial transaction.

For industries 3331 to 3339, toll processing is a particularly important activity and a considerable portion of the metal produced is handled on this basis; i.e., it is processed by the

*Note that the "short title" for this industry is used throughout the report.

smelter or the refinery for the owner of the metal for a fee. The fee may be a money payment or may be a combination of a money payment and a provision that the processing plant keep some of the metal. For both the 1972 and 1967 censuses of manufactures, no distinction was made between the plant's shipments of products produced from its own material and the shipments of metal retained as part of the fee for toll processing. However, separate data were reported for the metal returned to toll customers and for the fees received for toll processing.

Data on the tonnages of metals produced by plants engaged in primary smelting and refining of nonferrous metals are published annually by the Bureau of Mines of the U.S. Department of Interior in its Minerals Yearbook. Minor variations exist between the data shown here and those published by the Bureau of Mines. In addition to minor differences occurring from the submittal of separate reports to different agencies, reasons for the variation are the use by the Bureau of the Census of gross weight as contrasted with metal content by the Bureau of Mines for some metals and adjustments made by the Bureau of Mines for the amount of metal estimated as produced from scrap instead of ores or concentrates.

In general, the same definitions were used by the Bureau of the Census in the collection of product statistics as are used by the Bureau of Mines. In particular, it might be noted that the tonnages of refined lead and copper produced by plants making refined lead and copper directly from ores and concentrates are included in the lead base bullion and blister copper figures to arrive at a balance between the blister copper and refined copper figures and base bullion and refined lead figures. These tonnages have been considered as blister copper and lead base bullion produced and consumed in the same plant.

The production and shipments data shown in table 6A represent total production from materials of both domestic and foreign sources. The production and shipments figures shown for primary smelters and refiners include the production from scrap as well as from primary sources such as ores, concentrates, etc. A measure of the extent of secondary production by primary smelters and refiners is shown in table 7A which contains information on the quantity of scrap consumed. Also, a certain amount of the duplication arises if the data shown in table 6A for unalloyed and alloyed metals are combined in that unalloyed metals are consumed by secondary smelters in producing metal alloys. This duplication can be measured by reference to the quantities of unalloyed metal consumed by secondary plants shown in table 7A.

Data on the production of selected nonferrous metals by industry are presented in table 6A. These production data include quantities produced for sale, for interplant transfer, and for further consumption within the producing plant as

well as toll production. However, the coverage ratios shown in table 5B are based on dollar value of shipments (including transfers to other plants of the company) but exclude the value of nonferrous metals produced and consumed within the same plant, as well as shipments of metals produced for other companies on a toll basis.

The general statistics (employment, payroll, value of shipments, cost of materials, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3331.—PRIMARY COPPER (Short Title)

This industry comprises establishments primarily engaged in smelting copper from the ore and in refining copper by electrolytic or other processes. Establishments primarily engaged in rolling, drawing, or extruding copper are classified in industry 3351 (Copper Rolling and Drawing). For a detailed list of products of industry 3331, refer to table 6A, product codes 33311 11 to 33312 13.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Inasmuch as this industry includes both establishments smelting copper from ore, concentrates, etc., and establishments refining copper by electrolytic or other processes, the total cost of materials and the total value of shipments for this industry include extensive duplication resulting from the use of the products of the smelters as materials for the refiners. Thus, the value of blister copper, which represents an intermediate stage in the production of refined copper, appears twice in the total value of shipments and a corresponding duplication enters into the total cost of materials.

This problem of duplication is largely eliminated by treating smelters and refiners separately and by presenting individual figures for each group. The following table shows separate general statistics—employment, value added, value of shipments, etc.—for the smelters and for the refiners of copper. In order to have the necessary data to prepare this

EXPLANATORY TEXT—Continued

GENERAL STATISTICS FOR PRIMARY COPPER SMELTERS AND REFINERS: 1972 AND 1967

Item	Unit of measure	1972		1967	
		Smelters	Refiners	Smelters	Refiners
Establishments	Number	15	16	15	17
All employees:					
Number	1,000	7.0	10.2	5.0	6.6
Payroll	Mil. dollars ...	72.3	100.9	34.5	46.1
Production and related workers:					
Number	1,000	5.9	8.5	4.0	5.2
Man-hours	Millions	12.0	16.7	7.8	10.3
Wages	Mil. dollars ...	57.9	80.3	25.7	35.3
Value added by manufacturedo	282.4	205.2	130.8	131.8
Cost of materials, fuel, electricity, contract work, and resalesdo	1,172.7	1,120.0	460.2	474.8
Value of shipmentsdo	1,436.7	1,334.3	587.6	596.5

table, where the smelting and refining operations at a single location are distinctly separate stages in the production of the metal, separate reports for smelting and refining departments were obtained. When separate smelting and refining stages are unnecessary, such as in the case with copper produced by leaching and in the case of the production of Lake Superior copper, the establishments have been classified as refiners.

The specialization and coverage ratios for industry 3331 have not been calculated because there is extensive duplication. This duplication is the result of products of some establishments being used as materials by other establishments in the same industry.

Value of shipments and other receipts of the Primary Copper Industry in 1972 totaled \$2,771 million. This included shipments of primary copper (primary products) valued at \$2,336 million, shipments of other products (secondary products) valued at \$277 million, and miscellaneous receipts (mainly contract work on materials owned by others) of \$158 million.

INDUSTRY 3332.—PRIMARY LEAD (Short Title)

This industry comprises establishments primarily engaged in smelting lead from the ore and in refining lead by any process. Establishments primarily engaged in rolling, drawing, or extruding lead are classified in industry 3356 (Nonferrous

Rolling and Drawing, N.E.C.). For a detailed list of products of industry 3332, refer to table 6A, product codes 33321 11 to 33323 41.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

The specialization and coverage ratios for industry 3332 have not been calculated because of extensive duplication. This duplication is the result of products of some establishments being used as materials by other establishments in the same industry.

Value of shipments and other receipts of the Primary Lead Industry in 1972 totaled \$461 million.

INDUSTRY 3333.—PRIMARY ZINC (Short Title)

This industry comprises establishments primarily engaged in smelting zinc from the ore and in refining zinc by any process. Establishments primarily engaged in rolling, drawing, or extruding zinc are classified in industry 3356 (Nonferrous Rolling and Drawing, N.E.C.). For a detailed list of products of industry 3333, refer to table 6A, product codes 33331 11 to 33334 55.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Primary Zinc Industry in 1972 totaled \$376 million. This included shipments of primary zinc (primary products) valued at \$312 million, shipments of other products (secondary products) valued at \$45 million, and miscellaneous receipts of \$19 million.

Shipments of primary zinc (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent. Secondary products shipped by this industry in 1972 consisted mainly of primary nonferrous metals, n.e.c., (\$17 million).

Shipments of primary zinc (primary products) from establishments classified in industry 3333 in 1972 represented 70 percent (coverage ratio) of these products valued at \$447 million shipped by all industries. In 1967, the coverage ratio was 81 percent. Other industries shipping refined zinc consisted mainly of industry 3341, Secondary Nonferrous Metals, (\$110 million).

INDUSTRY 3334.—PRIMARY ALUMINUM (Short Title)

This industry comprises establishments primarily engaged in producing aluminum from alumina and in refining aluminum by any process. Establishments primarily engaged in rolling, drawing, or extruding aluminum are classified in industries 3353 (Aluminum Sheet, Plate, and Foil), 3354 (Aluminum Extruded Products), and 3355 (Aluminum Rolling and Drawing, N.E.C.). For a detailed list of products of industry 3334, refer to table 6A, product codes 33347 11 to 33348 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Primary Aluminum Industry in 1972 totaled \$1,960 million. This included shipments of primary aluminum (primary products) valued at \$1,750 million, shipments of other products (secondary products) valued at \$106 million, and miscellaneous receipts of \$104 million.

Shipments of primary aluminum (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent.

Shipments of primary aluminum (primary products) from establishments classified in industry 3334 in 1972 represented 76 percent (coverage ratio) of these products valued at \$2,291 million shipped by all industries. In 1967, the coverage ratio was 78 percent. Other industries shipping aluminum ingot and extrusion billet consisted mainly of industry 3341, Secondary Nonferrous Metals, (\$351 million).

INDUSTRY 3339.—PRIMARY NONFERROUS METALS, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in smelting and refining nonferrous metals, not elsewhere classified. Establishments primarily engaged in rolling, drawing, and extruding these nonferrous primary metals are classified in industry 3356 (Nonferrous Rolling and Drawing, N.E.C.), and the production of bullion at the site of the mine is classified in the mining industries. For a detailed list of products of industry 3339, refer to table 6A, product codes 33395 25 to 33397 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Primary Nonferrous Metals, N.E.C., Industry in 1972 totaled \$400 million. This included shipments of primary nonferrous metals, n.e.c., (primary products) valued at \$308 million, shipments of other products (secondary products) valued at \$57 million, and miscellaneous receipts (mainly resales) of \$34 million.

Shipments of primary nonferrous metals, n.e.c., (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 87 percent.

Shipments of primary nonferrous metals, n.e.c., (primary products) from establishments classified in industry 3339 in 1972 represented 27 percent (coverage ratio) of these products valued at \$1,126 million shipped by all industries. In 1967, the coverage ratio was 40 percent. Other industries shipping primary nonferrous metals, n.e.c., consisted mainly of industry 3341, Secondary Nonferrous Metals, (\$383 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3339, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 3341.—SECONDARY NONFERROUS METALS (Short Title)

This industry comprises establishments primarily engaged in recovering nonferrous metals and alloys from new and used scrap and dross. This industry includes establishments engaged

in both the recovery and alloying of precious metals. Plants engaged in the recovery of tin through secondary smelting and refining as well as by chemical processes are included in this industry. Establishments primarily engaged in assembling, sorting, and breaking up scrap metal, without smelting and refining, are classified in trade industries. For a detailed list of products of industry 3341, refer to table 6A, product codes 33412 11 to 33418 11.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Secondary Nonferrous Metals Industry in 1972 totaled \$2,097 million. This included shipments of secondary nonferrous metals (primary products) valued at \$1,688 million, shipments of other products (secondary products) valued at \$33 million, and miscellaneous receipts (mainly resales) of \$376 million.

Shipments of secondary nonferrous metals (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent.

While the primary products of the industry represent more than one class of product, the establishments tend to group themselves into "subindustries" represented by each of the different product classes. Approximately 29 percent of the total industry shipments are represented by plants specializing in product class 33412, Secondary copper; and 23 percent in 33417, Aluminum ingot.

Shipments of secondary nonferrous metals (primary products) from establishments classified in industry 3341 in 1972 represented 28 percent (coverage ratio) of these products valued at \$5,922 million shipped by all industries. In 1967, the coverage ratio was 26 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3341, these establishments accounted for 11 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3331	Industry 3332	Industry 3333	Industry 3334	Industry 3339	Industry 3341
1972.....	11	12	10	12	32	325
1967.....	11	10	11	8	41	351
1963.....	13	6	11	7	32	406

(NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²The value of shipments and cost of materials for this industry include substantial duplication; therefore, specialization and coverage ratios were not calculated.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee	Assets per employee	Production worker as percent of total employment	Annual man-hours of production workers	Average hourly earnings of production workers	Cost of materials per dollar of shipments	Cost of materials and payrolls per dollar shipments	Assets per dollar of shipments	Value added per employee	Payrolls as percent of value added	Value added per man-hour of production worker
	(dollars)	(dollars)	(percent)	(number)	(dollars)	(dollars)	(dollars)	(dollars)	(dollars)	(percent)	(dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (2) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F
		A	B	C	D	E	F	G	H	I

(D) Withheld to avoid disclosing figures for individual companies.

¹Specialization and coverage ratios have not been calculated for industries 3331, Primary Copper, and 3332, Primary Lead, because the shipments of primary products for these industries contain extensive duplication.

²Included in this industry is refined zinc which is also primary to industry 3341, Secondary Nonferrous Metals. A coverage ratio for 1972 computed on the basis of including both industries to which refined zinc is primary would total 96 percent: 70 percent by industry 3333 and 26 percent by industry 3341. The remainder was shipped by establishments in other industries. The comparable 1967 percentages are as follows: Total, 96 percent; 81 percent in SIC 3333; and 15 percent in SIC 3341. The remainder was shipped by establishments in other industries.

³Included in this industry are aluminum-base alloys which are also primary to industry 3341, Secondary Nonferrous Metals, and industries 3353, Aluminum Sheet, Plate, and Foil; 3354, Aluminum Extruded Products; and 3355, Aluminum Rolling and Drawing, N.E.C. A coverage ratio for 1972 computed on the basis of including all five industries to which aluminum-base alloys are primary would total 98 percent: 76 percent by industry 3334, 15 percent by industry 3341, and 7 percent by industries 3353, 3354, and 3355. The remainder was shipped by establishments in other industries. The comparable 1967 percentages are as follows: Total, 99 percent; 78 percent in SIC 3334; 17 percent in SIC 3341; and 4 percent in 1967 SIC 3352.

⁴Included in this industry are refined nonferrous alloys, n.e.c., which are also primary to industry 3341, Secondary Nonferrous Metals. A coverage ratio computed on the basis of including both industries to which nonferrous alloys, n.e.c., are primary would total 61 percent: 27 percent by industry 3339 and 34 percent by industry 3341. The remaining 39 percent was shipped by establishments classified in other industries. The comparable 1967 percentages are as follows: Total, 68 percent; 40 percent in SIC 3339; and 28 percent in SIC 3341. The remaining 32 percent was shipped by establishments classified in other industries.

⁵Included in this industry are refined copper, lead, zinc, aluminum, precious metals, and other nonferrous metals. Each of these product classes is also primary to the comparable primary smelting and refining industry in SIC group 333. A coverage ratio computed on the basis of including both industries to which the classes are primary would total 94 percent: 28 percent by industry 3341 and 66 percent by primary nonferrous smelters and refiners. The remaining 6 percent was shipped by establishments in other industries. The comparable 1967 percentages are as follows: Total, 89 percent; 26 percent in SIC 3341; and 63 percent in primary nonferrous smelters and refiners. The remaining 11 percent was shipped by establishments in other industries.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Primary copper (SIC 3331)	Primary lead (SIC 3332)	Primary zinc (SIC 3333)	Primary aluminum (SIC 3334)	Primary nonferrous metals, n.e.c. (SIC 3339)	Secondary nonferrous metals (SIC 3341)	Other industries

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹Includes toll production.

²Includes shipments of these products produced on a toll basis by others. Where data are shown separately for the various industries producing these products, such shipments are included in the industry for the establishment owning the material. However, production data are included in the industry of the toll producer.

³Includes shipments to other smelters and refiners, shipments to consumers, and to some nonmanufacturing companies which sell directly to consumers.

⁴Most of the aluminum ingot and billet (alloys) produced by aluminum rolling mills represent duplication of tonnages reported by the Primary Aluminum Industry (3334), in that the metal produced by the rolling mills is made from ingot produced in primary aluminum plants.

⁵Represents cathodes, wire bass, ingots, shot, etc.

⁶Includes all ASTM specification zinc.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

(Footnotes for table 6B)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments: 1958, 1963, 1967 to 1972

(In millions of dollars)

33416	Made in secondary nonferrous metals (industry 3341 and all other industries).....								

- Represents zero. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Some or all of the products primary to this industry are also primary to one other industry or more. The 1-digit product-group totals exclude the values produced by the other primary industries, and, therefore, are not comparable to product-group (4-digits) and product-class (5 digits) totals shown in table 6A and table 6B, respectively.

³Unspecified amount of copper, lead, aluminum, and other primary nonferrous metals are included in n.s.k. product code 33390.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

(See appendix, Explanation of Terms)

976000	Materials, parts, components, and supplies, n.s.k. ⁵		(X)	159.5	(X)	104.2

(X) Not applicable. (NA) Not available.

¹Establishments were instructed to include in their reports the quantity and cost of purchased materials which they processed or furnished to others for toll processing, but to exclude materials processed on a toll basis for others. Accordingly, the data shown in this table exclude considerable quantities of materials consumed by establishments in this industry in the production of products shown in table 6A.

²The cost of materials for this industry includes extensive duplication. This duplication arises because the products of some establishments are used as materials by other establishments in the same industry.

³Excludes materials consumed by establishments producing copper by leaching or from Lake Superior ores as no distinct blister stage exists in the production at these establishments.

⁴Included with material code 970099, "All other materials and components, parts, containers, and supplies consumed," to avoid disclosing figures for individual companies.

⁵This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.

EXPLANATORY TEXT

NONFERROUS METAL MILLS AND MISCELLANEOUS PRIMARY METAL PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3351—Rolling, Drawing, and Extruding of Copper*
- 3353—Aluminum Sheet, Plate, and Foil
- 3354—Aluminum Extruded Products
- 3355—Aluminum Rolling and Drawing, N.E.C.
- 3356—Rolling, Drawing, and Extruding of Nonferrous Metals, Except Copper and Aluminum*
- 3357—Drawing and Insulating of Nonferrous Wire*
- 3398—Metal Heat Treating
- 3399—Primary Metal Products, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3351.—COPPER ROLLING AND DRAWING (Short Title)

This industry comprises establishments primarily engaged in rolling, drawing, and extruding copper, brass, bronze, and other copper base alloy basic shapes, such as plate, sheet, strip, bar, and tubing. Establishments primarily engaged in recovering copper and its alloys from scrap or dross are classified in

industry 3341 (Secondary Smelting and Refining of Nonferrous Metals).

This industry includes a variety of operations ranging from rod, wire, tube, and flat product mills to machine shop and fabricating activities. Accordingly, in order to provide a measure of the relative importance of these departments, data were collected on man-hours worked and production-worker wages paid for each of several departments.

Also, based on the data reported for these various departmental operations, it was possible to further classify the establishments of this industry into two "subindustries"; i.e., establishments with casting facilities and establishments without casting facilities.

Separate data are shown for these subindustries in tables 1A, 2, 4, and 5A. For a detailed list of products of industry 3351, refer to table 6A, product codes 33511 11 to 33515 38.

The 1972 definition of this industry is the same as that used in the 1967 classification system.

Value of shipments and other receipts of the Copper Rolling and Drawing Industry in 1972 totaled \$3,097 million. This included shipments of copper rolling and drawing (primary products) valued at \$2,630 million, shipments of other products (secondary products) valued at \$339 million, and miscellaneous receipts (mainly cost of resales) of \$128 million.

Shipments of copper rolling and drawing (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of industry 3341, Secondary Nonferrous Metals, (\$50 to \$100 million).

Shipments of copper rolling and drawing (primary products) from establishments classified in industry 3351 in 1972 represented 93 percent (coverage ratio) of these products valued at \$2,825 million shipped by all industries. In 1967, the coverage ratio was also 93 percent. Other industries shipping copper rolling and drawing consisted mainly of industry 3357, Nonferrous Wire Drawing and Insulating, (\$124 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3351, these establishments accounted for less than 1 percent of value of shipments.

*Note that the "short title" for this industry is used throughout the report.

INDUSTRY 3353.—ALUMINUM SHEET, PLATE, AND FOIL

This industry comprises establishments primarily engaged in flat rolling aluminum and aluminum base alloy basic shapes such as sheet, plate, and foil, including establishments producing welded tube. Also included are establishments primarily producing similar products by continuous casting.

Companies with establishments classified in this industry were queried as to whether or not the company also operated aluminum reduction facilities. Based on this inquiry, it was possible to further classify the establishments into two "subindustries"; i.e., establishments with melting facilities and establishments without melting facilities.

Separate data are shown for the subindustries of this industry in tables 1A, 4, and 5A. For a detailed list of products of industry 3353, refer to table 6A, product codes 33531 13 to 33534 55.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual and a new SIC number and title have been assigned. Industry 3352, Rolling, Drawing, and Extruding of Aluminum, was split into three industries: 3353, Aluminum Sheet, Plate, and Foil; industry 3354, Aluminum Extruded Products; and industry 3355, Aluminum Rolling and Drawing, N.E.C.

Value of shipments and other receipts of the Aluminum Sheet, Plate, and Foil Industry in 1972 totaled \$2,688 million. This included shipments of aluminum sheet, plate, and foil (primary products) valued at \$2,215 million, shipments of other products (secondary products) valued at \$390 million, and miscellaneous receipts (mainly cost of resales) of \$84 million.

Shipments of aluminum sheet, plate, and foil (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of industry 3497, Metal Foil and Leaf, (\$169 million).

Shipments of aluminum sheet, plate, and foil (primary products) from establishments classified in industry 3353 in 1972 represented 99 percent (coverage ratio) of these products valued at \$2,238 million shipped by all industries. Other industries shipping aluminum sheet, plate, and foil consisted mainly of industry 3354, Aluminum Extruded Products, (\$10 to \$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed

from industry averages. For industry 3353, these establishments accounted for 0 percent of value of shipments.

INDUSTRY 3354.—ALUMINUM EXTRUDED PRODUCTS

This industry comprises establishments primarily engaged in extruding aluminum and aluminum base alloy basic shapes such as rod and bar, pipe and tube, and tube blooms, including establishments producing tube by drawing.

Companies with establishments classified in this industry were queried as to whether or not the company also operated aluminum reduction facilities. Based on this inquiry, it was possible to further classify the establishments into two "subindustries"; establishments with melting facilities and establishments without melting facilities.

Separate data are shown for the subindustries of this industry in tables 1A, 4, and 5A. For a detailed list of products of industry 3354, refer to table 6A, product codes 33541 15 to 33542 53.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual and a new SIC number and title have been assigned. Industry 3352, Rolling, Drawing, and Extruding of Aluminum, was split into three industries: 3353, Aluminum Sheet, Plate, and Foil; industry 3354, Aluminum Extruded Products; and industry 3355, Aluminum Rolling and Drawing, N.E.C.

Value of shipments and other receipts of the Aluminum Extruded Products Industry in 1972 totaled \$1,078 million. This included shipments of aluminum extruded products (primary products) valued at \$903 million, shipments of other products (secondary products) valued at \$149 million, and miscellaneous receipts of \$27 million.

Shipments of aluminum extruded products (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of industry 3442, Metal Doors, Sash, and Trim, (\$40 million).

Shipments of aluminum extruded products (primary products) from establishments classified in industry 3354 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,026 million shipped by all industries. Other industries shipping aluminum extruded products consisted mainly of industry 3353, Aluminum Sheet, Plate, and Foil; and industry 3355, Aluminum Rolling and Drawing, N.E.C., (\$10 to \$20 million each).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and

sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3354, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3355.—ALUMINUM ROLLING AND DRAWING, N.E.C.

This industry comprises establishments primarily engaged in rolling, drawing, and other operations resulting in the production of aluminum ingot, including extrusion ingot, and aluminum and aluminum base alloy basic shapes, not elsewhere classified, such as rolled and continuous cast rod and bar. Establishments primarily engaged in producing aluminum powder, flake, and paste are classified in industry 3399, and those producing aluminum wire and cable from purchased wire bars, rods, or wire are classified in industry 3357.

Companies with establishments classified in industry 3355 were queried as to whether or not the company also operated aluminum reduction facilities. Based on this inquiry, it was possible to further classify the establishments into two "subindustries"; i.e., establishments with melting facilities and establishments without melting facilities. Subindustry data were suppressed, however, to avoid disclosure for individual companies. For a detailed list of products of industry 3355, refer to table 6A, product codes 33551 11 to 33554 11.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual and a new SIC number and title have been assigned. Industry 3352, Rolling, Drawing, and Extruding of Aluminum, was split into three industries: 3353, Aluminum Sheet, Plate, and Foil; industry 3354, Aluminum Extruded Products; and industry 3355, Aluminum Rolling and Drawing, N.E.C.

Value of shipments and other receipts of the Aluminum Rolling and Drawing, N.E.C., Industry in 1972 totaled \$343 million. This included shipments of aluminum rolling and drawing, n.e.c., (primary products) valued at \$287 million, shipments of other products (secondary products) valued at \$46 million, and miscellaneous receipts of \$11 million.

Shipments of aluminum rolling and drawing, n.e.c., (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of industry 3354, Aluminum Extruded Products, (\$10 to \$20 million).

Shipments of aluminum rolling and drawing, n.e.c., (primary products) from establishments classified in industry 3355 in 1972 represented 42 percent (coverage ratio) of these products valued at \$687 million shipped by all industries. Other industries shipping aluminum rolling and drawing, n.e.c.,

consisted mainly of industry 3334, Primary Aluminum, (\$50 to \$100 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3355, these establishments accounted for 0 percent of value of shipments.

INDUSTRY 3356.—NONFERROUS ROLLING AND DRAWING, N.E.C. (Short Title)

This industry comprises establishments primarily engaged in rolling, drawing, and extruding nonferrous metals other than copper (industry 3351) and aluminum (industries 3353, 3354, and 3355). The products of this industry are produced in the form of basic shapes such as plate, sheet, strip, bar, and tubing. Establishments primarily engaged in recovering nonferrous metals and alloys from scrap or dross are classified in industry 3341 (Secondary Smelting and Refining of Nonferrous Metals); in manufacturing gold, silver, tin, and other foils except aluminum, in industry 3497 (Metal Foil and Leaf); and aluminum foil in industry 3353.

For a detailed list of products of industry 3356, refer to table 6A, product codes 33561 61 to 33569 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system.

Value of shipments and other receipts of the Nonferrous Rolling and Drawing, N.E.C., Industry in 1972 totaled \$1,245 million. This included shipments of nonferrous rolling and drawing, n.e.c., (primary products) valued at \$990 million, shipments of other products (secondary products) valued at \$192 million, and miscellaneous receipts (mainly cost of resales) of \$63 million.

Shipments of nonferrous rolling and drawing, n.e.c., (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 89 percent. Secondary products shipped by this industry in 1972 consisted mainly of industry 3339, Primary Nonferrous Metals, N.E.C., (\$50 to \$100 million).

Shipments of nonferrous rolling and drawing, n.e.c., (primary products) from establishments classified in industry 3356 in 1972 represented 87 percent (coverage ratio) of these products valued at \$1,135 million shipped by all industries. In 1967, the coverage ratio was 84 percent. Other industries shipping nonferrous rolling and drawing, n.e.c., consisted

mainly of industry 3357, Nonferrous Wiredrawing and Insulating, (\$40 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3356, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3357.—NONFERROUS WIREDRAWING AND INSULATING (Short Title)

This industry comprises establishments primarily engaged in drawing, drawing and insulating, and insulating wire and cable of nonferrous metals from purchased wire bars, rods, or wire.

Based on the data reported for various departmental operations, it was possible to classify the establishments into four "subindustries"; i.e., establishments with wiredrawing department and rod mill, establishments with wiredrawing department with neither a rod mill nor an insulating department, establishments with wiredrawing and insulating departments but without rod mill, and establishments without a wiredrawing department.

The subindustry data shown in tables 1A, 4, and 5A, are based on this system of classification. For a detailed list of products of industry 3357, refer to table 6A, product codes 33571 11 to 33579 00.

The 1972 definition of this industry is the same as that used in the 1967 classification system.

Value of shipments and other receipts of the Nonferrous Wiredrawing and Insulating Industry in 1972 totaled \$4,411 million. This included shipments of nonferrous wiredrawing and insulating (primary products) valued at \$4,002 million, shipments of other products (secondary products) valued at \$254 million, and miscellaneous receipts of \$155 million.

Shipments of nonferrous wiredrawing and insulating (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of industry 3661, Telephone and Telegraph Apparatus (\$20 to \$50 million).

Shipments of nonferrous wiredrawing and insulating (primary products) from establishments classified in industry 3357 in 1972 represented 89 percent (coverage ratio) of these products valued at \$4,500 million shipped by all industries. In 1967, the coverage ratio was also 89 percent. Other industries

shipping nonferrous wiredrawing and insulating consisted mainly of industry 3341, Secondary Nonferrous Metals, and industry 3643, Current-Carrying Wiring Devices (\$50 to \$100 million each).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3357, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3398.—METAL HEAT TREATING

This industry comprises establishments primarily engaged in heat treating of metal for the trade. For a detailed list of products of industry 3398, refer to table 6A, product code 33980 11.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual and a new SIC number and title have been assigned. Industry 3399, Primary Metal Products, N.E.C., was split into two industries: 3398, Metal Heat Treating, and industry 3399, Primary Metal Products, N.E.C.

Value of shipments and other receipts of the Metal Heat Treating Industry in 1972 totaled \$472 million. This included shipments of metal heat treating (primary products) valued at \$463 million, shipments of other products (secondary products) valued at \$8 million, and miscellaneous receipts of \$1 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3398, these establishments accounted for 14 percent of value of shipments.

INDUSTRY 3399.—PRIMARY METAL PRODUCTS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing primary metal products, not elsewhere classified, such as nonferrous nails, brads, and spikes, and metal

EXPLANATORY TEXT—Continued

powder, flakes, and paste. For a detailed list of products of industry 3399, refer to table 6A, product codes 33991 11 to 33992 98.

The 1972 definition of this industry has been revised from that used in the 1967 SIC manual and a new SIC number and title have been assigned. Industry 3399, Primary Metal Products, N.E.C., was split into two industries: 3398, Metal Heat Treating, and industry 3399, Primary Metal Products, N.E.C.

Value of shipments and other receipts of the Primary Metal Products, N.E.C., Industry in 1972 totaled \$347 million. This included shipments of primary metal products, n.e.c., (primary products) valued at \$307 million, shipments of other products (secondary products) valued at \$28 million, and miscellaneous receipts (mainly cost of resales) of \$12 million.

Shipments of primary metal products, n.e.c., (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in

1972 consisted mainly of industry 3398, Metal Heat Treating, (\$9 million).

Shipments of primary metal products, n.e.c., (primary products) from establishments classified in industry 3399 in 1972 represented 74 percent (coverage ratio) of these products valued at \$416 million shipped by all industries. Other industries shipping primary metal products, n.e.c., consisted mainly of industry 3545, Machine Tool Accessories, and industry 3694, Engine Electrical Equipment, (\$20 to \$50 million each).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3399, these establishments accounted for 0 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 industry	1972 industry	1972 industry	1972 industry	1967 industry	1972 industry	1972 industry	1972 industry	1972 industry	1967 industry
	3351	3353	3354	3355	3352	3356	3357	3398	3399	3399
1972.....	101	25	133	14	172	136	206	886	128	1,014
1967.....	86	(X)	(X)	(X)	155	115	206	(X)	(X)	868
1963.....	81	(X)	(X)	(X)	166	(NA)	210	(X)	(X)	695

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²Separate data were published in the 1963 Census of Manufactures for these three subindustries. However, it was subsequently determined that significant errors in classification had been made. These errors did not affect data for establishments with wire insulating establishments with neither rod mill nor wiredrawing departments.

³Relationships are not meaningful because of the predominance of receipts for contract and commission work on materials owned by others. Such receipts are treated as primary products for this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

¹The proportion of product shipments (both primary and secondary) of the industry represented by primary products.²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.³Relationships are not meaningful because of the predominance of receipts for contract and commission work on materials owned by others. Such receipts are treated as primary products for this industry.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons: e.g., to avoid disclosure of individual company data.

See footnote at end of table.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C (percent)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F (percent)
		A	B	C	D	E	F	G	H	I
3351	Copper rolling and drawing.....1972..	3,096.6	2,629.5	339.1	128.0	89	2,825.0	2,629.5	195.5	93

(NA) Not available.

¹Included in this industry is aluminum and aluminum-base alloy wire (including ACSR) which is also primary to industry 3357, Nonferrous Wiredrawing and Insulating. A coverage ratio computed on the basis of including both industries to which aluminum and aluminum-base alloy wire (including ACSR) is primary in 1972 would total 65 percent: 42 percent by industry 3355 and 23 percent by industry 3357. The remaining 35 percent was shipped by establishments in other industries. For 1967, the comparable percentages were 95 percent: 89 percent by 1967 industry 3352 and 6 percent by industry 3357. The remaining 5 percent was shipped by establishments in other industries.

²Included in this industry is "other nonferrous metal wire" which is also primary to industry 3357, Nonferrous Wiredrawing and Insulating. A coverage ratio computed on the basis of including both industries to which nonferrous metal wire is primary in 1972 would total 91 percent: 87 percent by industry 3356 and 4 percent by industry 3357. The remaining 9 percent was shipped by establishments in other industries. For 1967, the comparable percentages were 88 percent: 84 percent by industry 3356 and 4 percent by industry 3357. The remaining 12 percent was shipped by establishments in other industries.

³Included in this industry are aluminum and aluminum-based alloy wire (including ACSR), other nonferrous metal wire, nonferrous woven wire products, and appliance wire and cord and flexible cord sets which are also primary, respectively, to industries 3355, Aluminum Rolling and Drawing, N.E.C.; 3356, Nonferrous Rolling and Drawing, N.E.C.; 3496, Miscellaneous Fabricated Wire Products; and 3699, Electrical Equipment and Supplies, N.E.C. A coverage ratio computed on the basis of including the industries to which these products are primary in 1972 would total 92 percent: 89 percent by industry 3357 and 3 percent by industries 3355, 3356, 3496, and 3699. The remaining 8 percent was shipped by establishments in other industries. For 1967, the comparable percentages were 94 percent: 89 percent by industry 3357 and 5 percent by industries 3356, 3496, 3699, and 1967 industry 3352. The remaining 6 percent was shipped by establishments in other industries.

⁴Specialization ratio is not meaningful because of the predominance of receipts for contract and commission work on materials owned by others. Receipts are treated as primary products for this industry.

⁵Data on receipts for metal heat treating are not available for establishments classified outside industry 3398.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

	3694 Engine electrical equipment.....	(2-5)		3624 Carbon and graphite products.....	(2-5)						
				3694 Engine electrical equipment.....	(20-50)						

Note: Data shown parenthetically are ranges expressed in millions of dollars.

- Represents zero. (X) Not applicable.

¹Includes total for product class 34965, nonferrous wire cloth and other woven nonferrous wire products, which is primary to industry 3357.

²Includes total for product class 36996, appliance wire and cord and flexible cord sets, which is primary to industry 3357.

³Data on receipts for metal heat treating are not available for establishments classified outside industry 3398.

TABLE 6A-1. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

33991 33	Copper and copper-base alloy ²²	do.....	²³ 24.7	36.7	²³ 24.5	31.1
33991 55	Iron and steel.....	do.....	²⁴ 170.7	60.5	²⁴ 130.6	37.4
33991 98	Other nonferrous powders.....		(X)	112.2	(X)	59.4
33991 00	Metal powders and paste, not specified by type.....		(X)	26.8	(X)	15.6
33992 --	Other primary metal products, including nonferrous nails, brads, spikes, and staples.....		(X)	93.8	(X)	43.1
33992 11	Nonferrous nails, brads, tacks, and staples.....	1,000 s. tons.	7.9	9.7	7.8	7.6
33992 98	Other primary metal products, n.e.c.....		(X)	81.3	(X)	35.5
33992 00	Primary metal products, n.s.k.....		(X)	2.8	(X)	

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹Includes toll production.

²Includes shipments of these products produced on a toll basis by others.

³Data are also shown in Current Industrial Report series BDSAF-84, Shipments of Copper-Base Mill and Foundry Products.

⁴The product class structure for this industry has been revised from that used in the 1971 Annual Survey of Manufactures and prior years.

⁵Data are also published in Current Industrial Reports series M33-2, Aluminum Ingot and Mill Products.

⁶Differs from quantity data published in Current Industrial Reports series M33-2, Aluminum Ingot and Mill Products, in that no data are included in the plain aluminum foil figures for that quantity of plain foil which is produced and converted in the same establishment. As shown in the Current Industrial Reports, net shipments of aluminum foil totaled 336.6 short tons in 1972 and 224.7 short tons in 1967.

⁷These figures also include values not specified by kind for new industries 3353, Aluminum Sheet, Plate, and Foil, and 3355, Aluminum Rolling and Drawing, N.E.C.

⁸Represents aluminum ingot and extrusion billet made only by establishments classified in industry 3355, Aluminum Rolling and Drawing, N.E.C. Comparable shipments for plants classified in industries 3334, Primary Aluminum, and 3341, Secondary Nonferrous Metals, and other industries are as follows:

Item	Total shipments		Other companies		Interplant transfers	
	Quantity	Value	Quantity	Value	Quantity	Value
	(1,000 s. tons)	(million dollars)	(1,000 s. tons)	(million dollars)	(1,000 s. tons)	(million dollars)
1972						
Aluminum ingot:						
Industry 3334.....	3,241.4	1,509.7	1,362.6	627.5	1,878.8	882.2
Industry 3341 and other industries...	678.5	341.0	(NA)	(NA)	(NA)	(NA)
Aluminum extrusion billet:						
Industry 3334.....	531.8	244.8	333.0	155.7	198.8	89.1
Industry 3341 and other industries...	49.8	28.0	(NA)	(NA)	(NA)	(NA)
1967						
Aluminum ingot:						
Industry 3334.....	2,771.5	1,324.1	1,162.6	579.0	1,598.9	745.1
Industry 3341 and other industries...	663.5	302.8	(NA)	(NA)	(NA)	(NA)
Aluminum extrusion billet:						
Industry 3334.....	464.0	211.4	301.1	106.2	162.9	95.2
Industry 3341 and other industries...	84.9	39.3	(NA)	(NA)	(NA)	(NA)

⁹Most of the aluminum ingot and billet (alloys) produced by aluminum rolling mills represent duplication of tonnages reported by the primary aluminum industry in that metal produced by the rolling mills is made from ingot produced in primary aluminum plants.

¹⁰Data are also published in Current Industrial Reports series, BDSAF-263, Titanium Ingot and Mill Products.

¹¹Data are also published in Current Industrial Reports series M-33G, Magnesium Mill Products.

¹²Includes \$37.4 million produced in industry 3357, Nonferrous Wiredrawing and Insulating.

¹³Data on copper-base alloy flat products are included with copper-base alloy pipe and tubes to avoid disclosing operations of individual companies.

¹⁴See 1972 product codes 33532 26 and 33532 33 for full description of these products.

¹⁵Includes \$32.1 million produced in industry 3357, Nonferrous Wiredrawing and Insulating.

¹⁶See table 6A-2 for detailed product data.

¹⁷In the Current Industrial Report series, coverage includes all known establishments classified in industry 3357, but is limited to the 50 largest companies fabricating appliance wire and cord and flexible cord sets from purchased insulated wire (industry 3699 and other industries).

Footnotes continued on next page.

TABLE 6A-1. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A-1)--Continued

¹⁶Value consists principally of receipts for work done on materials owned by others. The value represents only work done by establishments classified in industry 3398.

¹⁹These figures for 1972 and 1967 include shipments not specified by kind for both industries 3398 and 3399. Because of a change in the 1972 SIC definitions for these industries, it cannot be determined what portion of these totals should have been allocated to each industry separately.

²⁰Monthly figures are also shown in Current Industrial Reports series M33-2, Aluminum Ingot and Mill Products.

²¹Represents aluminum content.

²²Quarterly figures are also shown in Current Industrial Reports series BDCF-84, Shipments of Copper-Base Mill and Foundry Products.

²³Represents copper content.

²⁴Represents iron content.

TABLE 6A-2. Quantity and Value of Shipments of Insulated Wire and Cable: 1972 and 1967

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

See footnotes at end of table.

TABLE 6A-2. Quantity and Value of Shipments of Insulated Wire and Cable: 1972 and 1967—Continued

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

1972 product code	Product	Total product shipments including interplant transfers			Shipments to other companies		Transfers to other plants of same company		
		Quantity (1,000 lb.)			Value (\$1,000)	Quantity (1,000 lb. gross weight)	Value (\$1,000)	Quantity (1,000 lb. gross weight)	Value (\$1,000)
		Gross weight	Copper content	Aluminum content					
		1967

33576 29 36996 29	Other appliance wire and cord.....		⁸ 16,987		⁸ 27,939				

- Represents zero. (X) Not applicable. (D) Withheld to avoid disclosing figures for individual companies. (S) Withheld because the data did not meet publication standards. Revised by 5 percent or more from previously published figure.

¹Includes estimates for quantities not reported. The estimates amounted to less than 2 percent of these totals.

²Switchboard wire and cable and telephone cord sets and cordage are included with product code 33574 98 to avoid disclosing operations of individual companies.

³Aluminum content data are available for individual products (7-digit) only for those products in product classes 33578, power wire and cable, and 33579, other insulated or covered wire and cable. For other product classes, aluminum content figures were collected only at product class (5-digit) level.

⁴Data for product codes 33578 18, 33578 31, and 33578 32 are included with product codes 33578 33, 33578 51, 33578 53, 33578 61, 33578 63, 33578 65, and 33578 38.

⁵Data are limited to shipments by all known establishments which insulate wire or cable and establishments operated by the 50 largest producers of appliance wire and cord and flexible cord sets from purchased insulated wire (as measured by dollar value of shipments in 1963). However, the under-coverage of such wire and cord sets is probably less than 3 percent at the product class level.

⁶Data for product codes 33579 39 to 33579 46 are included with codes 33579 49 to 33579 91.

⁷Electronic lead-in and hook-up wire are included with paper and pulp, polyethylene insulated, switchboard and other communications wire and cable, to avoid disclosing operations of individual companies.

⁸Cotton braided flexible cord sets, including heater cord sets, are included with "other appliance wire and cord" to avoid disclosing operations of individual companies.

Source: Current Industrial Reports series MA-33L, Insulated Wire and Cable.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

			California.....	CC	(NA)

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

¹This State or division was not shown as a separate line in table 6B in the 1967 report for this industry.

- Represents zero. (NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²Includes shipments of laminated foil produced in foil mills. In 1958, these shipments were valued at \$36,787 thousand. In 1963 and later years, this product is included in product class 34970.

³Some or all of the products primary to this industry are also primary to one or more other industries. The 4-digit product-group totals exclude the values produced by the other primary industries, and, therefore, are not comparable to product-group (4-digits) and product-class (5-digits) totals shown in table 6A-1 and table 6B, respectively.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹Data exclude tonnages of copper materials processed on a toll basis. Most of the material involved in toll processing is owned by establishments classified in other industries, principally industry 3357, Nonferrous Wiredrawing and Insulating. As table 6A-1 shows, unalloyed copper rod, bar, and shapes (product code 33513 11) is, by far, the most important mill product on a toll basis.²Includes cost for materials indicated by the symbol (D).³This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.⁴Data exclude tonnages of nonferrous materials processed on a toll basis.⁵Excludes quantities produced and consumed in the same establishment.

Note: Subindustry data for industry 3355, Aluminum Rolling and Drawing, N.E.C., was collected for 1972 but is withheld to avoid disclosing figures for individual companies.

- Represents zero. (D) Withheld to avoid disclosing operations for individual companies.

¹No comparable 1967 data exists for department operations in this industry.

²This figure represents unreported man-hours and worker wages for numerous non-integrated establishments which failed to report in other departments. 1972 is the first year this data has been collected for establishments with and without melting facilities.

MAJOR GROUP 34

Fabricated Metal Products

- 34A Metal cans, cutlery, handtools, and general hardware
- 34B Heating apparatus, except electric and warm air furnaces, and plumbing fixtures
- 34C Fabricated structural metal products
- 34D Screw machine products, fasteners and washers; metal forgings and stampings; and metal services
- 34E Ordnance and accessories, n.e.c.
- 34F Miscellaneous fabricated metal products

This major group includes establishments engaged in fabricating ferrous and nonferrous metal products such as metal cans, tinware, handtools, cutlery, general hardware, nonelectric heating apparatus, fabricated structural metal products, metal forgings, metal stampings, ordnance (except vehicles and guided missiles), and a variety of metal and wire products not elsewhere classified. Certain important segments of the metal fabricating industries are classified in other major groups, such as machinery in Major Groups 35 and 36; transportation equipment, including tanks, in Major Group 37; professional scientific and controlling instruments, watches, and clocks in Major Group 38; and jewelry and silverware in Major Group 39. Establishments primarily engaged in producing ferrous and nonferrous metals and their alloys are classified in Major Group 33.

TABLE 1. General Statistics: 1972 and Earlier Years

(X) Not applicable. (NA) Not available.

¹The figures for 1939 through 1972 include data for employees of manufacturing establishments who were engaged in distribution and construction work. The extent to which data for such employees are included in the figures for earlier years is not known.

²For the period 1954 to 1972, figures represent adjusted value added by manufacture and for earlier years, unadjusted value added. Adjusted value added is equal to value of shipments (including resales of finished products) less cost of finished products, materials, supplies, fuel, electric energy, and contract work, plus the net change in the value of finished products and work-in-process inventories between the beginning and end of the year, without adjustment for price changes. Unadjusted value added is equal to value of products (excluding resales of finished products) less cost of materials, supplies, fuel, electric energy, and contract work; no adjustment is made for changes in inventories of finished products and work-in-process during the year. For 1921 to 1933, cost of contract work was not subtracted from value of products in calculating value added by manufacture. See "Value Added by Manufacture" in Introduction.

³The value of shipments and cost of materials for industry groups (2- and 3-digit) include extensive duplication arising from shipments between establishments in the same industry. For a more complete explanation, see Introduction.

⁴The figures for 1958 to 1972 include expenditures for plants under construction and not yet in operation.

⁵Data for 1972 are not directly comparable to 1971 and earlier years. See appendix C of the General Summary for the 1972 changes in the Standard Industrial Classification.

⁶In addition to data for operating establishments, figures for employment and payroll for manufacturing central administrative office and auxiliary units are shown for the years 1949 to 1953 in the annual survey of manufactures volumes. Data for these years are not available for the years 1955 to 1957, 1959 to 1962, 1964 to 1966, 1968 to 1971, and prior to 1949.

⁷These figures represent estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures. These estimates, consequently, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the annual survey of manufactures volumes for this period.

⁸The figures for 1939 to 1971 are not entirely comparable with those for 1937 because the 1937 figures exclude data for establishments primarily engaged in producing lawn sprinklers, spun ware, nonferrous metal novelties, tackle blocks, aluminum ornamental work, aluminum stampings, and machine knives (except metalworking) and include data for establishments primarily engaged in making caulking guns, toilet seats, brooders, cast aluminum cooking ware, and hair clippers. Value added for 1939 on a basis strictly comparable with 1937 was \$1,340.4 million.

⁹The figures for 1935 and earlier years are not sufficiently comparable with those for 1937 to 1972 to be shown in this table, principally because of the inclusion in earlier years of data for establishments primarily engaged in the manufacture of valves and fittings, except plumbers', and the exclusion of data for establishments primarily engaged in the manufacture of stamped, pressed, and spun aluminum ware.

EXPLANATORY TEXT

METAL CANS, CUTLERY, HANDTOOLS AND GENERAL HARDWARE

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3411—Metal Cans
- 3412—Metal Shipping Barrels, Drums, Kegs and Pails*
- 3421—Cutlery
- 3423—Hand and Edge Tools, Except Machine Tools and Handsaws*
- 3425—Handsaws and Saw Blades
- 3429—Hardware, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3411.—METAL CANS

This industry comprises establishments primarily engaged in manufacturing metal cans from purchased materials. Establishments primarily engaged in manufacturing foil containers are classified in industry 3497. For a detailed list of products of industry 3411, refer to table 6A-1, product codes 34111 10 to 34112 00.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

*Note that the "short title" for this industry is used throughout the report.

Value of shipments and other receipts of the Metal Cans Industry in 1972 totaled \$4,511 million. This included shipments of metal cans (primary products) valued at \$4,181 million, shipments of other products (secondary products) valued at \$152 million, and miscellaneous receipts (mainly resales) of \$178 million.

Shipments of metal cans (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 90 percent. Secondary products shipped by this industry in 1972 consisted mainly of fiber cans, drums, and similar products (\$46 million).

Shipments of metal cans (primary products) from establishments classified in industry 3411 in 1972 represented 99 percent (coverage ratio) of these products valued at \$4,224 million shipped by all industries. In 1967, the coverage ratio was 98 percent.

Detailed figures on the shipments of metal cans are collected on a monthly basis by the Bureau of the Census on Form M34D. Table 6A-1 shows totals for the data collected in the monthly survey and in the census of manufactures for the same period. Both the census of manufactures data for industry 3411 and the monthly survey include data for "captive" production; that is, the production of cans for use by the producing company. Most of these "captive" establishments are part of food, petroleum, and paint companies. Detailed data by product packed and metal are shown in table 6A-2.

The monthly survey data are reported in terms of base boxes of metal consumed in the manufacture of cans. Also reported separately are the base boxes of steel (tinplate) and aluminum consumed in the manufacture of cans. For 1972, the base boxes of steel (tinplate) have been converted to short tons by use of the factor 25.3 base boxes per short ton of steel. The comparable factor for 1967 is 24.5 base boxes per short ton of steel.

Certain of the larger companies operating establishments classified in industry 3411 also have establishments producing other types of metal containers as well as containers made of other materials. These establishments are classified in other industries; for example: Steel shipping barrels, drums, and pails in industry 3412, Metal Barrels, Drums, and Pails; paper and paperboard boxes, drums, etc., in Major Group 26, Paper and Allied Products.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other

Government agencies and the remaining statistics constructed from industry averages. For industry 3411, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3412.—METAL BARRELS, DRUMS, AND PAILS (Short Title)

This industry comprises establishments primarily engaged in manufacturing ferrous and nonferrous metal shipping barrels, drums, kegs, and pails. For a detailed list of products of industry 3412, refer to table 6A-1, product codes 34121 00 to 34123 19.

The 1972 definition of this industry is the same as that used in the 1967 classification system. However, the SIC number has been changed from 3491 to 3412.

Value of shipments and other receipts of the Metal Barrels, Drums, and Pails Industry in 1972 totaled \$461 million. This included shipments of metal barrels, drums, and pails (primary products) valued at \$438 million, shipments of other products (secondary products) valued at \$13 million, and miscellaneous receipts (mainly resales) of \$10 million.

Shipments of metal barrels, drums, and pails (primary products) in 1972 represented 97 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent.

Shipments of metal barrels, drums, and pails (primary products) from establishments classified in industry 3412 in 1972 represented 86 percent (coverage ratio) of these products valued at \$509 million shipped by all industries. In 1967, the coverage ratio was 88 percent. Other industries shipping metal barrels, drums, and pails consisted mainly of industry 3411, Metal Cans (\$18 million); and industry 3465, Automotive Stampings (\$10 to \$20 million).

Detailed figures on the shipments of metal barrels, drums, and pails are collected on a monthly basis by the Bureau of the Census on Form M34K, "Steel Shipping Barrels, Drums, and Pails." Table 6A-1 shows totals for the data collected in the monthly survey and in the census of manufactures for the same period.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3412, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 3421.—CUTLERY

This industry comprises establishments primarily engaged in manufacturing cutlery. Establishments primarily engaged in manufacturing table cutlery made entirely of metal are classified in industry 3914; those manufacturing electric razors in industry 3634; and those manufacturing hair clippers for human use in industry 3999 and for animal use in industry 3523. For a detailed list of products of industry 3421, refer to table 6A, product codes 34211 11 to 34212 55.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Cutlery Industry in 1972 totaled \$428 million. This included shipments of cutlery (primary products) valued at \$379 million, shipments of other products (secondary products) valued at \$36 million, and miscellaneous receipts (mainly resales) of \$13 million.

Shipments of cutlery (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 79 percent. Secondary products shipped by this industry in 1972 consisted mainly of electric housewares and fans (\$10 to \$20 million).

Shipments of cutlery (primary products) from establishments classified in industry 3421 in 1972 represented 94 percent (coverage ratio) of these products valued at \$404 million shipped by all industries. In 1967, the coverage ratio was 95 percent. Other industries shipping cutlery consisted mainly of industry 3423, Hand and Edge Tools, N.E.C. (\$15 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3421, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 3423.—HAND AND EDGE TOOLS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing files and other hand and edge tools for metal-working, woodworking, and general maintenance. Establishments primarily engaged in manufacturing saws are classified in industry 3425, and metal-cutting dies, power-driven hand-tools, and attachments and accessories for machine tools in

Major Group 35. For a detailed list of products of industry 3423, refer to table 6A-1, product codes 34231 11 to 34233 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Hand and Edge Tools, N.E.C., Industry in 1972 totaled \$1,233 million. This included shipments of hand and edge tools, n.e.c., (primary products) valued at \$979 million, shipments of other products (secondary products) valued at \$119 million, and miscellaneous receipts (mainly resales) of \$135 million.

Shipments of hand and edge tools, n.e.c., (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of special industry machinery (\$16 million); cutlery (\$15 million); and iron and steel forgings (\$13 million).

Shipments of hand and edge tools, n.e.c., (primary products) from establishments classified in industry 3423 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,114 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping hand and edge tools, n.e.c., consisted mainly of industry 3425, Handsaws and Saw Blades (\$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3423, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3425.—HANDSAWS AND SAW BLADES

This industry comprises establishments primarily engaged in manufacturing handsaws and saw blades for hand and power-driven saws. Establishments primarily engaged in manufacturing power-driven sawing machines are classified in Major Group 35. For a detailed list of products of industry 3425, refer to table 6A-1, product codes 34250 11 to 34250 49.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Handsaws and Saw Blades Industry in 1972 totaled \$194 million. This included shipments of handsaws, saw blades, and saw accessories (primary products) valued at \$154 million, shipments of other products (secondary products) valued at \$27 million, and miscellaneous receipts (mainly resales) of \$13 million.

Shipments of handsaws, saw blades, and saw accessories (primary products) in 1972 represented 85 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 80 percent. Secondary products shipped by this industry in 1972 consisted mainly of hand and edge tools, n.e.c. (\$20 million).

Shipments of handsaws, saw blades, and saw accessories (primary products) from establishments classified in industry 3425 in 1972 represented 77 percent (coverage ratio) of these products valued at \$202 million shipped by all industries. In 1967, the coverage ratio was 82 percent. Other industries shipping handsaws, saw blades, and saw accessories consisted mainly of industry 3546, Power-Driven Handtools (\$17 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3425, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3429.—HARDWARE, N.E.C.

This industry comprises establishments primarily engaged in manufacturing miscellaneous metal products usually termed "hardware," not elsewhere classified. Establishments primarily engaged in manufacturing bolts and nuts are classified in industry 3452, nails and spikes in Major Group 33, cutlery in industry 3421, handtools in industry 3423, and pole line and transmission hardware in Major Group 36. For a detailed list of products of industry 3429, refer to table 6A-1, product codes 34292 13 to 34298 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Hardware, N.E.C., Industry in 1972 totaled \$3,244 million. This included

shipments of hardware, n.e.c. (primary products) valued at \$2,923 million, shipments of other products (secondary products) valued at \$190 million, and miscellaneous receipts (mainly resales) of \$130 million.

Shipments of hardware, n.e.c. (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of special dies, tools, jigs, and fixtures (\$20 to \$50 million).

Shipments of hardware, n.e.c. (primary products) from establishments classified in industry 3429 in 1972 represented 94 percent (coverage ratio) of these products valued at \$3,100

million shipped by all industries. In 1967, the coverage ratio was 95 percent. Other industries shipping hardware, n.e.c., consisted mainly of industry 3647, Vehicular Lighting Equipment (\$20 to \$50 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3429, these establishments accounted for 4 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3411	Industry 3412	Industry 3421	Industry 3423	Industry 3425	Industry 3429
1972.....	133	99	123	582	82	965
1967.....	96	91	138	630	74	979
1963.....	99	95	156	681	70	1,025

(NA) Not available. * These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

(See appendix. Explanation of Terms)

²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.

(See appendix, Explanation of Terms)

See footnotes at end of table.

TABLE 4. General Statistics, by Employment Size of Establishment: 1972—Continued

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

34290 00	Hardware, n.e.c., n.s.k., for establishments with 10 employees or more. (See note.).....	100.0	80.9
34290 02	Hardware, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.).....	31.4	16.3

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. ^r Revised.

¹The 1972 census program requested separate value figures for aluminum cans and steel cans. Review indicates that the separation was not properly reported. Accordingly, these values have been combined. In 1967, data on aluminum cans and steel cans were not collected separately.

²A metal can is defined as a single-walled container constructed wholly of tinplate, terneplate, blackplate, waste plate, aluminum sheet or impact extrusions (slugs) designed for packing products. This definition excludes steel pails, defined as single-walled shipping containers having capacities of 1 to 12 gallons, inclusive, that are cylindrically constructed of steel sheet of 29 gage and heavier.

³A base box is an area of 31,360 square inches, equivalent to 112 sheets, 14" x 20" in size.

⁴The 1972 and 1967 figures represent, respectively, 5,582 and 5,149 thousand short tons of steel. The 1972 and 1967 estimates were derived respectively, by use of the factors 25.3 and 24.5 base boxes per short ton of steel.

⁵Steel shipping packages, kegs, and pails are defined as single-walled shipping containers with a range of capacity from 1 to 12 gallons inclusive, constructed of steel sheet of 29 gage and heavier. This definition does not include tin cans (packers' cans, general line cans, and beer cans), terneplate oil containers, fluid milk shipping containers, ice cream cans, gas cylinders, beer barrels, reconditioned barrels and drums, or containers not commercially usable in the transportation of commodities.

⁶Steel shipping barrels are defined as single-walled cylindrical or bilged shipping containers, with a range of capacity from 12 to 132 gallons, constructed of steel. This definition does not include tin cans (packers' cans, general line cans, and beer cans), terneplate oil containers, high and low pressure gas steel cylinders, fluid milk shipping containers, ice cream cans, or containers not commercially usable in the transportation of commodities.

⁷Quantities shipped are 23,582 and 20,411 thousand units for 1972 and 1967, respectively.

⁸Combined with product code 34232 98, "Other edge tools, including agricultural edged hand tools," to avoid disclosing figures for individual companies.

⁹Combined with product code 34233 98, "Other hand tools, except edge tools," to avoid disclosing figures for individual companies.

¹⁰Includes all types and sizes of solid-tooth circular saw blades for industrial and home workshop type circular saws as well as saw blades for portable power saws and for sawing attachments for portable handtools.

¹¹Product code 34250 15 is included with product code 34250 19, "All other woodworking powersaw blades," to avoid disclosing operations of individual companies.

¹²Includes only the value of motor vehicle hardware reported as such. It is likely that an indeterminate amount of motor vehicle hardware was reported as motor vehicle parts and classified accordingly in the Motor Vehicle Parts Industry.

¹³The 1972 and 1967 definition of this product class differ significantly, such that motor vehicle hardware has been shifted to product class 34296 in 1972.

TABLE 6A-2. Quantity and Value of Shipments of Metal Cans, by Product Packed: 1972 and 1967

1972 product code	Type of can	1972		1967 base boxes shipped
		Cans shipped	Base boxes ¹ shipped

	Value of aluminum cans shipped.....million dollars..	(³)	(X)	204.4

(X) Not applicable. (NA) Not available.

¹See table 6A-1, footnote 3, for definition.²The tonnage figures are derived by use of the factors 25.3 and 24.5 base boxes per short ton of steel in 1972 and 1967, respectively.³Data on value of aluminum cans shipped were collected separately; however, a review of these data indicates that this separation was not properly reported. Accordingly, these values have been combined.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9

CC.....\$5.0 to \$9.9

FF.....\$20.0 to 49.9

BB.....\$2.0 to \$4.9

EE.....\$10.0 to \$19.9

GG.....\$50.0 and over

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹The 1972 and 1967 definition of this product class differ significantly, such that motor vehicle hardware has been shifted to product class 34296 in 1972. This shift out of product class 34297 represents more than 15 percent of the total shipments value at the U.S. level.

TABLE 6C. Product Classes—Value Shipped by All Manufacturing Establishments:

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²The 1972 and 1967 definition of this product class differ significantly, such that motor vehicle hardware has been shifted to product class 34296 in 1972. This shift out of product class 34297 represents more than 15 percent of the total shipments value at the U.S. level.

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

(Z) Less than half of the unit of measurement shown (50 thousand dollars).

¹Data on the tonnage of tinplate, terneplate, blackplate, and aluminum consumed in the production of cans constructed wholly of metal are published in Current Industrial Reports series M-34D, Metal Cans. The consumption reported in the census of manufactures also includes such metals consumed in the production of secondary products.²This item represents the total cost of materials for establishments that did not report detailed materials data.³Includes cost for materials indicated by the symbol (D).⁴Excludes quantities produced and consumed in the same establishment.⁵These figures are understated by \$2 million or less because of apparent undercoverage of carbon steel pipe and tube.⁶Included with material code 970099, All other materials and components, etc.⁷In 1972, 9.4 thousand short tons of iron and steel forgings were produced and consumed in the same establishments. The comparable figure for 1967 is 6.2 thousand short tons.⁸Material code 331013, Plates, is combined with material code 331019, All other carbon steel mill shapes and forms.⁹These figures are understated by \$5 million or less because of apparent undercoverage of carbon steel pipe and tube.¹⁰In addition, there were 3.2 and 3.5 thousand short tons of iron castings produced and consumed in the same establishment for 1972 and 1967, respectively. Data on aluminum, steel, and copper castings produced and consumed are not available.

EXPLANATORY TEXT

HEATING APPARATUS (EXCEPT ELECTRIC AND WARM AIR FURNACES) AND PLUMBING FIXTURES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3431—Enameled Iron and Metal Sanitary Ware*

3432—Plumbing Fixture Fittings and Trim (Brass Goods)*

3433—Heating Equipment, Except Electric and Warm Air Furnaces*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3431.—METAL SANITARY WARE (Short Title)

This industry includes establishments primarily engaged in manufacturing enameled iron, cast iron, or pressed metal sanitary ware.

Establishments primarily engaged in manufacturing vitreous and semivitreous pottery sanitary ware are classified in industry 3261 (Vitreous Plumbing Fixtures); and those manufacturing porcelain enameled kitchen, household, and hospital ware in industry 3469 (Metal Stampings, N.E.C.). For a detailed list of products of industry 3431, refer to table 6A, product codes 34310 10 and 34310 98.

*Note that the "short title" for this industry is used throughout the report.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Metal Sanitary Ware Industry in 1972 totaled \$370 million. This included shipments of metal sanitary ware (primary products) valued at \$288 million, shipments of other products (secondary products) valued at \$53 million, and miscellaneous receipts (mainly resales) of \$30 million.

Shipments of metal sanitary ware (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 83 percent. Secondary products shipped by this industry in 1972 consisted mainly of industry 3261, Vitreous Plumbing Fixtures (\$10 to \$20 million).

Shipments of metal sanitary ware (primary products) from establishments classified in industry 3431 in 1972 represented 91 percent (coverage ratio) of these products valued at \$316 million shipped by all industries. In 1967, the coverage ratio was 89 percent. Other industries shipping metal sanitary ware consisted mainly of industry 3465, Automotive Stampings, (\$5 to \$10 million) and industry 3469, Metal Stampings, N.E.C., (\$8 million).

Industry 3431 includes establishments which fall into two significantly different categories; namely, those producing cast iron plumbing fixtures and those producing metal fixtures of pressed metal. Accordingly, the manufacturing plants included in this industry involve different manufacturing processes depending upon the line of products produced. Those fixture plants producing cast iron fixtures include significant foundry operations while the pressed metal fixture plants are more closely allied to metal fabricating plants producing their product by forming processes (stamping, drawing, etc.).

The operations of the largest establishments in this industry cover the entire production process including the casting of the fixture through the machining, finishing, and assembly operations. In general, these processes are carried on at a single manufacturing plant. However, in a few instances the foundry operations were performed at separate locations and, accordingly, those separate foundries were classified in the foundry industries (SIC industries 3321, 3322, 3324, 3325, 3361, 3362, and 3369). In the latter case, the plants classified in this industry would be limited to machining and finishing operations on castings received from their associated plants.

Certain of the companies' operating plants classified in this industry also have establishments producing allied products classified in other industries. For example, the larger fixture

manufacturers also have plants engaged in manufacturing fixture fittings and such allied products as vitreous china fixtures, kitchen cabinets, warm air furnaces, boilers, and other consumer durable items in the plumbing and heating line.

As is shown in table 7A, certain of the more important materials consumed by the industry are pig iron, iron and steel scrap metal consumed in the foundry operations, and steel mill shapes and forms.

Data on shipments of plumbing fixtures were collected by the Bureau of the Census on a quarterly basis on Form MQ-34E. The detailed statistics shown in table 6A-2 were taken from the quarterly survey.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3431, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 3432.—PLUMBING FITTINGS AND BRASS GOODS (Short Title)

This industry includes establishments primarily engaged in manufacturing plumbing fixture fittings and trim (brass goods).

Establishments primarily engaged in manufacturing steam or water line valves are classified in industry 3494 (Valves and Pipe Fittings). For a detailed list of products of industry 3432, refer to table 6A, product codes 34320 01 to 34320 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Plumbing Fittings and Brass Goods Industry in 1972 totaled \$709 million. This included shipments of plumbing fittings and brass goods (primary products) valued at \$605 million, shipments of other products (secondary products) valued at \$66 million, and miscellaneous receipts (mainly resales) of \$38 million.

Shipments of plumbing fittings and brass goods (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 93 percent. Secondary products shipped by this industry in 1972 consisted mainly of industry 3494, Valves and Pipe Fittings, (\$16 million).

Shipments of plumbing fittings and brass goods (primary products) from establishments classified in industry 3432 in

1972 represented 90 percent (coverage ratio) of these products valued at \$673 million shipped by all industries. In 1967, the coverage ratio was 86 percent. Other industries shipping plumbing fittings and brass goods consisted mainly of industry 3431, Metal Sanitary Ware, (\$20 to \$50 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3432, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3433.—HEATING EQUIPMENT, EXCEPT ELECTRIC (Short Title)

This industry includes establishments primarily engaged in manufacturing heating equipment, except electric, and warm air furnaces, including gas, oil, and stoker coal fired equipment, for the automatic utilization of gaseous, liquid, and solid fuels.

Establishments primarily engaged in manufacturing warm air furnaces are classified in industry 3585 (Refrigeration and Heating Equipment); cooking stoves and ranges in industry 3631 (Household Cooking Equipment); boiler shops primarily engaged in the production of industrial, power, and marine boilers in industry 3443 (Fabricated Platework, Boiler Shops); and industrial process furnaces and ovens in industry 3567 (Industrial Furnaces and Ovens). For a detailed list of products of industry 3433, refer to table 6A, product codes 34333 11 to 34337 98.

The code number for this industry in the 1972 revision of the SIC is unchanged, but the content of the industry has been changed from the previous classification system. Warm air furnaces (product code 34332 00 in 1967) and parts and attachments for warm air furnaces (product code 34336 73 in 1967) have been moved to industry 3585, Refrigeration and Heating Equipment.

Value of shipments and other receipts of the Heating Equipment, Except Electric, Industry in 1972 totaled \$1,058 million. This included shipments of heating equipment, except electric, (primary products) valued at \$814 million, shipments of other products (secondary products) valued at \$181 million, and miscellaneous receipts (mainly resales) of \$64 million.

Shipments of heating equipment, except electric, (primary products) in 1972 represented 82 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972

consisted mainly of industry 3585, Refrigeration and Heating Equipment, (\$58 million).

Shipments of heating equipment, except electric, (primary products) from establishments classified in industry 3433 in 1972 represented 88 percent (coverage ratio) of these products valued at \$924 million shipped by all industries. Other industries shipping heating equipment, except electric, consisted mainly of industry 3585, Refrigeration and Heating Equipment, (\$53 million).

Inasmuch as the primary products of industry 3433 represent a wide and heterogenous group of heating equipment products, the establishments in this industry are involved in a variety of manufacturing processes. Many heating equipment plants are engaged in metal fabricating activities; namely, stamping and forming. In addition, a significant number of the establishments in the industry are engaged in foundry and plate fabricating activities.

Some of the companies' operating plants classified in industry 3433 have establishments engaged in the production of allied products such as metal tanks, electric and nonelectric ranges, electric and nonelectric water heaters, and other consumer durable items principally in the heating and cooking line.

The establishments of this industry vary greatly in the degree to which they manufacture the components used in the production of heating and cooking equipment. Some manufac-

turers produce practically all of the component parts and incorporate only such purchased parts as the motor, electrical controls, and blowers. Other manufacturers produce only a small part of the complete unit, purchasing most of the components from other manufacturers and limiting their manufacturing activities to assembly operations.

Data are shown in table 6A for "oil burners sold separately." These statistics exclude the quantity and value of oil burners which were both produced and incorporated into other types of heating equipment in the same plant. In these instances, the value of the boiler or furnace burner unit includes the value of the oil burner.

Data on shipments of domestic heating stoves, mechanical stokers, oil burners, and furnaces were collected during 1972 by the Bureau of the Census on Annual Form MA-34N, Heating and Cooking Equipment (Except Electric). The product data shown in table 6A-3 are from that source.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3433, these establishments accounted for 7 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	Industry 3431	Industry 3432	Industry 3433
1972.....	91	208	411
1967.....	83	210	496
1963.....	75	247	611

(NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²Data are derived from Table 8, General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization, of the 1967, 1963, and 1958 censuses of manufactures (volume II). The data are probably slightly overstated because they include establishments specializing in the production of parts for warm air furnaces.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)				(number)	(number)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)
			Number (1,000)	Payroll (million dollars)	Number (1,000)	Man-hours (millions)	Wages (million dollars)

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Metal sanitary ware (SIC 3431)	Plumbing fittings and brass goods (SIC 3432)	Heating equipment, except electric (SIC 3433)	Other industries

TABLE 6A-1. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A-1)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available.

¹The total for 1967 includes \$10.9 million of parts and attachments for warm air furnaces, now classified in industry 3585.

²These figures are from the Current Industrial Reports MA-34N and MA-35H for 1967. Separate statistics were not collected in the 1967 Census of Manufactures.

³Product code 34337 15 is included with product code 34337 98, "Other heating equipment," for 1972.

⁴Product codes 34337 38 and 34337 71 are included with product code 34337 98, "Other heating equipment," for 1967.

⁵Product code 34337 61 is included with product code 34337 98, "Other heating equipment," for both 1972 and 1967.

34337 68	Installed under water-tube boilers.....				66	2,068	

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures of individual companies.

¹If a plant manufactures an oil burner and combines it with a furnace of its own manufacture or with a furnace from another manufacturer, the data for this furnace burner device are reported under furnace burner units. In addition, the respondent reports the furnace of his own manufacture under warm-air furnaces. If a plant manufactures a furnace but combines it with a burner purchased from another manufacturer, the data for the furnace are reported under warm-air furnaces. In this case, the data for the oil burner have already been reported by the producer of the burner as oil burners sold separately. A similar situation exists in regard to the reporting of data for boiler-burner units and cast-iron boilers.

²Shipments of commercial and industrial furnace burner units (code 34337 83) are excluded to avoid disclosure of operations of individual companies.

³Shipments of "all other" residential furnace burner units (code 34337 82) are excluded to avoid disclosure of operations of individual companies.

⁴Mechanical stokers are classified by use as follows:

Class 1 for residential use.

Class 2 for small apartment house and small commercial heating jobs.

Class 3 for large apartment house and medium-sized commercial heating jobs.

Class 4 for large commercial and small high-pressure steam plants (small industrial).

Class 5 for high-pressure steam plant (large industrial).

⁵Conversion stoker—A conversion stoker is a mechanical stoker which may be installed in any of the common types of furnaces or boilers.

⁶Integral units—An integral unit consists of a boiler or furnace, an automatic coal-feeding mechanism, accessories, and usually a metal enclosure—the whole assembly having been designed as a complete, compact, and coordinate heating unit.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9 CC.....\$5.0 to \$9.9 FF.....\$20.0 to \$49.9
BB.....\$2.0 to \$4.9 EE.....\$10.0 to \$19.9 GG.....\$50.0 and over

(NA) Not available.

¹The content of this product class differs in 1972 from 1967, such that parts and attachments for warm air furnaces have shifted to product code 35858 73 in 1972. This shifting out of 1972 product class 34337 represents approximately 3 percent of the total 1967 shipments at the U.S. level.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²The content of this product class differs in 1972 from 1971 and prior years, such that parts and attachments for warm air furnaces have shifted to product code 35858 73 in 1972. This shifting out of 1972 product class 34337 represents approximately 3 percent of the total 1967 shipments at the U.S. level.

976000	Materials, components, parts, containers, and supplies consumed, n.s.k. ³			(X)	75.7

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

(Z) Less than half of the unit of measurement shown.

¹Includes cost for materials indicated by the symbol (D).²Data are not available for castings or forgings produced and consumed in the same establishment except for iron castings which totaled 182.0 thousand short tons in 1967.³This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.

TABLE 7B. Fuels and Electric Energy Consumed: 1971 and 1967

EXPLANATORY TEXT

FABRICATED STRUCTURAL METAL PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3441—Fabricated Structural Metal
- 3442—Metal Doors, Sash, Frames, Molding, and Trim*
- 3443—Fabricated Platework (Boiler Shops)
- 3444—Sheet Metalwork
- 3446—Architectural and Ornamental Metalwork*
- 3448—Prefabricated Metal Buildings and Components*
- 3449—Miscellaneous Metalwork

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3441.—FABRICATED STRUCTURAL METAL

This industry comprises establishments primarily engaged in manufacturing fabricated iron and steel or other metal for structural purposes, such as bridges, buildings, and sections for ships, boats, and barges. Establishments primarily engaged in manufacturing metal doors, sash, frames, molding, and trim are classified in industry 3442; and establishments doing fabrication work at the site of construction are classified in construction industries. For a detailed list of products of industry 3441, refer to table 6A, product codes 34411 21 to 34413 98.

*Note that the "short title" for this industry is used throughout the report.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Fabricated Structural Metal Industry in 1972 totaled \$3,920 million. This included shipments of fabricated structural metal (primary products) valued at \$3,106 million, shipments of other products (secondary products) valued at \$380 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$433 million.

Shipments of fabricated structural metal (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 89 percent. Secondary products shipped by this industry in 1972 consisted mainly of fabricated platework at \$102 million.

Shipments of fabricated structural metal (primary products) from establishments classified in industry 3441 in 1972 represented 93 percent (coverage ratio) of these products valued at \$3,306 million shipped by all industries. In 1967, the coverage ratio was 91 percent. Other industries shipping fabricated structural metal consisted mainly of industry 3443, Fabricated Platework (Boiler Shops), (\$31 million); industry 3446, Architectural Metalwork, (\$17 million); and industry 3444, Sheet Metalwork, (\$14 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3441, these establishments accounted for 8 percent of value of shipments.

INDUSTRY 3442—METAL DOORS, SASH, AND TRIM (Short Title)

This industry comprises establishments primarily engaged in manufacturing ferrous and nonferrous metal and metal covered doors and sash, window and door frames and screens, molding, and trim. For a detailed list of products of industry 3442, refer to table 6A, product codes 34421 05 to 34425 51.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Metal Doors, Sash, and Trim Industry in 1972 totaled \$2,078 million. This included shipments of metal doors, sash, and trim (primary products) valued at \$1,742 million, shipments of other products (secondary products) valued at \$187 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$148 million.

Shipments of metal doors, sash, and trim (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of sheet metalwork at \$55 million.

Shipments of metal doors, sash, and trim (primary products) from establishments classified in industry 3442 in 1972 represented 91 percent (coverage ratio) of these products valued at \$1,903 million shipped by all industries. In 1967, the coverage ratio was 94 percent. Other industries shipping metal doors, sash, and trim consisted mainly of industry 3354, Aluminum Extruded Products, at \$40 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3442, these establishments accounted for 13 percent of value of shipments.

INDUSTRY 3443.—FABRICATED PLATEWORK (BOILER SHOPS)

This industry comprises establishments primarily engaged in manufacturing power and marine boilers, pressure and non-pressure tanks, processing and storage vessels, heat exchangers, weldments, and similar products by the process of cutting, forming, and joining metal plates, shapes, bars, sheet, pipe mill products, and tubing to custom or standard design for factory or field assembly. Establishments primarily engaged in manufacturing warm-air heating furnaces are classified in industry 3585, other nonelectric heating apparatus except power boilers in industry 3433, and household cooking apparatus in industry 3631. For a detailed list of products of industry 3443, refer to table 6A, product codes 34431 11 to 34439 59.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Fabricated Platework (Boiler Shops) Industry in 1972 totaled \$3,338

million. This included shipments of fabricated platework (primary products) valued at \$2,850 million, shipments of other products (secondary products) valued at \$248 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$240 million.

Shipments of fabricated platework (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 91 percent. Secondary products shipped by this industry in 1972 consisted mainly of fabricated structural metal at \$31 million.

Shipments of fabricated platework (primary products) from establishments classified in industry 3443 in 1972 represented 87 percent (coverage ratio) of these products valued at \$3,266 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping fabricated platework consisted mainly of industry 3441, Fabricated Structural Metal, at \$102 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3443, these establishments accounted for 4 percent of value of shipments.

INDUSTRY 3444.—SHEET METALWORK

This industry comprises establishments primarily engaged in manufacturing sheet metalwork for buildings (not including fabrication work done by construction contractors at the place of construction) and manufacturing sheet metal stovepipes, light tanks, etc. For a detailed list of products of industry 3444, refer to table 6A, product codes 34442 13 to 3446 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Sheet Metalwork Industry in 1972 totaled \$2,680 million. This included shipments of sheet metalwork (primary products) valued at \$2,236 million, shipments of other products (secondary products) valued at \$246 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$199 million.

Shipments of sheet metalwork (primary products) in 1972 represented 90 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent.

Shipments of sheet metalwork (primary products) from establishments classified in industry 3444 in 1972 represented 84 percent (coverage ratio) of these products valued at \$2,651 million shipped by all industries. In 1967, the coverage ratio was 83 percent. Other industries shipping sheet metalwork consisted mainly of industry 3353, Aluminum Sheet, Plate, and Foil, at \$71 million; industry 3441, Fabricated Structural Metal, at \$62 million; industry 3312, Blast Furnaces and Steel Mills, at \$60 million; and industry 3442, Metal Doors, Sash, and Trim, at \$55 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3444, these establishments accounted for 11 percent of value of shipments.

INDUSTRY 3446.—ARCHITECTURAL METALWORK (Short Title)

This industry comprises establishments primarily engaged in manufacturing architectural and ornamental metalwork of ferrous and nonferrous metals, such as stairs and staircases, open steel flooring (grating), fire escapes, grilles, railings, and fences and gates, except those made from wire. Establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts are classified in industry 3448 and miscellaneous metalwork in industry 3449. For a detailed list of products of industry 3446, refer to table 6A, product codes 34460 11 to 34460 61.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Architectural Metalwork Industry in 1972 totaled \$574 million. This included shipments of architectural metalwork (primary products) valued at \$478 million, shipments of other products (secondary products) valued at \$62 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$33 million.

Shipments of architectural metalwork (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 83 percent. Secondary products shipped by this industry in 1972 consisted mainly of fabricated structural metal at \$17 million.

Shipments of architectural metalwork (primary products) from establishments classified in industry 3446 in 1972 repre-

sented 81 percent (coverage ratio) of these products valued at \$589 million shipped by all industries. In 1967, the coverage ratio was 77 percent. Other industries shipping architectural and ornamental metalwork consisted mainly of industry 3441, Fabricated Structural Metal, at \$47 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3446, these establishments accounted for 20 percent of value of shipments.

INDUSTRY 3448.—PREFABRICATED METAL BUILDINGS (Short Title)

This industry comprises establishments primarily engaged in manufacturing prefabricated and portable metal buildings and parts, and prefabricated exterior metal panels. For a detailed list of products of industry 3448, refer to table 6A, product codes 34481 14 to 34482 55.

Because of revisions in the Standard Industrial Classification (SIC) for 1972, the Prefabricated Metal Buildings Industry became a separate industry in 1972. Under the 1967 SIC, the statistics for industry 3448 were included in the statistics for industry 3449, Miscellaneous Metalwork.

Value of shipments and other receipts of the Prefabricated Metal Buildings Industry in 1972 totaled \$623 million. This included shipments of prefabricated metal buildings and parts (primary products) valued at \$522 million, shipments of other products (secondary products) valued at \$65 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$36 million.

Shipments of prefabricated metal buildings and parts (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of sheet metalwork at \$18 million.

Shipments of prefabricated metal buildings and parts (primary products) from establishments classified in industry 3448 in 1972 represented 90 percent (coverage ratio) of these products valued at \$579 million shipped by all industries. Other industries shipping prefabricated metal buildings consisted mainly of industry 3441, Fabricated Structural Metal, at \$18 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at

the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3448, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3449.—MISCELLANEOUS METALWORK

This industry comprises establishments primarily engaged in manufacturing miscellaneous ferrous and nonferrous metalwork, such as metal plaster bases, fabricated bar joists, and concrete reinforcing bars. For a detailed list of products of industry 3449, refer to table 6A, product codes 34494 42 to 34495 79.

Value of shipments and other receipts of the Miscellaneous Metalwork Industry in 1972 totaled \$980 million. This included shipments of miscellaneous metalwork (primary products) valued at \$764 million, shipments of other products (secondary products) valued at \$68 million, and miscellaneous

receipts (mainly resales of products bought and resold without further manufacture) of \$148 million.

Shipments of miscellaneous metalwork (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of metal doors, sash, and trim, at \$11 million.

Shipments of miscellaneous metalwork (primary products) from establishments classified in industry 3449 in 1972 represented 76 percent (coverage ratio) of these products valued at \$995 million shipped by all industries. Other industries shipping miscellaneous metalwork consisted mainly of industry 3312, Blast Furnaces, and Steel Mills, at \$88 million.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3449, these establishments accounted for 14 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio
	Total	With 20 employees or more	Number	Payroll	Number	Man-hours	Wages

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 Industry 3441	1972 Industry 3442	1972 Industry 3443	1972 Industry 3444	1972 Industry 3446	1972 Industry 3448	1972 Industry 3449	1967 Industry 3449
1972.....	2010	1391	1349	2960	1430	143	336	(X)
1967.....	1865	1540	1346	2942	1360	(X)	(X)	549
1963.....	1636	1712	1301	3139	1362	(X)	(X)	647

Although 1967 industry 3449 is a combination of 1972 industries 3448 and 3449, the number of companies is not separately available for 1972 on the old SIC basis.

(X) Not applicable. (NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²Prior to 1963, this industry was part of SIC 3449. Accordingly, data for individual years prior to 1963 are not available. However, data were published in the 1958 Census of Manufactures for plants classified in SIC 3449 specializing in shipments of architectural metalwork. This is the source of the data for 1958 for this industry.

³The data are not strictly comparable with 1971 and prior years because of a revision in the 1972 Standard Industrial Classification.

⁴For 1972, these statistics are the combined totals for new industries 3448 and 3449. For 1971 and prior years, the statistics are totals for industry 3449 as classified on the old SIC basis. Because of changes in the product mix for several plants classified in these industries, the combined establishment count for industries 3448 and 3449 on the new SIC basis is not necessarily identical to the establishment count for industry 3449 on the old SIC basis (see table 1C). However, the effect of these changes is estimated to be less than one percent of the total value of shipments for industries 3448 and 3449 combined in 1972.

⁵Prior to 1963, this industry included, industry 3446, Architectural Metalwork. However, separate data were published in the 1958 census for plants specializing in the production of ornamental and structural metalwork. This is the source of the separate data for 1958.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

(NA) Not available.

¹The data are not strictly comparable with 1971 and prior years because of a revision in the 1972 Standard Industrial Classification. See footnote 4, table 1A.

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)
New industry 3448.....	159	88	12.2	279.6	622.6	(X)	(X)	(X)	(X)	(X)
Old industry 3449.....	159	88	12.2	279.6	622.6	590	316	33.6	672.8	1,652.6

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown.

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons: e.g., to avoid disclosure of individual company data.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscellaneous receipts	Primary product specialization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Fabricated structural metal (SIC 3441)	Metal doors, sash, and trim (SIC 3442)	Fabricated platework (boiler shops) (SIC 3443)	Sheet metalwork (SIC 3444)	Architectural metalwork (SIC 3446)	Prefabricated metal buildings (SIC 3448)	Miscellaneous metalwork (SIC 3449)	Other industries
	Total shipments and miscellaneous receipts.....	(X)	3,920.1	2,077.6	3,338.5	2,684.1	573.1	636.8	980.4	(X)

34495 00	Other miscellaneous metal building materials and curtain wall (except reinforcing bars), n.s.k.....	(X)	49.7	(X)	24.2
34490 00	Miscellaneous metalwork, n.s.k., for establishments with 10 employees or more. (See note.).....	(X)	132.5	(X)	¹¹ 111.9
34490 02	Miscellaneous metalwork, n.s.k., for establishments with less than 10 employees. (See note.).....	(X)	5.2	(X)	¹² 10.7

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. ^eEstimated.

¹Includes products listed below for which quantity data were estimated.

²Does not include structural metal fabricated for own use by establishments building ships.

³In the 1967 Census of Manufactures, aluminum residential swing and closet doors were not collected separately.

⁴Data, similar to but not identical, is published in Current Industrial Reports series MA-34G. The differences are as follows: In survey MA-34G, the data represent new orders, whereas census of manufactures represent shipments; in survey MA-34G, the data relate to boilers of 100 square feet of heating surface and over, whereas the census of manufactures also includes those of under 100 square feet of heating surface.

⁵Data for product codes 34433 31 and 34433 33 are included with product code 34433 52 to avoid disclosing operations of individual companies.

⁶The relationship between product classes on the new SIC basis (1972) and the old SIC basis (1967) are as follows:

New SIC	Old SIC	New SIC	Old SIC
34444 } 34445 }	34441	34481 } 34482 }	34492
3446	34443	34494 } 34495 }	34493

⁷Steel siding, product code 34445 16, is included with steel roofing, all types, product code 34444 11.

⁸Metal siding other than steel or aluminum, product code 34445 19, is included with metal roofing of other than steel or aluminum, product code 34444 15.

⁹Data also includes metal flooring and siding, n.s.k.

¹⁰The comparable 1967 SIC product class is 34443.

¹¹For 1967, product code 34480 00 is included with product code 34490 00.

¹²For 1967, product code 34480 02 is included with product code 34490 02.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)		Product class and geographic area	Value of shipments (million dollars)	
	1972	1967		1972	1967

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²These figures include an estimate of less than 15 percent for those products whose quantities are unavailable.

³The relationship between product classes on the new SIC basis (1972) and the old SIC basis (1971 and prior years) are as follows:

New SIC	Old SIC	New SIC	Old SIC
34444 } 34445 }	34441	34481 } 34482 }	34492
		34494 } 34495 }	34493
3446	34443		

⁴N.s.k. product class 34480 combines with n.s.k. product class 34490.

EXPLANATORY TEXT

SCREW MACHINE PRODUCTS, FASTENERS AND WASHERS; METAL FORGINGS AND STAMPINGS; AND METAL SERVICES

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3451—Screw Machine Products
- 3452—Bolts, Nuts, Screws, Rivets, and Washers*
- 3462—Metal Forgings and Stampings*
- 3463—Nonferrous Forgings
- 3465—Automotive Stampings
- 3466—Crowns and Closures
- 3469—Metal Stampings, N.E.C.
- 3471—Electroplating, Plating, Polishing, Anodizing, and Coloring*
- 3479—Coating, Engraving, and Allied Services, N.E.C.*

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3451.—SCREW MACHINE PRODUCTS

This industry comprises establishments primarily engaged in manufacturing automatic or hand screw machine products from rod, bar, or tube stock of metal, fiber, plastics, or other material. The products of this industry consist of a wide variety of unassembled parts and are usually manufactured on

*Note that the "short title" for this industry is used throughout the report.

a job or order basis. Establishments primarily engaged in manufacturing standard bolts, nuts, rivets, screws, and other industrial fasteners on headers, threaders, and nut-forming machines are classified in industry 3452. For a detailed list of products of industry 3451, refer to table 6A, product codes 34511 12 to 34512 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Screw Machine Products Industry in 1972 totaled \$1,062 million. This included shipments of screw machine products (primary products) valued at \$972 million, shipments of other products (secondary products) valued at \$45 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$45 million.

Shipments of screw machine products (primary products) in 1972 represented 96 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was also 96 percent. Secondary products shipped by this industry in 1972 consisted mainly of bolts, nuts, rivets, and washers (\$28 million).

Shipments of screw machine products (primary products) from establishments classified in industry 3451 in 1972 represented 90 percent (coverage ratio) of these products valued at \$1,083 million shipped by all industries. In 1967, the coverage ratio was also 90 percent. Other industries shipping screw machine products consisted mainly of industry 3452, Bolts, Nuts, Rivets, and Washers, (\$47 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3451, these establishments accounted for 12 percent of value of shipments.

INDUSTRY 3452.—BOLTS, NUTS, RIVETS, AND WASHERS (Short Title)

This industry comprises establishments primarily engaged in manufacturing bolts, nuts, screws, rivets, washers, formed and threaded wire goods, and special industrial fasteners. Rolling mills engaged in manufacturing similar products are classified in SIC Major Group 33, and establishments primarily engaged in manufacturing screw machine products in industry 3451.

For a detailed list of products of industry 3452, refer to table 6A, product codes 34525 11 to 34528 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Bolts, Nuts, Rivets, and Washers Industry in 1972 totaled \$2,043 million. This included shipments of bolts, nuts, rivets, and washers (primary products) valued at \$1,803 million, shipments of other products (secondary products) valued at \$137 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$104 million.

Shipments of bolts, nuts, rivets, and washers (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 94 percent. Secondary products shipped by this industry in 1972 consisted mainly of screw machine products (\$47 million).

Shipments of bolts, nuts, rivets, and washers (primary products) from establishments classified in industry 3451 in 1972 represented 91 percent (coverage ratio) of these products valued at \$1,988 million shipped by all industries. In 1967, the coverage ratio was 90 percent. Other industries shipping bolts, nuts, rivets, and washers consisted mainly of industry 3312, Blast Furnaces and Steel Mills, (\$105 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3452, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3462.—IRON AND STEEL FORGINGS (Short Title)

This industry comprises establishments primarily engaged in manufacturing metal forgings or metal stampings. These establishments generally operate on a job or order basis, manufacturing metal stampings or forgings for sale to others or for interplant transfer. Establishments which produce metal stampings or forgings for incorporation in end products produced in the same establishment are classified on the basis of the end product. For a detailed list of products of industry 3462, refer to table 6A, product codes 34621 11 to 34629 43.

The 1972 definition of this industry is the same as that used in the 1967 classification system. 1972 SIC industry 3462 was classified in the old SIC system under industry 3391.

Value of shipments and other receipts of the Iron and Steel Forgings Industry in 1972 totaled \$1,416 million. This in-

cluded shipments of iron and steel forgings (primary products) valued at \$1,259 million, shipments of other products (secondary products) valued at \$116 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$41 million.

Shipments of iron and steel forgings (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of nonferrous forgings (\$36 million).

Shipments of iron and steel forgings (primary products) from establishments classified in industry 3462 in 1972 represented 68 percent (coverage ratio) of these products valued at \$1,839 million shipped by all industries. Other industries shipping iron and steel forgings consisted mainly of industry 3714, Motor Vehicle Parts and Accessories, (\$100 to \$200 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3462, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3463.—NONFERROUS FORGINGS

This industry comprises establishments primarily engaged in manufacturing nonferrous forgings, with or without the use of dies. For a detailed list of products of industry 3463, refer to table 6A, product codes 34631 33 to 34632 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. 1972 SIC industry 3463 was classified in the old SIC system under industry 3392.

Value of shipments and other receipts of the Nonferrous Forgings Industry in 1972 totaled \$222 million. This included shipments of nonferrous forgings (primary products) valued at \$176 million, shipments of other products (secondary products) valued at \$34 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$13 million.

Shipments of nonferrous forgings (primary products) in 1972 represented 84 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of iron and steel forgings (\$28 million).

Shipments of nonferrous forgings (primary products) from establishments classified in industry 3463 in 1972 represented 63 percent (coverage ratio) of these products valued at \$281 million shipped by all industries. Other industries shipping

nonferrous forgings consisted mainly of industry 3462, Iron and Steel Forgings, (\$37 million) and industry 3351, Copper Rolling and Drawing, (\$33 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3463, these establishments accounted for 2 percent of value of shipments.

INDUSTRY 3465.—AUTOMOTIVE STAMPINGS

This industry comprises establishments primarily engaged in manufacturing automotive stampings, such as body parts, hubs, and trim. For a detailed list of products of industry 3465, refer to table 6A, product code 34650 13.

The Automotive Stampings Industry is included in the census of manufactures for the first time in 1972. This industry and 1972 industries 3466 and 3469 comprise 1967 industry 3461, Metal Stampings.

Value of shipments and other receipts of the Automotive Stampings Industry in 1972 totaled \$5,286 million. This included shipments of automotive stampings (primary products) valued at \$4,754 million, shipments of other products (secondary products) valued at \$406 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$126 million.

Shipments of automotive stampings (primary products) in 1972 represented 92 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of special dies, tools, jigs, and fixtures (\$187 million).

Shipments of automotive stampings (primary products) from establishments classified in industry 3465 in 1972 represented 92 percent (coverage ratio) of these products valued at \$5,156 million shipped by all industries. Other industries shipping automotive stampings consisted mainly of industry 3711, Motor Vehicles and Car Bodies, (\$200 to \$500 million) and industry 3469, Metal Stampings, N.E.C., (\$65 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments, key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics estimated from industry averages. In those cases where two new industries or more were created from an old industry, all data based on administrative records have been assigned to only one of the new industries. Administrative-record data for industry 3465 have been included with data for industry 3469.

INDUSTRY 3466.—CROWNS AND CLOSURES

This industry comprises establishments primarily engaged in manufacturing metal crowns and closures. For a detailed list of products of industry 3466, refer to table 6A, product codes 34661 10 to 34662 00.

The Crowns and Closures Industry is included in the census of manufactures for the first time in 1972. This industry and 1972 industries 3465 and 3467 comprise 1967 industry 3461, Metal Stampings.

Value of shipments and other receipts of the Crowns and Closures Industry in 1972 totaled \$337 million. This included shipments of crowns and closures (primary products) valued at \$283 million, shipments of other product (secondary products) valued at \$38 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$15 million.

Shipments of crowns and closures (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of metal foil and leaf (\$10 million).

Shipments of crowns and closures (primary products) from establishments classified in industry 3466 in 1972 represented 83 percent (coverage ratio) of these products valued at \$346 million shipped by all industries. Other industries shipping crowns and closures consisted mainly of industry 3411, Metal Cans, (\$23 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments, key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics estimated from industry averages. In those cases where two new industries or more were created from an old industry, all data based on administrative records have been assigned to only one of the new industries. Administrative-record data for industry 3466 have been included with data for industry 3469.

INDUSTRY 3469.—METAL STAMPINGS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing metal stampings and spun products, not elsewhere classified, including porcelain enameled products such as household appliance housings and parts; utensils and consumer stamped and spun products such as cooking and kitchen utensils; and other nonautomotive job stampings. For a detailed list of products of industry 3469, refer to table 6A, product codes 34692 11 to 34699 98.

The Metal Stampings, N.E.C., Industry is included in the census of manufactures for the first time in 1972. This industry and 1972 industries 3465 and 3466 comprise 1967 industry 3461, Metal Stampings.

Value of shipments and other receipts of the Metal Stampings, N.E.C., Industry in 1972 totaled \$2,674 million. This included shipments of metal stampings, n.e.c., (primary products) valued at \$2,191 million, shipments of other products (secondary products) valued at \$353 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$130 million.

Shipments of metal stampings, n.e.c., (primary products) in 1972 represented 86 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of automotive stampings (\$65 million).

Shipments of metal stampings, n.e.c., (primary products) from establishments classified in industry 3469 in 1972 represented 85 percent (coverage ratio) of these products valued at \$2,585 million shipped by all industries. Other industries shipping metal stampings, n.e.c., consisted mainly of industry 3465, Automotive Stampings, (\$85 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3469, these establishments accounted for 8 percent of value of shipments.

INDUSTRY 3471.—PLATING AND POLISHING (Short Title)

This industry comprises establishments primarily engaged in all types of electroplating, plating, anodizing, coloring, and finishing of metals and formed products for the trade. Most of the work done in this industry is done on materials owned by others. For a detailed list of products of industry 3471, refer to table 6A, product code 34710 11.

The 1967 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Plating and Polishing Industry in 1972 totaled \$1,040 million. This included shipments of plating and polishing (primary products) valued at \$1,009 million, shipments of other products (secondary products) valued at \$19 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$12 million.

Secondary products shipped by this industry in 1972 consisted mainly of metal coating and allied services (\$11 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3471, these establishments accounted for 21 percent of value of shipments.

INDUSTRY 3479.—METAL COATING AND ALLIED SERVICES (Short Title)

This industry comprises establishments primarily engaged in performing the following types of services on metals: (1) Enameling, lacquering, and varnishing metal products for the trade; (2) hot-dip galvanizing of mill sheets, plates and bars, castings, and formed products fabricated of iron and steel; hot-dip coating such items with aluminum, lead, or zinc; retinning cans and utensils; (3) engraving, chasing, and etching jewelry, silverware, notarial and other seals, and other metal products for the trade and for job contracting for purposes other than printing; and (4) other metal services, not elsewhere classified. Establishments primarily engaged in electroplating, plating, polishing, anodizing, coloring, and finishing metals and formed products for the trade are classified in industry 3471; and those producing porcelain enameled products in industry 3469. For a detailed list of products of industry 3479, refer to table 6A, product codes 34790 13 to 34790 81.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Metal Coating and Allied Services Industry in 1972 totaled \$702 million. This included shipments of metal coating and allied services (primary products) valued at \$637 million, shipments of other products (secondary products) valued at \$53 million, and miscellaneous receipts (mainly resales of products bought and resold without further manufacture) of \$12 million.

Secondary products shipped by this industry in 1972 consisted mainly of fabricated metal products, n.e.c. (\$10 to \$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3479, these establishments accounted for 15 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 industry 3451	1972 industry 3452	1972 industry 3462	1972 industry 3463	1972 industry 3465	1972 industry 3466	1972 industry 3469	1967 industry 3461	1972 industry 3471	1972 industry 3479
1972.....	1,781	580	252	40	388	42	2,277	(X)	3,180	1,426
1967.....	1,847	577	248	37	(X)	(X)	(X)	2,564	3,170	1,393
1963.....	1,861	504	248	32	(X)	(X)	(X)	2,491	2,968	1,227

Although 1967 industry 3461 is a combination of 1972 industries 3465, 3466, and 3469, the number of companies is not separately available for 1972 on an old SIC basis.

Footnotes continued on next page.

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)--Continued

(X) Not applicable. (NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²The 1972 data are not strictly comparable to 1971 and prior years because of a revision in the 1972 Standard Industrial Classification. For 1972, these statistics are the combined totals for new industries 3465, 3466, and 3469. For 1971 and prior years, they are totals for industry 3461 as classified on the old SIC basis. With 1972 industry totals tabulated on the new SIC basis, several establishments have been classified into industries other than 3465, 3466, and 3469 as a result of changes in their primary product mix. (See table 1C.) However, the effect of these changes is estimated to be less than 1 percent of the total value of shipments for 1972 industries 3465, 3466, and 3469 combined.

³Relationships are not meaningful because of the predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

¹The 1972 data are not strictly comparable to 1971 and prior years. (See footnote 2, table 1A.)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
New industry 3465.....	453	364	123.3	2,663.8	5,286.0	(X)	(X)	(X)	(X)	(X)
Old industry 3461.....	453	364	123.3	2,663.8	5,286.0	2,862	1,394	223.8	4,308.7	8,332.6

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. (Z) Less than half of the unit of measurement shown.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

¹The proportion of product shipments (both primary and secondary) of the industry represented by primary products.²The proportion of primary products shipped by the establishments classified in the industry to total shipments of such products by all manufacturing establishments.³Relationships are not meaningful because of the predominance of miscellaneous receipts, particularly receipts for contract and commission work on materials owned by others.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent
E2--20 to 29 percent

E3--30 to 39 percent
E4--40 to 49 percent

E5--50 to 59 percent
E6--60 to 69 percent

E7--70 to 79 percent
E8--80 to 89 percent

E9--90 to 99 percent
E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (2) Less than half of the unit of measurement shown (under 50 thousand dollars or man-hours; under 50 employees).

¹Report forms were not mailed to companies that operated only one establishment—generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments	All employees		Production workers			Value added by manufacture	Cost of materials	Value of shipments	Capital expenditures, new

See footnotes at end of table.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio
		(million dollars)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. B & C (percent)	(million dollars)	(million dollars)	(million dollars)	Col. B Col. F (percent)

(NA) Not available.

¹Specialization ratio is not meaningful because of the predominance of receipts for contract and commission work on materials owned by others. Such receipts are treated as primary products for this industry.

²Data on receipts for plating and polishing are not available for establishments classified outside industry 3471.

³Data on receipts for metal coating and engraving, etc., are not available for establishments classified outside industry 3479.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972—Continued

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	Other industries	Product code	Industry, class of products, and miscellaneous receipts	Other industries
	Listing of other industries with over \$2 million shipments of primary products--Continued			Listing of other industries with over \$2 million shipments of primary products--Continued

	Organic coatings, enamels, and lacquers (including alkydes, vinyls, acrylics, plastisols, etc.):					
34790 61	Coil coating.....			123.1	106.0	
34790 71	Spray coating, including electrostatic coating.....			112.9	54.4	
34790 81	All other, including curtain coating, wash coating, etc.....			116.7	35.9	
34790 00	Metal coating and allied services, n.s.k., for companies with 10 employees or more. (See note.).....			79.9	68.7	
34790 02	Metal coating and allied services, n.s.k., for companies with less than 10 employees. (See note.)....			44.5	24.7	

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

(X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies. ^R Revised.

¹The figures shown in this column are limited to those products for which the reporting was 75 percent complete or more, based on value. Estimates are included for the remaining 25 percent or less based on average unit price for each product.

²The product class structure for this industry has been revised from that used in prior years.

³Includes product class 33129, open-die hammer and press forgings made in steel mills.

⁴These figures are not strictly comparable with tonnage figures shown in Current Industrial Reports series MA-33C, Commercial Steel Forgings, in that the latter include only forgings for sale, whereas the 1972 and 1967 census of manufactures also include interplant transfers of forgings. Accordingly, a direct comparison with the Current Industrial Reports series is not possible. Forgings produced and consumed are not included in

Footnotes continued on next page

TABLE 6A-1. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967—Continued

(Footnotes for table 6A-1)--Continued

either the census or the current industrial reports figures. The annual totals in the Current Industrial Reports survey for commercial steel forgings were as follows:

Item	1972 (1,000 s. tons)	1967 (1,000 s. tons)
Closed-die (drop, upset, and press) forgings:		
Carbon.....	977.0	1,010.8
Alloy, including stainless.....	507.0	524.5
Open-die hammer forgings:		
Carbon.....	93.9	117.1
Alloy, including stainless.....	58.9	84.7
Open-die press forgings:		
Carbon.....	99.3	70.8
Alloy, including stainless.....	135.1	127.3

⁵For 1971 and prior years, this industry had only one product class. The product class structure was revised in 1972 to separate aluminum and aluminum-base alloy forgings from other nonferrous forgings.

⁶See table 6A-2 for detailed product data.

⁷"Job stampings" are mainly parts which are sold to other manufacturers for incorporation into their own products. Job stampings may be made from materials owned by the customer. These figures represent only those stampings made from materials owned by the establishment performing the stamping operation.

⁸Data are limited to vitreous-enameled products produced from materials owned by the producing company. Data do not include the value of receipts for enameled work done on materials owned by others (enameled product for the trade).

⁹This figure also includes data for new industries: 3465, Metal Stampings; and 3466, Crowns and Closures.

¹⁰Value consists principally of receipts for work done on materials owned by others. The value represents only work done by establishments classified in industries 3471 and 3479, respectively.

TABLE 6A-2. Metal Closures for Containers: 1972 and 1967

(X) Not applicable. (D) Withheld to avoid disclosing figures for individual companies.

¹Includes caps produced "for own use" by can producing companies.

Source: Current Industrial Reports series M34H, "Closures for Containers."

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Note: For some areas, exact figures are withheld to avoid disclosing figures for individual companies. The values are shown in ranges for those States where product-class shipments of \$1 million or more were reported. Following are the symbols and the value ranges (in million dollars) they represent:

AA.....\$1.0 to \$1.9
BB.....\$2.0 to \$4.9

CC.....\$5.0 to \$9.9
EE.....\$10.0 to \$19.9

FF.....\$20.0 to \$49.9
GG.....\$50.0 and over

(NA) Not available.

Footnotes continued on next page.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

(Footnotes for table 6B)—Continued

¹The individual product codes included in this class of products for 1972 differ significantly from the 1967 definition. Products shifting into or out of this class of products represent more than 15 percent of the total shipments value at the U.S. level. Thus, geographic information for 1967 are not shown.

²The comparable 1967 data in this table were developed by conversion of old SIC products codes to new SIC codes, and by combining data where necessary with only those product codes shown which are affected by the changes, as follows:

1972 new SIC	1967 old SIC	1972 new SIC	1967 old SIC	1972 new SIC	1967 old SIC	1972 new SIC	1967 old SIC	1972 new SIC	1967 old SIC

Note: See footnote 2, table 6B.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with these estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²These figures exclude press and hammer steel forgings made in steel mills (industry 3312). Totals from various industries are shown below:

	1972	1971	1970	1969	1968	1967	1963	1958
Press and Hammer Steel Forgings, total for all industries....	524.6	394.8	479.1	533.7	500.0	462.9	294.4	220.9
33129 Made in steel works (industry 3312).....	266.1	215.7	218.0	235.7	229.1	208.6	120.7	119.5
34629 Made in steel forgings (industry 3462) and other industries	258.5	179.1	261.1	298.0	270.9	254.3	173.7	101.4

³These figures include data for industries 3465, Automotive Stampings, and 3466, Crowns and Closures.

⁴Represents only work done by establishments classified in the industry to which the product (service) is primary.

970099	All other materials and components, parts, containers, and supplies consumed.....		(X)	244.7
976000	Materials, parts, containers, and supplies, n.s.k. ³		(X)	173.0

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than half of the unit of measurement shown.

¹No data are available on quantities of iron and steel castings produced and consumed in the same establishment.

²Included with material code 970099, "All other materials and components, parts, containers, and supplies consumed."

³This item represents the total cost of materials for establishments that did not report detailed materials data.

⁴Excludes quantities produced and consumed in the same establishment.

⁵Quantities produced and consumed in the same establishment totaled 3.2 thousand short tons in 1967. The comparable figure for 1972 is not available.

⁶Includes cost of materials indicated by symbol (D).

⁷Included with product code 331019, "All other carbon steel mill shapes and forms," to avoid disclosing operations of individual companies.

⁸Included with product code 335008, "All other aluminum mill shapes and forms," to avoid disclosing operations of individual companies.

EXPLANATORY TEXT

ORDNANCE AND ACCESSORIES, N.E.C.

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

3482—Small Arms Ammunition

3483—Ammunition, Except for Small Arms, N.E.C.

3484—Small Arms

3489—Ordnance and Accessories, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3482.—SMALL ARMS AMMUNITION

This industry comprises establishments primarily engaged in manufacturing ammunition for small arms having a bore of 30 mm (or 1.18 inches) and below. Establishments primarily engaged in manufacturing ammunition except for small arms are classified in industry 3483, blasting and detonating caps and safety fuses in industry 2892, and fireworks in industry 2899. For a detailed list of products of industry 3482, refer to table 6A, product codes 34820 21 to 34820 98.

The 1972 definition of this industry is the same as that used in the 1967 classification system. However, the SIC code has been changed from 1961 to 3482.

Value of shipments and other receipts of the Small Arms Ammunition Industry in 1972 totaled \$438 million. This included shipments of small arms (primary products) valued at \$415 million, shipments of other products (secondary prod-

ucts) valued at \$8 million, and miscellaneous receipts (mainly sales of scrap and refuse) of \$15 million.

Shipments of small arms ammunition (primary products) in 1972 represented 98 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 97 percent.

Shipments of small arms ammunition (primary products) from establishments classified in industry 3482 in 1972 represented 98 percent (coverage ratio) of these products valued at \$423 million shipped by all industries. In 1967, the coverage ratio was 99 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3482, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3483.—AMMUNITION, EXCEPT FOR SMALL ARMS, N.E.C.

This industry comprises establishments primarily engaged in manufacturing ammunition, not elsewhere classified, or in loading and assembling ammunition over 30 mm (or over 1.18 inches) for naval, aircraft, antiaircraft, tank, coast, and field artillery, including component parts.

This industry also includes establishments primarily engaged in manufacturing bombs, mines, torpedoes, grenades, depth charges, chemical warfare projectiles, and their component parts.

Establishments primarily engaged in manufacturing small arms ammunition are classified in industry 3482, explosives in industry 2892, and military pyrotechnics in industry 2899.

For a detailed list of products of industry 3483, refer to table 6A, product codes 34831 11 to 34833 31.

The 1972 definition of this industry is the same as that used in the 1967 classification system. However, the SIC code has been changed from 1929 to 3483.

Value of shipments and other receipts of the Ammunition, Except for Small Arms, N.E.C., Industry in 1972 totaled \$1,485 million. This included shipments of ammunition, except for small arms, n.e.c., (primary products) valued at \$1,145 million, shipments of other products (secondary

products) valued at \$175 million, and miscellaneous receipts (mainly contract work) of \$166 million.

Shipments of ammunition, except for small arms, n.e.c., (primary products) in 1972 represented 87 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent. Secondary products shipped by this industry in 1972 consisted mainly of ordnance and accessories, n.e.c., (\$28 million).

Shipments of ammunition, except for small arms, n.e.c., (primary products) from establishments classified in industry 3483 in 1972 represented 88 percent (coverage ratio) of these products valued at \$1,303 million shipped by all industries. In 1967, the coverage ratio was 85 percent. Other industries shipping ammunition, except for small arms, n.e.c., consisted mainly of industry 3662, Radio and TV Communication Equipment (\$14 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3483, these establishments accounted for less than 1 percent of value of shipments.

INDUSTRY 3484.—SMALL ARMS

This industry comprises establishments primarily engaged in manufacturing small firearms having a bore 30 mm (or 1.18 inches) and below, and parts for small firearms. This industry also includes establishments primarily engaged in manufacturing certain weapons over 30 mm which are carried and employed by the individual, such as grenade launchers and heavy field machine guns.

Establishments primarily engaged in manufacturing artillery and mortars having a bore over 30 mm (or over 1.18 inches) and component parts are classified in industry 3489.

For a detailed list of products of industry 3484, refer to table 6A, product codes 34841 21 to 34842 81.

The 1972 definition of this industry is the same as that used in the 1967 classification system. However, the SIC number has been changed from 1951 to 3484.

Value of shipments and other receipts of the Small Arms Industry in 1972 totaled \$394 million. This included shipments of small arms (primary products) valued at \$329 million, shipments of other products (secondary products) valued at \$32 million, and miscellaneous receipts (mainly resales) of \$32 million.

Shipments of small arms (primary products) in 1972 represented 91 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 92 percent.

Shipments of small arms (primary products) from establishments classified in industry 3484 in 1972 represented 98 percent (coverage ratio) of these products valued at \$334 million shipped by all industries. In 1967, the coverage ratio was 94 percent.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3484, these establishments accounted for 1 percent of value of shipments.

INDUSTRY 3489.—ORDNANCE AND ACCESSORIES, N.E.C.

This industry comprises establishments primarily engaged in manufacturing ordnance and accessories, not elsewhere classified, such as naval, aircraft, antiaircraft, tank, coast, and field artillery having a bore over 30 mm (or over 1.18 inches) and components.

Establishments primarily engaged in manufacturing small arms and parts 30 mm (or 1.18 inches) and below are classified in industry 3484, tanks in industry 3795, and guided missiles in SIC group 376.

For a detailed list of products of industry 3489, refer to table 6A, product codes 34891 11 to 34892 11.

Industry 3489, as classified under the 1972 edition of the SIC manual, is a combination of industries 1911 and 1999 in the previous classification system.

Value of shipments and other receipts of the Ordnance and Accessories, N.E.C., Industry in 1972 totaled \$478 million. This included shipments of ordnance and accessories, n.e.c. (primary products) valued at \$326 million, shipments of other products (secondary products) valued at \$65 million, and miscellaneous receipts (mainly contract work) of \$86 million.

Shipments of ordnance and accessories, n.e.c., (primary products) in 1972 represented 83 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 80 percent.

Shipments of ordnance and accessories, n.e.c., (primary products) from establishments classified in industry 3489 in 1972 represented 72 percent (coverage ratio) of these products valued at \$455 million shipped by all industries. In 1967, the

EXPLANATORY TEXT—Continued

coverage ratio was 61 percent. Other industries shipping ordnance and accessories, n.e.c., consisted mainly of industry 3769, Space Vehicle Equipment, N.E.C. (\$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small

number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3489, these establishments accounted for 3 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A)

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 Industry 3482	1972 Industry 3483	1972 Industry 3484	1972 Industry 3489	1967 Industry 1911	1967 Industry 1999
1972.....	57	77	75	75	(X)	(X)
1967.....	39	82	69	(X)	9	87
1963.....	27	38	52	(X)	(NA)	54

Although 1972 industry 3489 is a combination of 1967 industries 1911 and 1999, the number of companies is not separately available for 1967 and 1963 on the new SIC basis.

(X) Not applicable. (NA) Not available. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²The 1972 data are not strictly comparable to 1971 and prior years because of revisions in the 1972 Standard Industrial Classification. For 1972, these statistics are the totals for industry 3489 on the new SIC basis. For 1971 and prior years, they are the combined totals for industries 1911 and 1999 as classified on the old SIC basis. Because of changes in the product mix for several plants classified in these industries, the 1972 establishment count for industry 3489 on the new SIC basis is not necessarily identical to the combined establishment count for industries 1911 and 1999 on the old SIC basis. (See table 1C.) However, the effect of these changes is estimated to be less than 1 percent of the total value of shipments for 1972 industry 3489.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

¹The 1972 data are not strictly comparable to 1971 and prior years. (See footnote 2, table 1A.)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufac- ture	Value of shipments	Establishments		All employees	Value added by manufac- ture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)
New industry 3489.--Ordnance and Accessories, N.E.C.....	76	36	24.6	380.9	477.7	(X)	(X)	(X)	(X)	(X)
Old industry 1911.--Guns, Howitzers, and Mortars.....	13	3	3.5	53.6	67.6	13	3	3.5	53.6	67.6
Old industry 1999.--Ordnance and Accessories, N.E.C.....	63	33	21.1	327.3	410.1	60	32	(D)	(D)	(D)

(X) Not applicable.

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balance of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

Industry or product class code	Industry or product class by percent of specialization	Establishments (number)	All employees		Production workers			Value added by manufacture (million dollars)	Cost of materials (million dollars)	Value of shipments (million dollars)	Capital expenditures, new (million dollars)

(D) Withheld to avoid disclosing figures for individual companies.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments			
		Total	Primary products	Secondary products	Miscel- laneous receipts	Primary product special- ization ratio	Total, made in all industries	Made in this industry	Made in other industries	Coverage ratio

34890 00	Ordnance and accessories, n.e.c., n.s.k., for establishments with 10 employees or more. (See note.).	7.0	(NA)
34890 02	Ordnance and accessories, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.)	1.2	(NA)

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available.

¹Separate data were requested for quantity and value of transfer to manufacturing plants of the same company and quantity shipped to original equipment manufacturers. However, these data cannot be published without disclosing the operations of individual companies.

²Data for product code 34841 21 are included with product code 34842 73 in 1972 and with product codes 34842 73 and 34842 81 in 1967.

³Data for product code 34842 46 are included with product code 34842 49.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

Product class and geographic area	Value of shipments (million dollars)	Product class and geographic area	Value of shipments (million dollars)	Product class and geographic area	Value of shipments (million dollars)

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹Includes cost for materials indicated by the symbol (D).²Source: Represents estimates published in MC 67(S)-5, "Selected Materials Consumed," from data collected in a supplemental survey on form MA-131, "Consumption of Materials, Parts, Containers, and Supplies During 1967." This survey was limited to large establishments in selected chemical, machinery, and equipment industries and resulted in estimates which are subject to greater error than are the figures on materials consumption collected as a regular part of the census of manufactures.³This item represents the total cost of materials for establishments that did not report detailed materials data.⁴Included with material code 331019, "All other carbon steel mill shapes and forms."⁵Included with material code 970099, "All other materials and components, etc."⁶No data are available for castings, forgings, or fractional horsepower electric motors produced and consumed in the same establishment.

EXPLANATORY TEXT

MISCELLANEOUS FABRICATED METAL PRODUCTS

This report shows 1972 Census of Manufactures statistics for establishments classified in each of the following industries:

SIC Code and Title

- 3493—Steel Springs, Except Wire
- 3494—Valves and Pipe Fittings, Except Plumbers' Brass Goods*
- 3495—Wire Springs
- 3496—Miscellaneous Fabricated Wire Products
- 3497—Metal Foil and Leaf
- 3498—Fabricated Pipe and Fabricated Pipe Fittings*
- 3499—Fabricated Metal Products, N.E.C.

The general statistics (employment, payroll, cost of materials, value of shipments, inventories, etc.) are reported for each establishment as a whole. Aggregates of such data for an industry reflect, not only the primary activities of the establishments in the industry, but also their activities in the manufacture of secondary products and their miscellaneous activities (contract work on materials owned by others, repair work, etc.). This fact should be taken into account in comparing industry statistics (tables 1 to 4) with product statistics (table 6A) showing shipments by all industries of the primary products of the specified industry. The extent of the "product mix" is indicated in table 5B which shows the value of primary and secondary products shipped by establishments classified in the specified industry and also the value of primary products of the industry shipped as secondary products by establishments classified in other industries.

INDUSTRY 3493.—STEEL SPRINGS, EXCEPT WIRE

This industry includes establishments primarily engaged in manufacturing leaf springs, hot wound springs, and coiled flat springs. Establishments primarily engaged in manufacturing wire springs are classified in industry 3495. For a detailed list of products of industry 3493, refer to table 6A, product codes 34931 04 to 34932 71.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

*Note that the "short title" for this industry is used throughout the report.

Value of shipments and other receipts of the Steel Springs, Except Wire, Industry in 1972 totaled \$331 million. This included shipments of steel springs, except wire, (primary products) valued at \$265 million, shipments of other products (secondary products) valued at \$61 million, and miscellaneous receipts (mainly resales) of \$6 million.

Shipments of steel springs, except wire, (primary products) in 1972 represented 81 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 88 percent. Secondary products shipped by this industry in 1972 consisted mainly of wire springs (\$20 million).

Shipments of steel springs, except wire, (primary products) from establishments classified in industry 3493 in 1972 represented 73 percent (coverage ratio) of these products valued at \$362 million shipped by all industries. In 1967, the coverage ratio was 63 percent. Other industries shipping steel springs, except wire, consisted mainly of industry 3495, Wire Springs, (\$35 million); industry 3714, Motor Vehicle Parts and Accessories, (\$32 million); and industry 3711, Motor Vehicles and Car Bodies (\$10 to \$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3493, these establishments accounted for 5 percent of value of shipments.

INDUSTRY 3494.—VALVES AND PIPE FITTINGS (Short Title)

This industry includes establishments primarily engaged in manufacturing pipe fittings and valves for controlling the flow of liquids or gases in pipes and mains, and for machinery. Establishments primarily engaged in manufacturing faucets, spigots, and similar plumbers' brass goods and fittings are classified in industry 3432 (Plumbing Fittings and Brass Goods), flexible metal hose and tubing in industry 3599 (Machinery, Except Electrical, N.E.C.), and fittings and couplings for garden hose in industry 3429 (Hardware, N.E.C.). For a detailed list of products of industry 3494, refer to table 6A, product codes 34941 20 to 34946 77.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Valves and Pipe Fittings Industry in 1972 totaled \$2,941 million. This included shipments of valves and pipe fittings (primary products) valued at \$2,470 million, shipments of other products (secondary products) valued at \$300 million, and miscellaneous receipts (mainly resales) of \$171 million.

Shipments of valves and pipe fittings (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 87 percent. Secondary products shipped by this industry in 1972 consisted mainly of pumps and pumping equipment (\$27 million) and general industrial machinery, n.e.c., (\$17 million).

Shipments of valves and pipe fittings (primary products) from establishments classified in industry 3494 in 1972 represented 86 percent (coverage ratio) of these products valued at \$2,877 million shipped by all industries. In 1967, the coverage ratio was 88 percent. Other industries shipping valves and pipe fittings consisted mainly of industry 3561, Pumps and Pumping Equipment, (\$93 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3494, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 3495.—WIRE SPRINGS

This industry includes establishments primarily engaged in manufacturing wire springs. Establishments primarily engaged in assembling wire bedsprings or seats are classified in SIC Major Group 25 (Furniture and Fixtures). For a detailed list of products of industry 3495, refer to table 6A, product codes 34952 12 to 34953 98.

The Wire Springs Industry is included as a separate industry for the first time in the census of manufactures for 1972. In 1972, old industry 3481, Miscellaneous Fabricated Wire Products, was split into industry 3495, Wire Springs, and industry 3496, Miscellaneous Fabricated Wire Products. In terms of content, new industry 3495 is comprised of old product classes 34812 and 34813. The effect of these revisions on the data are summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC."

Value of shipments and other receipts of the Wire Springs Industry in 1972 totaled \$612 million. This included shipments of wire springs (primary products) valued at \$528 million, shipments of other products (secondary products)

valued at \$72 million, and miscellaneous receipts (mainly resales) of \$11 million.

Shipments of wire springs (primary products) in 1972 represented 88 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of steel springs, except wire, (\$35 million).

Shipments of wire springs (primary products) from establishments classified in industry 3495 in 1972 represented 93 percent (coverage ratio) of these products valued at \$566 million shipped by all industries. Other industries shipping wire springs consisted mainly of industry 3493, Steel Springs, Except Wire, (\$20 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. In those cases where two industries or more were created from an old industry, data based on administrative records have been assigned to only one of the new industries. Administrative record data for industry 3495 are included with data for industry 3496.

INDUSTRY 3496.—MISCELLANEOUS FABRICATED WIRE PRODUCTS

This industry includes establishments primarily engaged in manufacturing miscellaneous fabricated wire products from purchased wire, such as noninsulated wire rope and cable; fencing; screening, netting, and paper machine wire cloth; and hangers, paper clips, kitchenware, and wire carts.

Rolling mills engaged in manufacturing wire products are classified in SIC Major Group 33 (Primary Metal Industries); establishments manufacturing nonferrous wire nails and spikes in industry 3399 (Primary Metal Products, N.E.C.); those drawing and insulating nonferrous wire in industry 3357 (Nonferrous Wire Drawing and Insulating); and those manufacturing wire springs in industry 3495. For a detailed list of products of industry 3496, refer to table 6A, product codes 34961 11 to 34969 88.

Although the title of this industry has remained the same as that used in the 1967 classification system, the SIC number has changed from 3481 to 3496. (Old industry 3496, Collapsible Tubes, is no longer a separate industry; it is part of new industry 3499.) The content of the industry has changed significantly. New industry 3496 is comprised of old product classes 34811, 34814, 34815, 34816, and 34819; but old product classes 34812 and 34813 are the basis of new industry

3495. The effect of those revisions on the data are summarized in Table 1C, "Composition of New (1972) SIC Industries Based on Old (1967) SIC."

Value of shipments and other receipts of the Miscellaneous Fabricated Wire Products Industry in 1972 totaled \$959 million. This included shipments of miscellaneous fabricated wire products (primary products) valued at \$836 million, shipments of other products (secondary products) valued at \$63 million, and miscellaneous receipts (mainly resales) of \$60 million.

Shipments of miscellaneous fabricated wire products (primary products) in 1972 represented 93 percent (specialization ratio) of the industry's total product shipments (primary and secondary). Secondary products shipped by this industry in 1972 consisted mainly of metal stampings, n.e.c., (\$13 million).

Shipments of miscellaneous fabricated wire products (primary products) from establishments classified in industry 3496 in 1972 represented 45 percent (coverage ratio) of these products valued at \$1,862 million shipped by all industries. Other industries shipping miscellaneous fabricated wire products consisted mainly of industry 3315, Steel Wire and Related Products, (\$601 million) and industry 3312, Blast Furnaces and Steel Mills, (\$285 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3496, these establishments accounted for 15 percent of value of shipments. (This includes the administrative records from new industry 3495.)

INDUSTRY 3497.—METAL FOIL AND LEAF

This industry includes establishments primarily engaged in manufacturing gold, silver, tin, and other metal foil (including converted metal foil) and leaf. This industry also includes establishments primarily engaged in converting metal foil (including aluminum) into wrappers, cookware, dinnerware, and containers, except bags and liners. Establishments primarily engaged in manufacturing plain aluminum foil are classified in industry 3353 (Aluminum Sheet, Plate and Foil). For a detailed list of products of industry 3497, refer to table 6A, product codes 34971 32 to 34973 59.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Metal Foil and Leaf Industry in 1972 totaled \$285 million. This included

shipments of metal foil and leaf (primary products) valued at \$215 million, shipments of other products (secondary products) valued at \$56 million, and miscellaneous receipts (mainly resales) of \$15 million.

Shipments of metal foil and leaf (primary products) in 1972 represented 79 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 85 percent. Secondary products shipped by this industry in 1972 consisted mainly of miscellaneous plastics products (\$12 million) and paper coating and glazing (\$11 million).

Shipments of metal foil and leaf (primary products) from establishments classified in industry 3497 in 1972 represented 42 percent (coverage ratio) of these products valued at \$512 million shipped by all industries. In 1967, the coverage ratio was 56 percent. Other industries shipping metal foil and leaf consisted mainly of industry 3353, Aluminum Sheet, Plate, and Foil, (\$169 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3497, these establishments accounted for 3 percent of value of shipments.

INDUSTRY 3498.—FABRICATED PIPE AND FITTINGS (Short Title)

This industry includes establishments primarily engaged in fabricating pipe and pipe fittings from purchased pipe by cutting, threading, bending, etc. Establishments primarily engaged in manufacturing cast iron pipe and fittings, including cast and forged pipe fittings which have been machined and threaded, are classified in industry 3321 (Gray Iron Foundries); welded and heavy riveted pipe and seamless steel pipe are classified in industry 3317 (Steel Pipe and Tubes). Establishments primarily engaged in manufacturing products such as banisters, railings, and guards from pipe are classified in industry 3446 (Architectural Metalwork). For a detailed list of products of industry 3498, refer to table 6A, product codes 34980 13 to 34980 19.

The 1972 definition of this industry is the same as that used in the 1967 classification system. The SIC number and title are also the same.

Value of shipments and other receipts of the Fabricated Pipe and Fittings Industry in 1972 totaled \$704 million. This included shipments of fabricated pipe and fittings (primary products) valued at \$605 million, shipments of other products

(secondary products) valued at \$35 million, and miscellaneous receipts (mainly resales) of \$64 million.

Shipments of fabricated pipe and fittings (primary products) in 1972 represented 94 percent (specialization ratio) of the industry's total product shipments (primary and secondary). The industry specialization ratio in 1967 was 95 percent. Secondary products shipped by this industry in 1972 consisted mainly of fabricated metal products, n.e.c., and valves and pipe fittings.

Shipments of fabricated pipe and fittings (primary products) from establishments classified in industry 3498 in 1972 represented 90 percent (coverage ratio) of these products valued at \$670 million shipped by all industries. In 1967, the coverage ratio was also 90 percent. Other industries shipping fabricated pipe and fittings consisted mainly of industry 3499, Fabricated Metal Products, N.E.C., (\$18 million); and industry 3494, Valves and Pipe Fittings, (\$13 million).

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3498, these establishments accounted for 5 percent of value of shipments.

INDUSTRY 3499.—FABRICATED METAL PRODUCTS, N.E.C.

This industry includes establishments primarily engaged in manufacturing fabricated metal products, not elsewhere classified, such as fire- or burglary-resistive steel safes and vaults, and similar fire- or burglary-resistive products; and collapsible tubes of thin flexible metal. Also included are establishments primarily engaged in manufacturing metal boxes, metal ladders, and metal household articles, such as ice cream freezers and ironing boards.

Establishments primarily engaged in manufacturing concrete grave vaults are classified in industry 3272 (Concrete Products, N.E.C.) and metal grave vaults in industry 3995 (Burial Caskets). Establishments primarily engaged in manufacturing advertising novelties are classified in industry 3993 (Signs and Advertising Displays). For a detailed list of product codes of industry 3499, refer to table 6A, product codes 34991 15 to 34994 98.

Although the code number and title of this industry have remained the same as that used in the 1967 classification system, the content of the industry has changed significantly. Old industry 3492, Safes and Vaults, and old industry 3496, Collapsible Tubes, are now product classes 34991 and 34992, respectively, in this industry. Old industry 3499 comprises product classes 34993 and 34994 in the new industry.

Value of shipments and other receipts of the Fabricated Metal Products, N.E.C., Industry in 1972 totaled \$1,918 million. This included shipments of fabricated metal products, n.e.c., (primary products) valued at \$1,571 million, shipments of other products (secondary products) valued at \$191 million, and miscellaneous receipts (mainly resales) of \$157 million.

Shipments of fabricated metal products, n.e.c., (primary products) in 1972 represented 89 percent (specialization ratio) of the industry's total product shipments (primary and secondary).

Shipments of fabricated metal products, n.e.c., (primary products) from establishments classified in industry 3499 in 1972 represented 74 percent (coverage ratio) of these products valued at \$2,132 million shipped by all industries.

As stated in the introduction, small establishments generally with less than 10 employees were excluded from the mail portion of the census. For these establishments (and a small number of establishments whose reports were not received at the time the data were tabulated), key data on payrolls and sales were obtained from administrative records of other Government agencies and the remaining statistics constructed from industry averages. For industry 3499, these establishments accounted for 13 percent of value of shipments.

TABLE 1A. General Statistics: 1958 to 1972

(See appendix, Explanation of Terms)

Year ¹	Establishments		All employees		Production workers			Value added by manufacture	Cost of materials, fuels, etc.	Value of industry shipments	Capital expenditures, new	Gross value of fixed assets	End-of-year inventories	Specialization ratio	Coverage ratio

Note: The relationship of establishments to companies is as follows: A company, as the term is used in the census of manufactures, is a business organization consisting of one establishment or more under common ownership or control. The number of companies for each industry is shown below for the last 3 years in which censuses were conducted.

	1972 industry 3493	1972 industry 3494	1972 industry 3495	1972 industry 3496	1967 industry 3481	1972 industry 3497	1972 industry 3498	1972 industry 3499	1967 industry 3492	1967 industry 3496	1967 industry 3499
1972.....	99	645	206	1,157	(X)	54	373	2,254	(X)	(X)	(X)
1967.....	105	575	(X)	(X)	1,430	59	356	(X)	28	15	1,223
1963.....	91	580	(X)	(X)	1,464	56	328	(X)	28	18	1,254

(X) Not applicable. (NA) Not available. (S) Withheld because the data did not meet publication standards. *These figures either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, these estimates may be of limited reliability.

Footnotes continued on next page.

TABLE 1A. General Statistics: 1958 to 1972—Continued

(Footnotes for table 1A--Continued)

¹For intercensal years, annual survey of manufactures (ASM) data are shown. These data are estimates based on a representative sample of establishments canvassed annually and may differ from the results of a complete canvass of all manufacturing establishments. The percentage standard errors are shown in the Annual Survey of Manufactures volume. Data prior to 1958 appear in Volume II, 1963 Census of Manufactures, in table 1 of the chapter devoted to this industry.

²Data on this new industry for 1967, 1963, and 1958 were derived from Table 8, "General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization," in volume II of the 1967, 1963, and 1958 censuses of manufactures. Separate data for other years are not available.

³The 1972 data are not strictly comparable to 1971 and prior years because of revisions in the 1972 Standard Industrial Classification. For 1972, these statistics are the combined totals for industries 3495 and 3496 on the new SIC basis. For 1971 and prior years, they are the totals for industry 3481 as classified on the old SIC basis. Because of changes in the product mix for several plants classified in these industries, the combined 1972 establishment count for industries 3495 and 3496 on the new SIC basis is not necessarily identical to the establishment count for industry 3481 on the old SIC basis. (See table 1C.) However, the effect of these changes is estimated to be less than 4 percent of the total value of shipments for the combined 1972 industries 3495 and 3496.

⁴The 1972 data are not strictly comparable to 1971 and prior years because of revisions in the 1972 Standard Industrial Classification. For 1972, these statistics are the totals for industry 3499 on the new SIC basis. For 1971 and prior years, they are the combined totals for industries 3492, 3496, and 3499 as classified on the old SIC basis. Because of changes in the product mix for several plants classified in these industries, the 1972 establishment count for industry 3499 on the new SIC basis is not necessarily identical to the combined establishment count for industries 3492, 3496, and 3499 on the old SIC basis. (See table 1C.) However, the effect of these changes is estimated to be less than 2 percent of the total value of shipments for 1972 industry 3499.

TABLE 1B. Selected Operating Ratios: 1958 to 1972

(See appendix, Explanation of Terms)

Year	Payroll per employee (dollars)	Assets per employee (dollars)	Production worker as percent of total employment (percent)	Annual man-hours of production workers (number)	Average hourly earnings of production workers (dollars)	Cost of materials per dollar of shipments (dollars)	Cost of materials and payrolls per dollar shipments (dollars)	Assets per dollar of shipments (dollars)	Value added per employee (dollars)	Payrolls as percent of value added (percent)	Value added per man-hour of production worker (dollars)

¹The 1972 data are not strictly comparable with 1971 and prior years. (See footnote 3, table 1A.)²The 1972 data are not strictly comparable with 1971 and prior years. (See footnote 3, table 1A.)

TABLE 1C. Composition of New (1972) SIC Industries Based on Old (1967) SIC

The data shown under "Composition of new industry" are 1972 totals, as follows: The "new industry" line shows data for the industry as now composed; the "old industry" lines show where these data would have been included if the industry definitions had not been changed. Stated otherwise, it shows where the new industry came from. The data shown under "Totals for

industries on old SIC" are 1972 totals for the industries before revision and reflect amounts classified in the specified new industry as well as in other new industries. The relationship between the data in the first five columns and the last five columns shows the portion of the old SIC industry that was classified into the specified, newly defined industry.

Industry	Composition of new industry					Totals for industries on old SIC				
	Establishments		All employees	Value added by manufacture	Value of shipments	Establishments		All employees	Value added by manufacture	Value of shipments
	Total	With 20 employees or more				Total	With 20 employees or more			
	(number)	(number)	(1,000)	(million dollars)	(million dollars)	(number)	(number)	(1,000)	(million dollars)	(million dollars)
New industry 3495.--Wire Springs.....	284	216	23.7	340.7	611.9	(X)	(X)	(X)	(X)	(X)

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those States where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
 E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E10--100 percent

(NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹General statistics for some producing areas are withheld to avoid disclosing figures for individual companies. However, for such areas with 150 employees or more, the number of establishments is shown and the employment size range is indicated by one of the following symbols:

AA--150 to 249 employees BB--250 to 499 employees CC--500 to 999 employees EE--1,000 to 2,499 employees FF--2,500 employees and over

Note: The payroll and sales data for small establishments (generally single-unit companies with less than 10 employees) were obtained from administrative records of other government agencies instead of from a Census report form. These data were then used in conjunction with industry averages to estimate the balance of the items shown in the table for these small establishments. This technique was also used for a small number of other establishments whose reports were not received at the time the data were tabulated. The following symbols are shown for those size classes where administrative records data were used and account for 10 percent or more of the figures shown:

E1--10 to 19 percent E3--30 to 39 percent E5--50 to 59 percent E7--70 to 79 percent E9--90 to 99 percent
E2--20 to 29 percent E4--40 to 49 percent E6--60 to 69 percent E8--80 to 89 percent E0--100 percent

(D) Withheld to avoid disclosing figures for individual companies. Data for this item are included in the underscored figures above. (Z) Less than half of the unit of measurement shown.

¹Report forms were not mailed to companies that operated only one establishment--generally single-unit companies with less than 10 employees. Payroll and sales for 1972 were obtained from administrative records supplied to other agencies of the Federal Government. These payroll and sales data were then used in conjunction with industry averages to estimate the balances of the items shown in the table. Data are also included in the respective size classes shown for this industry.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization: 1972

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5A. General Statistics for Establishments, by Industry Specialization and Primary Product Class Specialization:
1972—Continued

This table presents selected statistics for establishments according to their degree of specialization in products primary to their industry. The measures of plant specialization shown are (1) industry specialization—the ratio of primary product shipments to total product shipments, primary plus secondary, for the establishments; and (2) product class specialization—the ratio of the largest primary product class shipments to total product shipments, primary plus secondary, for the establishment. See the appendix for

method of computing these ratios. Statistics for establishments with specialization ratios of less than 75 percent are included in total lines but are not shown as a separate class. In addition, data may not be shown, for some industries, product classes, or specialization ratios for various reasons; e.g., to avoid disclosure of individual company data.

TABLE 5B. Industry-Product Analysis—Industry and Primary Product Shipments; Specialization Ratios and Coverage Ratios: 1972 and 1967

An establishment is assigned to an industry based on the shipment values of products representing the largest amount considered as primary to an industry. Frequently the establishment shipments comprise mixtures of products assigned to an industry (primary products), those considered primary to other industries (secondary products of a given industry), and receipts for activities such as merchandising or contract work.

This product pattern for an industry is shown in columns A through D and the primary product specialization ratio in column E. The extent to which the given industry's primary products are shipped by establishments classified in and out of the given industry is summarized in columns F through H and shown as a ratio in column I.

1972 code	Industry and census year	Value of shipments					Value of primary product shipments

¹Included in this industry are selected fabricated wire products (see footnote 1, table 5C) which are also primary to industry 3315, Steel Wire and Related Products. A 1972 coverage ratio computed on the basis of including both industries to which these products are primary would total 77 percent: 45 percent by industry 3496 and 32 percent by industry 3315. The remaining 23 percent was shipped by establishments in other industries, including industry 3312, Blast Furnaces and Steel Mills, and industry 3357, Nonferrous Wire Drawing and Insulating.

TABLE 5C. Industry-Product Analysis—Shipments by Product Class and Industry: 1972

In millions of dollars. This table shows where products of an industry (referred to as primary and listed in table 6A) are made and what products are made by establishments classified in an industry. Read down an industry column to find what products are produced in an industry. Read across to determine where the products of the industries in this chapter are produced. To the extent that some of the primary products are

made by industries not included in this chapter, the value of such shipments is shown in the "other industries" column. The specified other industries are listed at the end of the table if they account for more than \$2 million of the products primary to this chapter.

Product code	Industry, class of products, and miscellaneous receipts	All industries	Steel springs, except wire (SIC 3493)	Valves and pipe fittings (SIC 3494)	Wire springs (SIC 3495)	Miscellaneous fabricated wire products (SIC 3496)	Metal foil and leaf (SIC 3497)	Fabricated pipe and fittings (SIC 3498)	Fabricated metal products, n.e.c. Note: Data shown parenthetically are ranges expressed in millions of dollars.

- Represents zero. (X) Not applicable.

¹The totals for product classes 34961, 34964, 34965, 34966, and 34969 include, respectively, the totals for product classes 35151, 33157, 33575, 33156, and 33159. Shipments of these product classes totaled as follows:

Product class	Value (millions of dollars)
33151	270.2
33157	53.6
33575	33.9
33156	172.1
33159	390.0

TABLE 6A. Products and Product Classes—Quantity and Value of Shipments by All Producers: 1972 and 1967

(Includes quantity and value of the products reported not only by establishments classified in this industry, but also by establishments classified in other industries, and shipping these products as "secondary" products. See appendix, Explanation of Terms "Value of shipments")

34990 02	Fabricated metal products, n.e.c., n.s.k., for establishments with less than 10 employees. (See note.).....		(X)	89.1	(X)	20.2

Note: In the 1972 Census of Manufactures, shipments data for establishments of small companies, typically those with fewer than 10 employees, were estimated from administrative record data rather than collected from respondents. These shipments figures (which are further discussed in the text) are included in the code ending with "002." In both the 1972 and 1967 censuses of manufactures, products which were not completely identified on the standard forms were coded to the appropriate product-class code (5 digits) followed by "00," or in some cases to the appropriate product-group code (4 digits) followed by "000."

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.

¹For those product classes in this table that have undergone SIC revisions in 1972, the relationships between their SIC number on the new SIC basis and their SIC number on the old SIC basis are as follows:

New SIC	Old SIC	New SIC	Old SIC	New SIC	Old SIC	New SIC	Old SIC
34931 } 34932 } 34952 } 34953 }	34930 34812 34813	34961 34964 34965 34966	34811 34814 34815 34816	34969 34971 34972 34973 }	34819 34970	34991 34992 34993 34994 }	34920 34960 34990

²Data for product code 34931 08 are included with product code 34931 04 to avoid disclosing operations of individual companies.

³For 1967, product code 34941 60 is combined with product code 34941 40.

⁴Includes only the value of fittings and assemblies for tubing and hose reported as such. Furthermore, it represents, principally, fittings and assemblies reported by establishments classified in the Valves and Pipe Fittings Industry. An indeterminate amount of these products may have been classified by respondents as rubber hose and tubing (SIC 3041), flexible metal hose and tubing (SIC 3599), hardware hose fittings and couplings (SIC 3429), screw machine products (SIC 3451), and refrigeration machinery (SIC 3585).

⁵Annual data are published for these products in Current Industrial Reports, series MA-33B, "Steel Mill Products."

⁶More detailed data on converted aluminum foil are available in Current Industrial Reports, series MA-347, "Aluminum Foil Converted." That report contains data on poundages of aluminum foil converted by end use. However, it is not possible to precisely compare the data in this industry with data in the annual current industrial report. Some of the products for which aluminum foil consumption is reported in the annual survey are produced for use by the same company to package a commodity. In such cases, the converted aluminum foil product is not included in this industry but is included as a portion of the value of the packaged commodity.

⁷More detailed data are available in Current Industrial Reports, series M26F, "Converted Flexible Packaging Products." There are inconsistencies in classification between these two surveys.

⁸Safes and vaults are shown as fire-resistive or burglary-resistive, depending on the primary purpose for which they are built.

⁹Product code 34994 11 combined with code 34994 98 for 1967.

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes. Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

See footnotes at end of table.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

TABLE 6B. Product Classes—Value Shipped by All Manufacturing Establishments, by Geographic Area: 1972 and 1967—Continued

Statistics are shown for selected product classes which are economically significant and which have production that is geographically dispersed, provided that the dispersion is not approximated by the data in the geographic table for the industry (table 2) and they are not miscellaneous or "not specified by type" classes.

Product class values for some States are withheld to avoid disclosing figures for individual companies. Such States are shown with a value range.

34969	Made in fabricated wire products, n.e.c., (industry 3496) and other industries.....	457.5	467.8	424.2	472.7	441.9	374.5	181.6	143.2

(NA) Not available.

¹These figures are estimates derived from a representative sample of manufacturing establishments canvassed in the annual survey of manufactures and, therefore, may differ from the results that would have been obtained from a complete canvass of all manufacturing establishments. The standard errors associated with those estimates are published in the Annual Survey of Manufactures volumes for this period. The figures shown in parentheses for the value of shipments either have associated standard errors exceeding 15 percent or are not consistent with other Census series and related data. Thus, at the individual product-class level, the estimates may be of limited reliability; however, they may be combined with other product-class totals into broader aggregates which are of acceptable reliability.

²This product class was revised effective in 1972. See footnote 1, table 6A, for a comparison between the new SIC code and old SIC code for this product class.

³Some or all of the products primary to this industry are also primary to one other industry or more. The 4-digit product-group totals exclude the values produced by the other primary industries, and, therefore, are not comparable to product-group (4-digits) and product class (5-digits) totals shown in table 6A and table 6B, respectively.

⁴In 1958, combined data were collected for ferrous and nonferrous woven wire products. This estimate of ferrous wire cloth is based on the ratio of ferrous cloth to total wire cloth and other woven wire products for 1963.

TABLE 7A. Materials Consumed, by Kind: 1972 and 1967

- Represents zero. (X) Not applicable. (NA) Not available. (D) Withheld to avoid disclosing figures for individual companies.
(Z) Less than half the unit of measurement shown.

¹This item represents the total cost of materials for establishments that did not report detailed materials data. Also includes estimates for companies that were not mailed report forms.

²The figures for castings produced and consumed in the same establishment are iron castings, 176.2 thousand short tons in 1972 and 229.7 thousand short tons in 1967; steel castings, 11.7 thousand short tons in 1972 and 9.9 thousand short tons in 1967; copper and copper-base alloy castings, 107.9 million pounds in 1972 and 119.6 million pounds in 1967. Data for aluminum and aluminum-base alloy castings are not available.

³In 1972, the figure for iron and steel forgings produced and consumed in the same establishment was 32.6 thousand short tons, and 20.5 thousand short tons in 1967.

⁴Data for code 331015, Carbon steel structural shapes, have been combined with code 331019, All other carbon steel mill shapes and forms, in order to avoid disclosing figures for individual companies.

⁵Excludes quantities produced and consumed in the same establishment.

⁶Data on total consumption of aluminum foil are available, by end-use, in Current Industrial Reports, series MA-34P, "Aluminum Foil Converted." The data in the current industrial report include consumption by all establishments such as foil mills, foil converters, and others, including food processing and other establishments converting foil for purposes of packaging a product. Data in this report are limited to establishments classified in the metal foil and leaf industry.

⁷Included with material code 331019, "All other carbon steel mill shapes and forms."

⁸These figures are understated by \$45 million or less because of apparent undercoverage of carbon steel pipe and tube.

⁹No data are available on the quantities of castings or forgings produced and consumed in the same establishment.

¹⁰Includes cost for materials indicated by the symbol (D).

¹¹These figures are understated by \$10 million or less because of apparent undercoverage of carbon steel pipe and tube.

Note: In 1967, data for manufactured mixed gas, blast furnace gas, and coke oven gas were included in code 131300, natural gas. In 1971, data for these gases were included in code 960011, other fuels.

- Represent zero. (X) Not applicable. (NA) Not available. (S) Withheld because the estimates did not meet publication standards.
(Z) Less than half of the unit of measurement shown.

APPENDIX A. Explanation of Terms

Employment and Payrolls—The census of manufactures provides information on employment and payrolls at operating establishments and central administrative offices and auxiliaries. On the standard forms for manufacturing establishments, the number of production workers by quarter and all other employees during the pay period including March 12 was requested. Form NC-X6, "Central Administrative Office or Auxiliary Establishment," called for employment as of March 12 only. Both forms called for salaries and wages paid for the year.

All Employees—This category comprises all full-time and part-time employees who worked or received pay for any part of the pay periods including the 12th of the months specified on the report forms. Included are all persons on paid sick leave, paid holidays, and paid vacations during these pay periods. Excluded are members of the Armed Forces and pensioners carried on the active rolls but not working during the period. Officers of corporations are included as employees; proprietors and partners of unincorporated firms, however, are excluded.

In special cases, respondents were instructed to exclude agricultural or fishery employment and related data from their reports. These were sugar mills operated as part of plantations, canning or freezing plants operated in conjunction with farms, and fish processing plants engaged in fishing.

Production and Related Workers—This category includes workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspection, receiving, storage, handling, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., power plant), recordkeeping, and other services closely associated with these production operations at the establishment covered by the report. Supervisory employees above the working foreman level were excluded from this category.

All Other Employees—These are defined as nonproduction personnel, including employees engaged in the following activities: Factory supervision above the working foreman level, sales (including driver-salesmen), sales delivery (highway truckdrivers and their helpers), advertising, credit, collection, installation and servicing of own products, clerical and routine office functions, executive, purchasing, financing, legal, personnel (including cafeteria, medical, etc.), professional, and technical. Also included are employees on the payroll engaged in the construction of major additions or alterations to the plant and utilized as a separate work force.

Average Employment—The number of production workers as shown in the census tabulations is an average of the four quarterly figures reported by manufacturing plants. The "all employees" figure is the sum of this average and the reported number of other employees as of March 12.

Payrolls—This category includes the gross annual earnings of employees on the payroll. Respondents were told they could follow the definition of payrolls used for calculating the Federal withholding tax. This definition includes all forms of compensation such as salaries, wages, commissions, dismissal pay, bonuses, vacation and sick leave pay, and compensation in kind, prior to such deductions as employees' Social Security contributions, withholding taxes, group insurance, union dues, and savings bonds. The total includes salaries of officers of these establishments, if a corporation; it excludes payments to the proprietor or partners, if an unincorporated concern. Also excluded are payments to members of Armed Forces and pensioners carried on the active payroll.

The 1972 census definition of payrolls is identical to that recommended to all Federal statistical agencies by the Office of Management and Budget. This definition does not include supplementary labor costs such as employer's Social Security contributions and other legally required expenditures or payments for voluntary programs. Data on such supplementary labor costs were collected in the ASM and are scheduled for publication in the ASM reports, but are not included in the census reports.

Man-Hours—This total consists of all plant man-hours of production and related workers as defined above. It represents all man-hours at the plant including actual overtime hours—not straight-time equivalent hours. It excludes hours paid for vacations, holidays, or sick leave, when the employee was not actually at the plant. Where employees elected to work during the vacation period, the actual hours worked by such employees were reported.

Cost of Materials, Etc., Consumed—A summary inquiry on form MA-100 and the other manufacturing establishment report forms requested information on the cost of materials, supplies, semifinished goods, fuels, and electric energy actually consumed or put into production during the year and the cost of products purchased for resale, whether purchased, withdrawn from inventories, or received from other establishments of the company. Included, also, are the costs of materials supplied by the establishment which were processed elsewhere on contract for the establishment. "Cost" was defined as the direct charges actually paid or payable for items consumed or

put into production during the year, after discounts, and including freight charges and other direct charges incurred by the establishment in acquiring the materials.

To arrive at the industry total "cost of materials, etc.,"¹ separate figures were obtained for (a) the total delivered cost of all raw materials, semifinished goods, parts, components, containers, scrap, and supplies consumed or put into production, (b) the amount paid for electric energy purchased, (c) the amount paid for all fuels consumed for heat, power, or the generation of electricity, (d) the cost of work done by others on materials or parts furnished by the reporting establishment (contract work), and (e) the cost of products bought and resold in the same condition.

It should be noted that the cost of fuel consumed under (c), above, does not include fuel used as a material in the manufacturing process; for example, coal used in the production of coke. Such costs are included with other materials cost in category (a), above.

The total excludes the cost of services used, such as advertising, insurance, telephone, etc., and developmental, research, and consulting services of other establishments. It also excludes overhead costs, such as depreciation charges, rent, interest, royalties, etc., and materials, machinery, and equipment used in plant expansion or capitalized repairs which are chargeable to fixed assets accounts.

For materials received from other plants of the same company or from a central materials depot (whether at the same or different physical location), respondents were asked to value the items at their full economic value as produced, plus freight and other direct handling charges. The respondents were asked to check, where possible, that the cost equaled the value of shipments reported for the items by the company's plant which produced and transferred the goods, plus freight and other direct charges.

Value of Shipments—Except in a few industries, the respondents were instructed to report net selling values, f.o.b. plant, after discounts and allowances and excluding freight charges and excise taxes. For a few industries, specifically noted in the text of the industry chapters, Volume II, delivered prices were requested if delivery by employees of the establishment was a routine practice, as in the milk and bakery industries.

For most industries, value of shipments is readily available from accounting records and is closely related to the value of production. In a small group of industries, however, value of production or of work done was requested. This instruction was of particular importance in the aircraft and shipbuilding industries, where the shipments or deliveries of complete units

may be a poor approximation of the work actually done during a given year.

Manufacturers were asked to include as products shipped not only the products made in the establishment but also those made elsewhere under contract from the materials owned by the establishment. Included were all products sold, transferred to other parts of the same company, or shipped on consignment. The duplication in value of shipments and cost of materials arising because of the shipment of semifinished products among manufacturing plants is discussed in part III of the Introduction, which also includes comments on the valuation of intracompany shipments by multiunit firms.

Miscellaneous Receipts—In addition, manufacturers reported receipts for contract work performed for others, resales (that is, the value of all products resold without further processing), receipts for miscellaneous activities such as sale of scrap and refuse, and the value of installation and repair work performed by the plant employees. Although the value of products bought and resold without further processing is included in the value of shipments totals for each industry, it is excluded from the figures for individual products or classes of products.

Value Added by Manufacture—This figure is derived by subtracting the total cost of materials (including materials, supplies, fuel, electric energy, cost of resales, and contract work done by others) from the value of shipments, including resales, and other receipts and adjusting the resulting amount by the net change in finished products and work-in-process inventories between the beginning and end of the year.²

Value added avoids the duplication in the value of shipments figure which results from the inclusion of the shipments of establishments producing materials and components along with the shipments of establishments producing finished products. It is considered to be the best value measure available for comparing the relative economic importance of manufacturing among industries and geographic areas.

Inventories—The value of beginning-of-year and end-of-year inventories held by each manufacturing establishment was obtained in the 1972 census. Separate inventory figures were requested for (1) finished products, (2) work in process, and (3) materials, supplies, fuel, and other inventories.

Respondents were asked to report their inventories at approximate current costs, if feasible; otherwise, at book value. Since different methods of inventory valuation are used (LIFO, FIFO, etc.), the value of inventories aggregated for all

¹In some tables, this category is designated simply as "cost of materials."

²For a few industries (for example, aircraft and shipbuilding) where value of work done is substituted for value of shipments, no adjustment is made for change in inventories. In a few other industries where value of production is collected, the inventory adjustment is made only on the basis of change in work-in-process inventories.

establishments in an industry is not precisely defined. The importance of reporting inventories on a comparable basis was emphasized in the instructions; thus the year-to-year change in inventories indicated by the census figures is of more significance than their level.

In using inventory data by stage of fabrication for all industries and at the 2-digit industry level, it should be noted that an item treated as a finished product by one establishment may be reported as a material by another establishment. For example, the finished product inventories of a steel mill would be reported as materials by a stamping plant. Such differences are present in the inventory figures by stage of fabrication for individual industries, industry groups, and all manufacturing, since these figures are merely aggregates of the figures reported by establishments.

Multiunit companies were instructed to include the inventories held by each establishment in that establishment's report. The inventory data tabulated on a geographic basis are believed, therefore, to reflect the actual physical holdings in each area, to the extent that the inventories were owned by the reporting companies. It is not clear where goods owned by one company and stored by another were reported.

Special instructions on inventories were issued for two industries in the food group. Meatpacking establishments were told to report work in process separately only if separate records were maintained; otherwise, to combine work in process with finished products. Distillers were instructed to include stocks of liquors held for aging as finished products, not as work in process.

Capital Expenditures—Under this heading, manufacturers were instructed to report expenditures of the type chargeable to fixed assets accounts for which depreciation reserves are normally maintained. Actual capital outlays during the year were requested, not the final value of equipment put in place or structures completed during the year. It was suggested to the respondents that capital expenditures, as thus defined, could be computed by the following formula: The cost of additions completed during the year, plus construction in progress at the end of the year, less construction in progress at the beginning of the year. It was specified that the census definition of capital expenditures was to be used in computing the gross value of fixed assets discussed below.

Capital expenditures include the cost of plant and equipment for replacement purposes, as well as for additions to productive capacity. Cost associated with plants under construction but not in operation during the year are also included. The method of collecting data for plants under construction is described in the Introduction, section 7, "Reporting Forms." Capital expenditures do not include plant

and equipment furnished to the manufacturer without charge by governmental or private organizations. The value of rented facilities is also excluded.

New Structures and Additions to Plant—This category includes all construction and other land improvements, whether built on contract or by the manufacturer's own labor force. Included are major alterations; capitalized repairs; new elevators, cranes, heating and air-conditioning equipment essentially a part of buildings; fixed structures such as blast furnaces, brick kilns, fractionating towers, and shipways; and land improvements such as roads, fences, parking lots, and railroad spurs.

New Machinery and New Equipment—This category includes production and all other machinery and equipment. Included are motors, lathes, presses, looms, and other production machinery; office machines and fixtures; furniture; and automobiles, trucks, and handling equipment. Major repairs or improvement to existing equipment are included if the cost is capitalized, as well as equipment manufactured by the plant for use in its own production.

Used Plant and Equipment—This category represents expenditures for old or existing plants and for secondhand equipment acquired from others. Transfers of used equipment between plants of multiunit companies are included. The companies were instructed to report such transfers at their current value rather than original cost. The Census Bureau estimates of capital expenditures as compared to those published in the joint Bureau of Economic Analysis—Securities and Exchange Commission survey are discussed in the Introduction.

Fuels and Electric Energy—Separate data were collected in the census for coal, coke, fuel oil, gas, and other fuels used for heat and power; purchased electric energy, electric energy generated by manufacturing establishments; and energy generated less the amount sold. Fuels used as a raw material (as coal in the production of coke) are included in the cost of materials rather than in the fuel category.

Assets and Rents—Data on the gross value of fixed assets owned and rental payments for leased fixed assets were collected in the ASM. These figures are scheduled for publication in the ASM series, but are not included in the census volumes.³

³ Earlier reports on these topics include chapter 9 of volume I, Summary Statistics, in the 1958 census, and chapter 7 of the ASM volumes for 1964-1965, 1968-1969, and 1970-1971.

APPENDIX B Composition of Industries in the 1972 Standard Industrial Classification

The censuses of manufactures for 1972 and 1967 covered all establishments engaged in manufacture as defined, respectively, in the **Standard Industrial Classification Manual (SIC)**, 1972 edition, issued by the Office of Management and Budget. The 1972 edition contained major revisions in the SIC Manual for the manufacturing industries additional to those issued between 1957 and 1967.

For 1972, of the 422 manufacturing industries as defined in 1967, 121 were changed in some manner in 1972. This

appendix cites only those industries affected by a revision between 1967 and 1972. Presented in two parts, this appendix lists, in part 1A, the industries as defined for 1972 in terms of their 1967 equivalents and, in part 2A, the industries of 1967 in terms of their 1972 equivalents. The distribution of the 1972 SIC industries among the 1967 SIC industries is shown in part 1B. The distribution of the 1967 SIC industries among the 1972 SIC industries is shown in part 2B.

¹ No change in content.

² The classification of separate establishments milling or otherwise preparing nonmetallic minerals in this division and in industry 3295 has been clarified. Industry 3295 will include only establishments crushing or grinding or otherwise preparing minerals mined in industry groups 145 and 149, and industry 1472. Establishments crushing or grinding minerals mined in industry groups 142 and 144 and industries 1473 to 1479 are included in those same industries.

APPENDIX C. Reporting Forms

This appendix contains reproductions of a representative selection of the reporting forms used in the 1972 economic censuses, with emphasis on the Census of Manufactures. The uses of each of them is described in the Introduction, section 7.

APPENDIX C -Continued

DUE DATE: 20 DAYS AFTER RECEIPT OF FORM

O.M.B. No. 41-R2751; Approval Expires December 31, 1974

<p>FORM 17-30-73)</p> <p>NC-X1A (Item 1A)</p>	<p>U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS</p>	<p>1973 REPORT OF COMPANY ORGANIZATION</p>
<p>NOTE - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. This list should include establishments of your company and each of its subsidiaries. To make it easier for you to complete this report, we have prelisted information that you have previously provided to the Census Bureau.</p>		
<p style="text-align: center;">READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT</p>		

Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT

This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS forms 941, 943, or CT-1) or Federal income returns (IRS forms 1065, 1120, 1120S, or 990C).

In Item 1A, based on Census records, we have prelisted (in numeric sequence) all EI numbers and their associated names and addresses where available. Bring this list up-to-date by correcting the prelisted EI number and name and address information in column (a), and completing columns (b) through (d) as indicated.

For some prelisted EI numbers, name and address information was not available. Please enter the name and address that applies in each case.

EI numbers of your company and its subsidiaries that are not prelisted in Item 1A should be added in Item 1B. If your company or any of its subsidiaries uses different EI numbers for reporting employment and income, be sure that there is a separate entry for each such EI number in either Item 1A or 1B.

Line No.	Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information)	Employees (during the pay period including March 12, 1973)	Reporting status of EI number	Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated)
	(a)	(b)	(c)	(d)

	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes</p> <p>2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active</p> <p>2 <input type="checkbox"/> Inactive - Date _____</p> <p>3 <input type="checkbox"/> Sold - No./yr. of sale _____</p> <p>PURCHASER'S NAME _____</p> <p>NUMBER AND STREET _____</p> <p>CITY STATE ZIP CODE _____</p> <p>4 <input type="checkbox"/> Other - Explain _____</p>

Enter All Additional Employer Identification Numbers in Item 1B and Complete Items 2 through 5

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1A

A. DEFINITIONS

- ▶ **Census File Number**—A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2, and 5A. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in items 1B or 5B.
- ▶ **Employer Identification Number**—The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- ▶ **Company or Firm**—A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment**—A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services
 - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility Companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House to House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.

- ▶ **Subsidiary**—A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973**—All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments**—Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1—Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment**—This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS forms 941, 943, or CT-1) or income returns (IRS forms 1065, 1120, 1120S, or 990C).
- If your company or any of its subsidiaries uses different EI numbers in reporting employment and income (or the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A—Listing of Employer Identification Numbers (Based on Census Records)**—All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the pre-listed name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d).
- If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B—Your Listing of Additional Employer Identification Numbers**
- Column (a)**—List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
- Column (b)**—Report the number of employees during the pay period including March 12, 1973.
- Column (c)**—Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
- Column (d)**—Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "8" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2—Reconciliation of Employment Reported by EI Numbers and by Establishments**—Complete this item after you have finished items 5A and 5B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 5A and 5B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a)—The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

Column (b)—Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c)—For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 5A and 5B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 5A, and 5B for errors, omissions, or duplications.

If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in items 1A or 1B should have at least one establishment listed in item 5A or 5B; conversely, each establishment listed in item 5A or 5B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 5A or 5B. Therefore, in completing item 2 for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 5A or 5B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 5A or 5B for the income EI number. In completing item 2 for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3—Company Affiliation**—If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4—Certification**—After you have finished all items on the report, complete the certification as indicated.

- ▶ **Item 5—Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment**—This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 5A and 5B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 5A or 5B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 5A—Listing of Domestic Establishments (Based on Census Records)**—Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 5B—Your Listing of Additional Domestic Establishments**—List separately all domestic establishments of your company and its subsidiaries not prelisted in item 5A that are now in operation, under construction, or were in operation at any time during 1973. Please read the definition of an establishment above before completing this item.

Column (a)—Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b)—Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "None." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c)—Mark one box which best describes the principal business activity during 1973, mark Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Mark Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d)—List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

- ▶ **Instructions for (e) and (f)**—Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

- ▶ **NOTE**—After you have completed item 5, please be sure to complete items 2, 3, and 4 before returning this form.

Additional copies of items 1B, 2, and 5B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

To make it easier for you to complete this report, we have prelisted information that you have previously provided to the Census Bureau.</p> <p style="text-align: center;">READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT</p>				
<p>Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT</p> <p>This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS forms 941, 943, or CT-1) or Federal income returns (IRS forms 1065, 1120, 1120S, or 990C).</p> <p>If your company or any of its subsidiaries uses different EI numbers for reporting employment and income, be sure that there is a separate entry for each such EI number in either Item 1A or 1B.</p> <p>In Item 1A, based on Census records, we have prelisted (in numeric sequence) all EI numbers and their associated names and addresses where available. Bring this list up-to-date by correcting the prelisted EI number and name and address information in column (a), and completing columns (b) through (d) as indicated.</p> <p>For some prelisted EI numbers, name and address information was not available. Please enter the name and address that applies in each case.</p> <p>In Item 1B add EI numbers that are currently used by your company or its domestic and foreign subsidiaries that are not prelisted in Item 1A. List separately in column (a) all Employer Identification (EI) Numbers and their associated names and addresses used at any time during 1973. For each added EI number complete columns (b) through (d) as indicated.</p> <p>If you need more space for adding EI numbers, you may request additional pages or use a blank sheet of paper following the same format shown below in Item 1B. At the top of each sheet enter "Item 1B continued" and your company name, address, and Census File Number.</p>				
<p>Item 1A - LISTING OF EMPLOYER IDENTIFICATION NUMBERS (BASED ON CENSUS RECORDS)</p>				
Line number	Employer Identification (EI) Number, name, and mailing address (Please correct any errors and supply missing information)	Employees (during the pay period including March 12, 1973)	Reporting status of EI number	Status of company or subsidiary at the end of 1973 (Mark one box and complete as indicated)
	(a)	(b)	(c)	(d)
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes</p> <p>2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active</p> <p>2 <input type="checkbox"/> Inactive - Date _____</p> <p>3 <input type="checkbox"/> Sold - Mo./yr. of sale _____</p> <p>PURCHASER'S NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p> <p>4 <input type="checkbox"/> Other - Explain _____</p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes</p> <p>2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active</p> <p>2 <input type="checkbox"/> Inactive - Date _____</p> <p>3 <input type="checkbox"/> Sold - Mo./yr. of sale _____</p> <p>PURCHASER'S NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p> <p>4 <input type="checkbox"/> Other - Explain _____</p>
	<p>EMPLOYER IDENTIFICATION NUMBER</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes</p> <p>2 <input type="checkbox"/> No</p>	<p>1 <input type="checkbox"/> Active</p> <p>2 <input type="checkbox"/> Inactive - Date _____</p> <p>3 <input type="checkbox"/> Sold - Mo./yr. of sale _____</p> <p>PURCHASER'S NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p> <p>4 <input type="checkbox"/> Other - Explain _____</p>
<p>Item 1B - YOUR LISTING OF ADDITIONAL EMPLOYER IDENTIFICATION NUMBERS - USE ITEM 2B FOR LISTING ADDITIONAL ESTABLISHMENTS</p>				
Line number	Employer Identification (EI) Number, name, and mailing address	Employees (during the pay period including March 12, 1973)	Reporting status of EI number	Explanation of additional companies acquired, reorganized or newly organized under a distinct EI number during 1973
	(a)	(b)	(c)	(d)
	<p>EMPLOYER IDENTIFICATION NO. _____</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes</p> <p>2 <input type="checkbox"/> No</p>	<p>5 <input type="checkbox"/> Acquired - MONTH AND YEAR OF PURCHASE _____</p> <p>FORMER OWNER'S NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p> <p>6 <input type="checkbox"/> Newly organized - Date _____</p> <p>7 <input type="checkbox"/> Other - Explain _____</p>
	<p>EMPLOYER IDENTIFICATION NO. _____</p> <p>NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p>	(Number)	<p>Did you report Federal employment taxes under this EI number during 1973?</p> <p>1 <input type="checkbox"/> Yes</p> <p>2 <input type="checkbox"/> No</p>	<p>5 <input type="checkbox"/> Acquired - MONTH AND YEAR OF PURCHASE _____</p> <p>FORMER OWNER'S NAME</p> <p>NUMBER AND STREET</p> <p>CITY STATE ZIP CODE</p> <p>6 <input type="checkbox"/> Newly organized - Date _____</p> <p>7 <input type="checkbox"/> Other - Explain _____</p>

Please Complete Items 2 through 4

APPENDIX C-Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1B

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of **Items 1A, 2A, and 2B**. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in **Item 2B**.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
Company or Firm - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House-to-House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.
- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for **Item 1** of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS Forms 941, 943, or CT-1) or income returns (IRS Forms 1065, 1120, 1120S or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either **1A** or **1B**.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available.
If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS Forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d).
If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item **1A** or **1B** EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**
Column (a) - List separately each EI number not prelisted in **Item 1A** that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
Column (b) - Report the number of employees during the pay period including March 12, 1973.
Column (c) - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
Column (d) - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in **Item 1B** that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

▶ **Item 2 - Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in **Items 1A** and **1B**. If more than one EI number is assigned to an establishment, report the employment tax EI number in **Items 2A** and **2B**. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in **Item 2A** or **2B** for each employment tax EI number listed in **Item 1A** or **1B**.

▶ **Item 2A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. Identify in the establishment name those Leased Departments operated in a retail or service store as "leased dept." or "leased concession." The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

▶ **Item 2B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in **Item 2A** that were in operation, or under construction, during part or all of 1973. Please read the definition of an establishment above before completing this item.

Column (a) - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "none." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) - Mark one box which best describes the principal business activity during 1973. Check Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Check Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

Instructions for (e) and (f) - Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

Note - After you have completed item 2, please be sure to complete **Items 2C, 3, and 4** before returning this form.

▶ **Item 2C - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished **Items 2A** and **2B**. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in **Items 2A** and **2B** account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) - The Employer Identification (EI) Numbers are identical to those prelisted in **Item 1A**. Bring this list up-to-date by making the corrections previously made in **Item 1A** and adding any EI numbers that you added in **Item 1B**.
Column (b) - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both **Items 2A** and **2B**. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in **Items 1A, 1B, 2A, and 2B** for errors, omissions, or duplications. If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in **Item 1A** or **1B** should have at least one establishment listed in **Item 2A** or **2B**; conversely, each establishment listed in **Item 2A** or **2B** should have its EI number listed in **Item 1A** or **1B**. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in **Item 2A** or **2B**. Therefore, in completing **Item 2C** for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in **Item 2A** or **2B** with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in **Item 2A** or **2B** for the income EI number. In completing **Item 2C** for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

Additional copies of **Items 1B** and **2B** are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C—Continued

[illegible]

Please Complete Items 2 through 5

APPENDIX C-Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1A

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2, and 5A. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in items 1B or 5B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- ▶ **Company or Firm** - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services
- Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House to House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.

- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS forms 941, 943, or CT-1) or income returns (IRS forms 1065, 1120, 1120S, or 990C).
- If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available.
- If the EI number is currently used, correct any errors or omissions in the pre-listed name and address in column (a), report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d).
- If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**
- Column (a)** - List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
- Column (b)** - Report the number of employees during the pay period including March 12, 1973.
- Column (c)** - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
- Column (d)** - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

- ▶ **Item 2 - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished items 5A and 5B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 5A and 5B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) - The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

Column (b) - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 5A and 5B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 5A, and 5B for errors, omissions, or duplications.

If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in items 1A or 1B should have at least one establishment listed in item 5A or 5B; conversely, each establishment listed in item 5A or 5B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 5A or 5B. Therefore, in completing item 2 for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 5A or 5B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 5A or 5B for the income EI number. In completing item 2 for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

- ▶ **Item 5 - Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 5A and 5B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one plant number in item 5A or 5B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 5A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 5B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in item 5A that are now in operation, under construction, or were in operation at any time during 1973. Please read the definition of an establishment above before completing this item.

Column (a) - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "None." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) - Mark one box which best describes the principal business activity during 1973, mark Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Mark Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

- ▶ **Instructions for (e) and (f) - Answer question (e) for acquired establishments.** Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

- ▶ **NOTE** - After you have completed item 5, please be sure to complete items 2, 3, and 4 before returning this form.

Additional copies of items 1B, 2, and 5B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C-Continued

Form NC-X1B (Item 2A)		U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS		Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report	
1973 REPORT OF COMPANY ORGANIZATION					
Item 2 - DOMESTIC ESTABLISHMENTS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT AND PAYROLL This item should include an up-to-date list of all domestic establishments (business locations) of your company and its subsidiaries as identified in Items 1A and 1B that were in operation or under construction during part or all of 1973. Exclude establishments in foreign countries; include establishments in all territories and possessions (Puerto Rico, Virgin Islands, Canal Zone, Guam, American Samoa and Trust Territory of Pacific Islands). In Item 2A we have prelisted establishments of your company and its subsidiaries, based on Census records. Bring this list up-to-date by correcting any errors or omissions in the prelisted information in column (a) and completing columns (b) and (c) as indicated. Establishments not prelisted in item 2A should be listed by you in item 2B. If more than one EI number is assigned to this establishment, report the employment tax EI number in item 2A or 2B. Ordinarily, there should be at least one establishment in item 2A or 2B for each employment tax EI number listed in item 1A or 1B; if not, please explain in item 2C. NOTE: For your convenience in locating establishments prelisted below, they are grouped in the following sequence: Employer Identification Number, major kind of business, State, and city.					
Item 2A - LISTING OF DOMESTIC ESTABLISHMENTS (BASED ON CENSUS RECORDS)					
Line number	Employer Identification (EI) Number, major kind of business, establishment name, and address of physical location (including county and ZIP code) (Add store or plant number, if any, and correct any errors or omissions) (a)		1973 Establishment data Report number of employees and payroll (\$1,000) for each establishment including part year operations (b)		Status of establishment at the end of 1973 (Mark one box and complete as indicated) (c)
	EMPLOYER IDENTIFICATION NO.	MAJOR KIND OF BUSINESS	Employees (during the pay period including March 12, 1973) (Number)	Payroll for the 1st quarter of 1973 (\$1,000)	<input type="checkbox"/> In operation <input type="checkbox"/> Moved - Correct address in col. Enter All Additional Establishments in Item 2B; Then Complete Items 2C, 3, and 4

APPENDIX C -Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1B

A. DEFINITIONS

- ▶ **Census File Number** - A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page of items 1A, 2A, and 2B. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the pages used for any entries in item 2B.
- ▶ **Employer Identification Number** - The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by all business firms and other legal entities to file Federal employment tax returns such as Form 941, Employer's Quarterly Federal Tax Return and Federal Income Returns such as Form 1120, U.S. Corporation Income Tax Return, and Form 1065, U.S. Partnership Return of Income.
- Company or Firm** - A legal entity, such as a sole proprietorship, partnership, corporation, cooperative, investment trust, etc., including both profit and non-profit organizations.
- ▶ **Establishment** - A single physical location within the United States and its territories where business is conducted or where services or industrial operations are performed. (For example: a factory, mill, store, hotel, movie theater, mine, farm, ranch, bank, railroad depot, airline terminal, sales office, warehouse, or central administrative office.) Where distinctly separate activities are performed at a single physical location (such as contract construction activities operated from the same physical location as a lumber yard), each activity should be treated as a separate establishment.

SPECIAL INSTRUCTIONS FOR SELECTED INDUSTRIES AND/OR ACTIVITIES

Please refer to the enclosed, separate booklet entitled, "Special Instructions" before completing forms.

These instructions include a general definition of an Establishment, Payroll, Central Administrative Office (CAO) and Auxiliary establishment, how to report Non-establishment Employees and special instructions for companies with activities falling in the below listed categories.

- Construction (general contractors, special trade contractors, subdividers, and operative builders)
- Oil and Gas Field Operations
- Manufacturing
- Transportation and Public Utilities
- Wholesale, Retail, and Selected Services - Commission Agent/Broker and Merchant Wholesaler, Liquor Stores (Government Operated Reported by Agency or Officials), Appliance Sales by Public Utility companies, Department or Concessions, Leased Service Stations, Contract Food Operators, Mail Order Sales, Vending Machine Operations, and Direct Selling Operations (House-to-House), New Car Dealers, Automotive Rental and Leasing, Building Cleaning and Maintenance, Guard Service, Laundries, Dry Cleaners, Photofinishing Firms, Engineering (Consulting and Design), Liaison or Customer Contact Office.

- ▶ **Subsidiary** - A company which is owned or controlled by another firm or company. Subsidiaries include firms in which your company owns more than fifty percent of the outstanding voting stock, as well as affiliated firms in which your company has the power to direct or cause the direction of the management and policies.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** - All full-time and part-time employees on the payroll during the March 12 pay period. Include as employees all persons on paid sick leave, paid holidays, and paid vacations; include salaried officers and executives of incorporated firms. This definition is the same as the definition used for item 1 of Treasury Form 941, Employer's Quarterly Federal Tax Return.
- ▶ **Domestic Establishments** - Those establishments of your company and its subsidiaries that are physically located in the United States and its territories and possessions (Puerto Rico, Canal Zone, Virgin Islands, Guam, American Samoa, and Trust Territory of Pacific Islands).

B. INSTRUCTIONS

- ▶ **Item 1 - Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** - This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries to report either Federal employment taxes (IRS Forms 941, 943, or CT-1) or income returns (IRS Forms 1065, 1120, 1120S or 990C). If your company or any of its subsidiaries uses different EI numbers in reporting employment and income for the same legal entity, be sure there is a separate entry for each such number in either 1A or 1B.
- ▶ **Item 1A - Listing of Employer Identification Numbers (Based on Census Records)** - All EI numbers (based on Census records) have been prelisted in numeric sequence. Their associated names and addresses are also prelisted where available. If the EI number is currently used, correct any errors or omissions in the prelisted name and address in column (a); report in column (b) the number of employees on the payroll during the pay period including March 12, 1973; indicate in column (c) whether the EI number is used in reporting Federal employment taxes on IRS Forms 941, 943, or CT-1. If the EI number is not used to file these IRS forms, column (b) should be zero. If the EI number is active, mark box "1" in column (d). If the EI number is no longer used by your company or its subsidiaries, but was used during the first quarter 1973 complete columns (b) and (c). In column (d) mark boxes 2-4 that apply. If operations previously reported under a prelisted EI number are now included under another EI number of your company, mark box "4" and indicate the item 1A or 1B EI number under which you are now reporting these activities. On the other hand, if you sold all the activities of a subsidiary but retained the EI number, mark box "3" and complete as indicated.
- ▶ **Item 1B - Your Listing of Additional Employer Identification Numbers**
Column (a) - List separately each EI number not prelisted in item 1A that is currently used by your company or its domestic and foreign subsidiaries. Also enter the name and mailing address of the subsidiary.
Column (b) - Report the number of employees during the pay period including March 12, 1973.
Column (c) - Indicate whether the EI number is used to report Federal employment taxes; if not, column (b) should be zero.
Column (d) - Mark the box which describes the reason for adding the EI number to the list. If you transferred operations from one EI number of your company and its subsidiaries to another EI number, mark box "7" and enter the former EI number. If you add a firm that was acquired through the purchase of stock, assets, etc., mark box "5" and report the date of purchase and the former owner's name and address. Also report this information for any subsidiary listed in item 1B that was specifically set up by your company to take over the operations of an acquired company, even though the acquired company was dissolved or liquidated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

- ▶ **Item 2 - Domestic Establishments of your Company and its Subsidiaries, and Their 1973 Employment** - This item should include an up-to-date list of all domestic establishments of your company and its subsidiaries as identified in items 1A and 1B. If more than one EI number is assigned to an establishment, report the employment tax EI number in items 2A and 2B. Except in these cases and for EI numbers used for activities wholly outside the United States and its territories and possessions, be sure there is at least one establishment in item 2A or 2B for each employment tax EI number listed in item 1A or 1B.

- ▶ **Item 2A - Listing of Domestic Establishments (Based on Census Records)** - Review each prelisted establishment. For establishments still in operation, correct any errors or omissions in the prelisted name, address, and EI number in column (a). Make sure that the address represents the ACTUAL PHYSICAL LOCATION, not a mailing address. If you assign a store or plant number to each of your establishments, please enter this number in the space provided. Identify in the establishment name those Leased Departments operated in a retail or service store as "leased dept." or "leased concession." The major kind of business description in column (a) is based on information previously reported to the Census Bureau.

For each establishment still in operation, mark box "1" in column (c) and report employees and payroll in column (b). If the establishment has changed its location (moved), mark box "2" and make necessary corrections in column (a) by lining out the imprinted information and writing in the new information above it. For establishments no longer in business, mark box "3," "4," or "6" in column (c) to explain the reason for the deletion. If operations previously reported under a prelisted EI number are now included under another EI number of your company, do not report these changes as a "sale" but correct the EI number in column (a). If you ceased operations at a location and then sold the building, report these cases as "closed," mark box "4," and give the date of closing.

- ▶ **Item 2B - Your Listing of Additional Domestic Establishments** - List separately all domestic establishments of your company and its subsidiaries not prelisted in item 2A that were in operation, or under construction, during part or all of 1973. Please read the definition of an establishment above before completing this item.

Column (a) - Provide the EI number, name, and address of the physical location of each added establishment. If you have assigned a store or plant number to any of these locations, also enter this in the space provided. In all cases, be sure to provide complete address information including the number and street, city, State, ZIP code, and county.

Column (b) - Report the number of employees on the establishment payroll during the pay period including March 12, 1973. If the location had no employees during the pay period, enter "none." Report first quarter establishment payroll and annual payroll before deductions in thousands of dollars.

Column (c) - Mark one box which best describes the principal business activity during 1973. Check Auxiliary for any establishment primarily engaged in performing supporting services for your own or affiliated company rather than your customers or clients. Check Central Administrative Offices (CAO) for an establishment primarily engaged in management and general administrative functions.

Column (d) - List in order of importance the principal products mined or made, kinds of retail or wholesale business, types of services performed or kind of construction work done and indicate the approximate percentage each was of your total receipts.

Instructions for (e) and (f) - Answer question (e) for acquired establishments. Complete (f) if the establishment is not yet in operation. Enter month and year you expect it to begin operation and the expected employment when fully operational.

Note - After you have completed item 2, please be sure to complete items 2C, 3, and 4 before returning this form.

- ▶ **Item 2C - Reconciliation of Employment Reported by EI Numbers and by Establishments** - Complete this item after you have finished items 2A and 2B. This item is to provide you and the Bureau of the Census with a systematic procedure for determining if the updated list of establishments in items 2A and 2B account for ALL DOMESTIC ACTIVITIES of your company and its subsidiaries.

Column (a) - The Employer Identification (EI) Numbers are identical to those prelisted in item 1A. Bring this list up-to-date by making the corrections previously made in item 1A and adding any EI numbers that you added in item 1B.

Column (b) - Enter the corresponding number of employees for each EI number. If the EI number has no employees, enter "None."

Column (c) - For each EI number, enter the sum of the employment figures for each establishment of the EI number, as reported in both items 2A and 2B. Compare this figure with the entry in column (b) and enter the difference in column (d). Where differences in excess of 5% or 500 employees occur, examine the data that you reported in items 1A, 1B, 2A, and 2B for errors, omissions, or duplications. If the difference still exists, please explain in column (e). In all cases except the three listed below, each EI number listed in item 1A or 1B should have at least one establishment listed in item 2A or 2B; conversely, each establishment listed in item 2A or 2B should have its EI number listed in item 1A or 1B. The three exceptions are:

1. If your company or any of its subsidiaries has been assigned an EI number covering activities wholly outside of the United States and its territories, it is not necessary to include the establishments covering these foreign activities in item 2A or 2B. Therefore, in completing item 2C for EI numbers assigned to your foreign activities, enter "Foreign" in column (b) and ignore columns (c) through (e).
2. If your company reports employment and income under different EI numbers for the same legal entity, you should report the establishments of this firm only once in item 2A or 2B with the EI number used to report employment taxes. In these cases, therefore, there will be no establishment in item 2A or 2B for the income EI number. In completing item 2C for these EI numbers, enter "None" in column (b) and indicate the appropriate employment tax EI number(s) in column (e).
3. If your company or any of its subsidiaries became inactive after March 12, 1973 pay period, complete columns (b)-(e). If there was an EI change or EI used only part of the year complete columns (b)-(e) if applicable.

- ▶ **Item 3 - Company Affiliation** - If your company is owned or controlled by another company, i.e., your company is a subsidiary, enter the name, address and EI number of your parent company.

- ▶ **Item 4 - Certification** - After you have finished all items on the report, complete the certification as indicated.

APPENDIX C-Continued

FORM NC-X1C (Item 1A) <small>U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS</small>		<small>O.M.B. No. 41-R2751; Approval Expires December 31, 1974</small>	
1973 REPORT OF COMPANY ORGANIZATION (This page includes Items 1A and 1B)		NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.	
Please complete this report within 20 days after receipt and RETURN THIS COPY TO BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130		Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report	
NOTE - The purpose of this form is to obtain an accurate and up-to-date list of your establishments, i.e., separate business locations that were in operation, or under construction during part or all of 1973. To make it easier for you to complete this report, we have pre-listed information that you have previously provided to the Census Bureau. READ THE INSTRUCTIONS ON THE REVERSE SIDE BEFORE COMPLETING THIS REPORT		Company name and address (Please correct any errors in name and address including ZIP code)	
Item 1 - EMPLOYER IDENTIFICATION NUMBERS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT This item should include a list of all Employer Identification (EI) Numbers currently used by your company and its domestic and foreign subsidiaries in reporting either Federal employment taxes (IRS Forms 941, 943, or CT-1) or Federal income returns (IRS Forms 1065, 1120, 1120S, or 990C). In Item 1A , based on Census records, we have prelisted your company's EI number and name and address. Please make any corrections necessary to update these entries. Also complete columns (b) and (c) as indicated. In Item 1B add EI numbers that are currently used by your company that are not prelisted in Item 1A . List separately in column (a) all Employer Identification (EI) Numbers and their associated names and addresses. For each added EI number complete columns (b) and (c) as indicated. If you need more space for adding EI numbers, you may request additional pages or use a blank sheet of paper following the same format shown below in Item 1B . At the top of each sheet enter "Item 1B continued" and your company name, address, and Census File Number.			
Item 1A - LISTING OF YOUR EMPLOYER IDENTIFICATION NUMBER (BASED ON CENSUS RECORDS)			
Line No.	Employer Identification (EI) Number, name, and mailing address <small>(Please correct any errors and supply missing information)</small> (a)	Employees (during the pay period including March 12, 1973) (b)	Status of company or subsidiary at the end of 1973 <small>(Mark one box and complete as indicated)</small> (c)

Instructions on Reverse Side

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1C

A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and Its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in Item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and Its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in Item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in Item 2B for each location. Also if you added additional EI numbers in Item 1A, list the individual locations for each EI number in Item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD → $\frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C—Continued

<small>Form NC-X1C (Item 2A)</small> <small>(7-30-73)</small>		<small>U.S. DEPARTMENT OF COMMERCE</small> <small>SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION</small> <small>BUREAU OF THE CENSUS</small>		Refer to this CENSUS FILE NUMBER in any correspondence pertaining to this report	
1973 REPORT OF COMPANY ORGANIZATION					
<p>Item 2 – DOMESTIC ESTABLISHMENTS OF YOUR COMPANY AND ITS SUBSIDIARIES, AND THEIR 1973 EMPLOYMENT AND PAYROLL</p> <p>This item should include an up-to-date list of all domestic establishments (business locations) of your company and its subsidiaries that were in operation, or under construction, during part or all of 1973.</p> <p>In Item 2A we have prelisted establishments of your company based on Census records. Bring this list up-to-date by correcting any errors or omissions in the prelisted information in column (a) and completing columns (b) and (c) as indicated. Establishments not prelisted in Item 2A should be listed by you in Item 2B.</p> <p>Be sure that there is at least one establishment in Item 2A or 2B for your company and each subsidiary listed in items 1A and 1B.</p>					
Item 2A – LISTING OF DOMESTIC ESTABLISHMENTS (BASED ON CENSUS RECORDS)					
Line No.	Employer Identification (EI) Number, major kind of business, establishment name, and address of physical location (including county and ZIP code) <small>(Add store or plant number, if any, and correct any errors or omissions)</small>		1973 Establishment data		Status of establishment at end of 1973 <small>(Mark one box and complete as indicated)</small>

Enter All Additional Establishments in Item 2B; Then Complete Items 3 and 4

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1C

A. DEFINITIONS

- ▶ **Census File Number** – A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** – The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** – A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** – Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period Including March 12, 1973** – All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** – The gross earnings paid to employees prior to any deductions.

B. INSTRUCTIONS

- ▶ **Item 1 – Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** – List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A – Listing of Your Employer Identification Number (Based on Census Records)** – We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B – Your List of Additional Employer Identification Numbers** – If you purchased another company or organized a subsidiary company, enter each additional EI number in item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A – Establishments of Your Company and its Subsidiaries, and Their 1973 Employment and Payroll** – We have prelisted the individual business locations (establishments) that make up the EI number in item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B – Your Listing of Additional Domestic Establishments** – If you added additional business locations under your original EI number, report in item 2B for each location. Also if you added additional EI numbers in item 1A, list the individual locations for each EI number in item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE – If figure is \$25,428.28:

$$\bullet \text{ PREFERRED METHOD } \longrightarrow \frac{25}{(\$1,000)}$$

Column (c) – Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 – Company Affiliation** – If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 – Certification** – After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

APPENDIX C—Continued

INSTRUCTIONS FOR COMPLETING FORM NC-X1C

A. DEFINITIONS

- ▶ **Census File Number** — A Census File Number has been assigned to your company and appears in the upper right-hand corner of each page which contains prelisted information. Always refer to the complete number in any correspondence with the Census Bureau in order to expedite a reply. Also, be sure to fill in the Census File Number in the upper right-hand corner of the page(s) used for any entries in item 2B.
- ▶ **Employer Identification Number** — The nine-digit taxpayer identification number assigned by the Internal Revenue Service and used by employers to file Quarterly Federal Tax Return (IRS 941) and Federal income returns (such as Form 1120, U.S. Corporation Income Tax Return and Form 1065, U.S. Partnership Return of Income).
- ▶ **Establishment** — A single physical location where business is conducted or services performed.
- ▶ **Subsidiary** — Another company that is owned or controlled by your firm.
- ▶ **Number of Employees During the Pay Period including March 12, 1973** — All full-time and part-time employees on the payroll during the March 12 pay period. Report the same number of employees you reported on IRS Employers Form 941 or 943.
- ▶ **Payroll** — The gross earnings paid to employees prior to any deductions.

B. INSTRUCTIONS

- ▶ **Item 1 — Employer Identification Numbers of Your Company and its Subsidiaries, and Their 1973 Employment** — List all Employer Identification (EI) Numbers used by your company to report either Federal employment (IRS Form 941, 942 or 943) or income (IRS Forms 1065, 1120, 1120S or 990C).
- ▶ **Item 1A — Listing of Your Employer Identification Number (Based on Census Records)** — We have listed your EI number as reported to the Census Bureau in the past. Please correct any errors or omissions in the prelisted name and address in column (a) and complete columns (b) and (c). If the EI number was only used to report employment and income for part of 1973, enter the part year information and the status of the company at the end of the year.
- ▶ **Item 1B — Your List of Additional Employer Identification Numbers** — If you purchased another company or organized a subsidiary company, enter each additional EI number in item 1B and complete columns (b) and (c) for each EI number. In column (c) mark the box which describes the reason for adding the EI number to the list.
- ▶ **Item 2A — Establishments of Your Company and its Subsidiaries, and Their 1973 Employment and Payroll** — We have prelisted the individual business locations (establishments) that make up the EI number in item 1A. Please correct the name or address if necessary and complete columns (b) and (c) for each location. Estimates are acceptable if book figures are not readily available.
- ▶ **Item 2B — Your Listing of Additional Domestic Establishments** — If you added additional business locations under your original EI number, report in item 2B for each location. Also if you added additional EI numbers in item 1A, list the individual locations for each EI number in item 2B. The addresses should represent the physical location, not a mailing address. If your employment and payroll records are not kept for individual locations, estimate for the separate locations. Report First Quarter establishment payroll and Annual payroll in thousands of dollars.

EXAMPLE — If figure is \$25,428.28:

• PREFERRED METHOD → $\frac{25}{(\$1,000)}$

Column (c) — Mark one box which best describes the principal business activity during 1973. In column (d) enter the most important products you sell or the major service you offer. Be as specific as possible for the correct industrial classification of your operations.

- ▶ **Item 3 — Company Affiliation** — If your company is owned or controlled by another company, i.e., your company is considered a subsidiary, enter the name, address, and EI number of your parent company.
- ▶ **Item 4 — Certification** — After you have finished all items on the report, complete the certification as indicated.

Additional copies of items 1B and 2B are available upon request. If you prefer, you may use your own paper to list additional subsidiaries, EI numbers and establishments; in such instances, however, please follow the same format as shown on the report form. Be sure to enter the item number, your company's name and address, and the Census File Number in the upper right-hand corner of each additional sheet.

PENALTY FOR FAILURE TO REPORT DUE DATE: **FEBRUARY 15, 1973** Form Approved: O.M.B. No. 41-571021

Form NC-X6 (Rev.) SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION BUREAU OF THE CENSUS

1972 ECONOMIC CENSUSES
CENTRAL ADMINISTRATIVE OFFICE OR
AUXILIARY ESTABLISHMENT

PLEASE COMPLETE THIS FORM AND RETURN TO **BUREAU OF THE CENSUS**
1201 East Tenth Street
Jeffersonville, Indiana 47130

PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT
If calendar year records are not available, fiscal year reports for the periods ending between October 31, 1972 and February 28, 1973 are acceptable. If book figures are not available, carefully prepared estimates are acceptable. If filing by due date causes an undue burden, a request for an extension of time should be sent to the above address. Please mention the 11-digit Census File Number in the upper left of the address box if you write regarding this report.
This report should cover ONLY the establishment identified in the address box.
(Please correct any error in name and address including ZIP code)

NOTICE - Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

In correspondence pertaining to this report please refer to this Census File Number Employer Identification Number

ITEM 1 NAME AND PHYSICAL LOCATION OF ESTABLISHMENT
The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that the data can be tabulated in the correct geographic area.
a. Name of this establishment, IF DIFFERENT from that appearing in the address box. Name
b. Is your business establishment PHYSICALLY located at the address shown in the address box of this form?
☐ YES - Proceed to c and d ☐ NO - Enter PHYSICAL location Also answer c and d
If location cannot be described by street name and number, give as much information as possible such as name of shopping center, street intersection, highway number or distance from nearest town, etc.
Street name and number
Place (city or village, etc.) State ZIP code
c. Is this business establishment located WITHIN the LEGAL boundaries of the city, village, etc., which you indicate is its PHYSICAL location? 1 ☐ Yes 2 ☐ No
d. In what county is your business establishment PHYSICALLY located? County

ITEM 2 EMPLOYER IDENTIFICATION NUMBER
a. Is the Employer Identification (EI) Number printed in the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941? ☐ Yes ☐ No - If "No," enter the currently assigned EI number here (9 digits)
b. Did this establishment also use any other Employer Identification (EI) Number during 1972? ☐ Yes - If "Yes," enter EI number(s) (9 digits) ☐ No

ITEM 3 LEGAL FORM OF ORGANIZATION OF COMPANY OPERATING THIS ESTABLISHMENT (MARK ONE)
010 ☐ 1 Individual proprietor ☐ 8 Co-op (cooperative association), corporate or noncorporate
☐ 2 Partnership ☐ 9 Other - Specify
☐ 0 Corporation (Do NOT mark if any form of cooperative association)

ITEM 4 PRINCIPAL ACTIVITY OF THIS ESTABLISHMENT IN 1972
Mark the ONE item that BEST describes the PRINCIPAL activity of this establishment. If none applies, mark item (j) and enter a description of your principal activity. MARK ONE ITEM ONLY.
011 ☐ 1 a. Centralized administration (i.e., supervisory functions of a central, home, general, branch, divisional or district office) ☐ 3 c. Warehousing ☐ 4 f. Trading stamp redemption
☐ 2 b. Management and other supporting services (e.g., purchasing or buying office, accounting office, legal office, public relations office, etc.) ☐ 7 d. Chainstore warehousing (i.e., a combination of administrative and warehousing activities described in a, b, and c) ☐ 8 g. Selling
☐ 2 e. Research, development, and testing ☐ 9 h. Repair service
☐ 9 j. Other ☐ 6 i. Electronic data processing

ITEM 5 PRINCIPAL ACTIVITIES OF YOUR COMPANY SERVICED BY THIS ESTABLISHMENT IN 1972
a. Does this establishment perform the above described management, general administrative functions, or other supporting services primarily for establishments of your company (rather than for other business firms or for the general public)? 012 ☐ 1 Yes - Complete items 5b, c, and d ☐ 2 No - Skip to item 6
b. Does this establishment perform these management and administrative functions or services for all establishments of your company? ("Your company" refers to the parent firm and all its subsidiaries under common ownership or control.) 013 ☐ 1 Yes ☐ 2 No
c. Mark the principal kind of business or industrial activity of the establishments of your company that are managed or serviced by this central office or auxiliary.
014 ☐ 1 Minerals extraction, quarrying, production, or exploration ☐ 3 Construction (including general contracting, subcontracting, home building, and land subdividing and developing)
☐ 2 Manufacturing (fabricating, assembling, or processing materials into new products; also includes publishing and printing) ☐ 4 Manufacturer sales branches or other wholesale operations
☐ 5 Retail stores ☐ 6 Other - Describe
d. List in order of importance, the principal products made, kinds of retail or wholesale business operated, types of services rendered, or construction activities performed by the establishments that are managed or serviced by this central office or auxiliary.
(1) (3)
(2) (4)

IMPORTANT - Figures for dollars should be reported in thousands. If you wish you may report to the nearest dollar. In either case, please be careful to enter your figures in the correct columns.
EXAMPLE: If payroll is \$1,125,628

PREFERRED method . . . 1 126
Acceptable method . . . 1 125 628

ITEM 6 PAYROLL AND EMPLOYMENT AT THIS ESTABLISHMENT DURING 1972
a. Payroll - Report the payroll of persons employed at this establishment, including its traveling personnel. Do not include the payroll of employees working in or from other establishments of your company, however, even though paid from this location. (The number and payroll of such employees should be included in the 1972 Census reports for the establishments at which they were actually employed.)
b. Employment by function - Report the number of employees employed at this establishment according to the principal functions performed during the pay period including March 12, 1972.
Where records do not provide actual employee counts in terms of the functions listed, estimates of the approximate number in each are acceptable. Those persons performing a variety of functions should be reported in their PRIMARY activity during that pay period, or allocated on some other reasonable and consistent basis (e.g., by converting the total number of man-hours or man-days expended during the pay period into the average number of employees in each activity).
c. Were the employees and payroll reported above also reported in any other 1972 Census establishment report form of your company i.e., in the Census Forms MA-, MC-, CB-, or CC-series?
a. Payroll during 1972. (Enter the total wages, salaries, bonuses, commissions, and other remuneration paid to employees of this establishment during 1972, before payroll deductions) Key Mil. Thou. Dol.
050
b. Employment by function for pay period including March 12, 1972 Key Number of employees
(1) Centralized administration (e.g., various management functions of a general, home, or district office) 051
(2) Research, development, and testing 052
(3) Warehousing 053
(4) Sales to customers directly from this location 054
(5) Trading stamp redemption 055
(6) Electronic data processing 056
(7) Other - Specify 057
(8) TOTAL NUMBER OF EMPLOYEES (Sum of lines 1 through 7) 058
Yes - If "Yes," please give the 11-digit CENSUS FILE NUMBER of that report
No

ITEM 7 SALES MADE BY THIS ESTABLISHMENT DURING 1972 TO CUSTOMERS OUTSIDE YOUR COMPANY		Key	Mil.	Thou.	Dols.												
<p>a. Report all sales made by this establishment during 1972 (merchandise sales, receipts for services, and other business receipts) to customers outside your company. Include excise taxes and sales taxes paid directly to taxing agencies. Exclude intracompany transfers to other domestic establishments of your company; however, include export transfers to your foreign subsidiaries. Exclude sales to outside customers made by OTHER establishments of your company, even though billed centrally by this establishment. (Report such sales on the 1972 Census forms of these other establishments.)</p> <p>b. List principal products sold or services rendered by this establishment to customers outside your company, and their approximate percent of 1972 sales and receipts, as reported in item 7a above.</p> <table border="1"> <thead> <tr> <th>Principal products sold or services rendered</th> <th>Percent of sales and receipts in 1972</th> <th>Principal products sold or services rendered</th> <th>Percent of sales and receipts in 1972</th> </tr> </thead> <tbody> <tr> <td>(1)</td> <td>%</td> <td>(3)</td> <td>%</td> </tr> <tr> <td>(2)</td> <td>%</td> <td>(4)</td> <td>%</td> </tr> </tbody> </table>		Principal products sold or services rendered	Percent of sales and receipts in 1972	Principal products sold or services rendered	Percent of sales and receipts in 1972	(1)	%	(3)	%	(2)	%	(4)	%	060			
Principal products sold or services rendered	Percent of sales and receipts in 1972	Principal products sold or services rendered	Percent of sales and receipts in 1972														
(1)	%	(3)	%														
(2)	%	(4)	%														
<p>ITEM 8 BILLINGS BY THIS ESTABLISHMENT IN 1972 TO RETAIL STORES OF YOUR COMPANY</p> <p>Report at cost value all merchandise billed by this establishment in 1972 to retail stores of your company. Include all billings, whether or not the merchandise was shipped directly by the supplier to your retail stores or shipped from this establishment. Exclude purchases made directly by your individual stores. Exclude billings to establishments other than your retail stores. Exclude sales to retail stores of other companies, and franchise sales (which should be reported in item 7a above.)</p>		Total billings by this establishment in 1972 to retail stores of your company	065														
<p>ITEM 9 INVENTORIES AT BEGINNING AND END OF 1972</p> <p>Report all inventories of this establishment at current cost (if feasible), rather than sales price. Exclude inventories reported by other establishments of your company on their 1972 Census establishment forms.</p>		Value of inventories of this establishment:															
		a. BEGINNING of 1972	088														
		b. END of 1972	089														
<p>ITEM 10 CAPITAL EXPENDITURES FOR THIS ESTABLISHMENT DURING 1972 (EXCLUDE LAND AND MINERAL RIGHTS)</p> <p>Report all capital expenditures actually made during 1972 for this establishment, including major alterations, capitalized repairs and improvements. "Capital expenditures" refer to all costs that are chargeable to property accounts for which depreciation or amortization accounts are ordinarily maintained. Include the cost of all improvements and new construction at this establishment which were in progress but had not been completed at the end of 1972. Include expenditures made by your company (or any of its subsidiaries) for structures which, upon completion, were or are to be sold and leased back to this establishment. Include transfers of used plant and equipment to your establishment from other establishments of your company. Exclude the cost of land and mineral rights. Exclude the cost of maintenance and repairs charged as current operating expense. Exclude capital expenditures made by outside owners of property rented or leased to this establishment. Exclude capital expenditures made by this establishment for other locations of your company.</p>		Type of capital expenditures:															
		a. New structures and additions to plant	070														
		b. New machinery and new equipment	071														
		c. Used plant and used equipment acquired from others (including transfers from other establishments of your company)	072														
		d. TOTAL CAPITAL EXPENDITURES DURING 1972 (Sum of lines a, b, and c)	074														
<p>ITEM 11 CHANGES IN GROSS VALUE OF DEPRECIABLE ASSETS OF THIS ESTABLISHMENT DURING 1972</p> <p>Report the changes in gross value of depreciable assets of this establishment for which depreciation or amortization accounts are ordinarily maintained. "Gross value" represents the acquisition cost (original cost or other basis) to your company of such depreciable assets. Include all depreciable assets (buildings, structures, machinery, equipment, etc.) and all amortizable fixed assets. Include all improvements and new construction "in progress" during 1972 but not yet completed at the end of 1972. Also include the value of depreciable assets owned by this establishment but leased or rented to other companies. Include the value of depreciable assets owned by your company or any of its subsidiaries but "leased" to this establishment. Exclude the value of depreciable assets at other locations of your company (or any of its subsidiaries) for which this establishment maintains records.</p>		a. Gross value of depreciable assets at BEGINNING of 1972	075														
		b. Total capital expenditures during 1972 (Copy figure from item 10d)	076														
		c. Gross value of depreciable assets sold, retired, transferred, scrapped or destroyed during 1972	078														
		d. Gross value of depreciable assets, at END of 1972 (Should equal lines a + b - c. If not, please comment in "Remarks.")	079														
<p>ITEM 12 RENTAL PAYMENTS MADE FOR THIS ESTABLISHMENT DURING 1972 (EXCLUDE LAND)</p> <p>Report all rental payments made or accrued during 1972 to OUTSIDE firms which own the plant and equipment rented or leased by this establishment. Exclude rental payments made by this establishment to your parent company or any of its subsidiaries. (The gross value of such company-owned assets should be reported in item 11, however, as if actually owned by this establishment.) Exclude rental payments made by this establishment for plant and equipment located at other establishments of your company. In reporting rents paid (or equivalent charges) for use of "Buildings and structures," exclude separately identified fees for leasing of land (such as ground rents). Under "Machinery and equipment," be sure to include rental payments, (or equivalent charges), for use of transportation equipment, office equipment, computer systems, passenger cars, and all other types of machinery or equipment.</p>		Rental payments made for this establishment:															
		a. For use of BUILDINGS AND STRUCTURES (excluding land)	085														
		b. For use of MACHINERY AND EQUIPMENT	086														
		c. TOTAL RENTAL PAYMENTS (Sum of lines a and b)	087														
<p>ITEM 13 COST OF RESEARCH AND DEVELOPMENT PERFORMED AT THIS ESTABLISHMENT DURING 1972</p> <p>"Cost" should include all costs incurred at this establishment during 1972 to support research and development activities (i.e. wages and salaries; direct materials costs; services and supporting costs; and an appropriate share of depreciation and overhead). If this establishment performed research and development for the Federal government or for other companies on contract during 1972, include the total amount charged for such work performed. (Also, report such receipts in item 7 above.) If this establishment performed research and development for your own company or its subsidiaries, include the total amount of company funds provided for such work performed.</p>		Type research and development performed:															
		a. Federal contracts and subcontracts	095														
		b. Research and development performed with other (non-Federal) funds from outside your company	096														
		c. Research and development performed with funds from within your company	097														
		d. TOTAL COST OF RESEARCH AND DEVELOPMENT DURING 1972 (Sum of lines a, b, and c)	098														
<p>ITEM 14 WAREHOUSE STORAGE SPACE, AS OF DECEMBER 31, 1972</p> <p>If you reported any employees in item 6b, line (3) "Warehousing," complete this item. Exclude floor space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc.</p>		Occupable floor space (under roof) - occupied and unoccupied - of this establishment	099														
Remarks																	
<p>ITEM 15 Name and address (including ZIP code) of person to contact regarding this report</p> <p>Telephone</p> <p>Area code Number Extension</p>

APPENDIX C—Continued

PENALTY FOR FAILURE TO REPORT

DUE DATE FEBRUARY 15, 1973

O.M.B. No. 41-S-1047: Approval Expires December 31, 1974

FORM NC-K1 (9991) U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION BUREAU OF THE CENSUS		NOTICE —Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.
1972 ECONOMIC CENSUSES COMPANY SUMMARY REPORT		In correspondence pertaining to this report please refer to CENSUS FILE NO.
PLEASE COMPLETE THIS FORM AND RETURN TO BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130		Name and address—Please correct errors in name, address and ZIP code. ENTER street and number if not shown.
If filing by due date causes an undue burden, a request for an extension of time should be sent to the above address.		

PLEASE READ INSTRUCTIONS BEFORE COMPLETING REPORT

This form will provide you and the Bureau of the Census with a systematic means for assuring that all domestic activities of your company and its subsidiaries have been accounted for in the 1972 Censuses of Business (i.e., Retail Trade, Wholesale Trade, Selected Services), Construction, Manufactures, and Mineral Industries. For the purposes of this report, "domestic" activities should include all 50 States and the District of Columbia. It should not include activities of your firm in foreign countries. (Note—Your Puerto Rico activities, if any, should be included in items 2 and 3 below but excluded from items 4 through 11 on page 2 of this report.)

Please complete Form NC-K1, "Company Summary Report," after you have prepared all required 1972 Census establishment reports for your company and its subsidiaries, but before you return these completed reports to the Bureau of the Census. Preparing this Company Summary Report prior to returning the completed establishment reports may help you to discover more readily and to correct promptly any omission or duplication of reports for those establishments which should be covered in the 1972 Economic Censuses. In turn, this will speed up the Census Bureau's processing of your company report forms and will minimize any correspondence regarding coverage.

ITEM 1 GENERAL INFORMATION

a. Name of company _____		c. Legal form of organization of company—Mark one <input type="checkbox"/> 1 Individual proprietor <input type="checkbox"/> 2 Partnership <input type="checkbox"/> 3 Corporation (Do not mark if any form of cooperative association.) <input type="checkbox"/> 4 Co-op (Cooperative association), corporate or noncorporate <input type="checkbox"/> 5 Other—Specify _____	
b. Company organization Is the above-named company owned or controlled by another company? (If "Yes," please give employer identification number, company name, and address of controlling company.) <input type="checkbox"/> Yes → Employer Identification Number (9 digits) → _____ <input type="checkbox"/> No → Company name _____ Street name and address _____ City _____ State _____ ZIP code _____			

ITEM 2 EMPLOYMENT SUMMARY OF YOUR COMPANY AND ITS SUBSIDIARIES DURING 1972

Column (a) lists the Employer Identification (E.I.) Numbers assigned to your company, based on information you reported on the 1972 Census Form NC-X1 (A, B, or C), "Report of Company Organization." Column (b) lists the number of paid employees for the pay period including March 12, 1972, also as reported on Census Form NC-X1 (A, B, or C). Please update this list to correct any errors and to add to column (a) any E.I. numbers covering domestic activities which are not listed, but which were used by your company or any of its domestic subsidiaries at any time during 1972. Then, complete columns (b) through (h) for each E.I. number—either prelisted or added by you. (Use item 2 Continuation sheet if necessary.)

NOTE: All employment figures (columns b through d) are for the pay period including MARCH 12, 1972

Line number	Employer Identification Number(s) used by your company during 1972	Number of employees as previously reported on Census Form NC-X1 (A, B, or C)	Employees in domestic establishments as reported on your 1972 Census forms for the pay period including March 12, 1972	Employees in domestic establishments as reported on your 1972 Economic Census forms (i.e., agriculture; railroads; pipelines; radio and TV stations; insurance agencies; banks, etc.)	Description of these activities not reported on your Census forms	Total payroll for the year 1972 for these activities not reported on your Census forms THOUSANDS OF DOLLARS (\$000) (f)	Is this E.I. number used to report Federal employment taxes? MARK (X)		FOR CENSUS USE ONLY
							YES (g)	NO (h)

9	Subtotal from item 2 Continuation sheet, if any								
10	TOTAL All Employer Identification Numbers								

ITEM 3 COVERAGE CHECK OF COMPANY EMPLOYMENT TOTALS

a. Comparison of COMPANY employment with ESTABLISHMENT employment for the pay period including March 12, 1972. Enter employment totals from item 2, line 10: (1) From column (c), total _____ (2) From column (d), total _____ (3) Sum of figures above _____ (4) Sum of company employment for pay period including March 12, 1972. (From column (b), total) _____	b. If the two figures in lines (3) and (4) of item 3a differ by more than 5 percent, please verify the reported figures in item 2. (For each Employer Identification Number, compare the column (b) figure with the sum of columns (c) and (d). These totals should ordinarily be equal for each E.I. number, if all employment has been accounted for.) If, after such verification, a company-wide difference in excess of 5 percent still exists, please explain: _____

INSTRUCTIONS FOR SELECTED COMPANY STATISTICS FOR 1972 (ITEMS 4 - 11)

Please report the following items on a consolidated basis for the DOMESTIC ACTIVITIES of your company and ALL its subsidiaries. Do not include foreign activities, if any, (except for reporting foreign assets in item 11). Consolidate all domestic activities, whether or not covered in the 1972 Census by individual report forms. If calendar year records are not available, fiscal year reports for the periods ending between October 31, 1972 and February 28, 1973 are acceptable. If book records are not available, enter your best estimates. Before completing these items, please read the detailed instructions.

IMPORTANT - Figures for dollars should be reported in thousands. If you wish you may report to the nearest dollar. In either case, please be careful to enter your figures in the correct column.

EXAMPLE: If payroll is \$1,125,628

PREFERRED method . . . \$ 1 125 628
Acceptable method . . . \$ 1 125 628

Item	Description	Key	Mil.	Thou.	Dol.
ITEM 4	COMPANY PAYROLL DURING 1972 Report total wages, salaries, bonuses, commissions, and other remuneration paid by your company and its subsidiaries at domestic establishments and facilities during 1972 before payroll deductions.				
	Total company payroll during 1972	050	\$		
ITEM 5	COMPANY SALES AND RECEIPTS DURING 1972 Report consolidated net sales and business receipts of your company and its subsidiaries during 1972. Exclude domestic intra-company transfers; exclude sales BY foreign subsidiaries; exclude non-operating income. Include sales to customers OUTSIDE your company; include excise taxes and sales taxes paid by your company directly to Federal, State, or local taxing agencies; include export transfers TO your foreign subsidiaries.				
	a. Net company sales and business receipts during 1972	060			
	b. Does the entry in 5a above include Yes No excise and sales taxes paid directly to taxing agencies? 1 <input type="checkbox"/> 2 <input type="checkbox"/>	061			
	c. If "No," report here the amount of such taxes paid by your company and its subsidiaries during 1972	062			
ITEM 6	CAPITAL EXPENDITURES DURING 1972 (EXCLUDE LAND AND MINERAL RIGHTS) Report all capital expenditures actually made during 1972 by your company and its subsidiaries for all domestic establishments and facilities. "Capital expenditures" refer to all costs that are chargeable to fixed assets accounts of your company for which depreciation or amortization accounts are ordinarily maintained; include major alterations, capitalized repairs and improvements; include expenditures made in 1972 for establishments under construction but not yet in operation. Exclude capital expenditures made by owners of property rented or leased by your firm and its subsidiaries; include expenditures made by your firm and its subsidiaries for structures which, on completion, were or are to be sold and leased back by your firm. Exclude cost of land, mineral rights, and cost of maintenance and repair charged as current and operating expenses; exclude capital expenditures by subsidiaries in foreign countries.				
	Type of capital expenditures				
	a. New structure and new additions to plant	070			
	b. New machinery and new equipment	071			
	c. Used plant, machinery, and equipment acquired from others	072			
	d. Capitalized development and exploration of mineral properties	073			
	e. TOTAL CAPITAL EXPENDITURES DURING 1972 (Sum of lines a, b, c, and d)	074			
ITEM 7	CHANGES IN DEPRECIABLE ASSETS DURING 1972 Report the value of depreciable assets of your company and its subsidiaries for which depreciation or amortization accounts are ordinarily maintained. "Gross value" represents the acquisition cost (original cost or other basis) to your company of such fixed depreciable assets. Include depreciable assets for all domestic establishments and facilities. Exclude depreciable assets of your company and its subsidiaries in foreign countries. These assets should be reported in item 11c below. Include all depreciable assets (buildings, structures, equipment, etc.) and amortizable fixed assets. Exclude depletable assets (land, timber, and mineral rights) and non-fixed assets (inventories, cash, accounts receivable, etc.) These assets should be reported in item 11b below. Include in the value of assets all improvements and new construction that were "in-progress" but not yet completed at the end of 1972. Also include the value of depreciable assets (machinery, equipment, buildings, structures, computer equipment, etc.) owned by your company and its subsidiaries, but leased or rented to other companies.				
	a. Gross value (original cost or other basis) of depreciable assets owned by your company, as of BEGINNING of 1972	075			
	b. Total capital expenditures DURING 1972 (Copy figure from item 6e.)	076			
	c. Other acquisitions by your company (by merger, exchange of stock, etc.) of depreciable assets DURING 1972 (if not included in line b above)	077			
	d. Deductions from depreciable assets DURING 1972 (i.e., gross value of assets sold, retired, scrapped, or destroyed; and other adjustments)	078			
	e. Gross value (original cost or other basis) of depreciable assets owned by your company, as of END of 1972 (Lines a + b + c - d)	079			
ITEM 8	CHANGES IN DEPRECIATION RESERVES DURING 1972 In line a include total depreciation reserves as of the beginning of 1972 for the assets included in item 7, line a. In line b include additions made to depreciation reserves during 1972 for assets owned at the beginning of the year or acquired during the year. Exclude depletion reserves and reserves for intangible assets. Exclude depreciation of assets held in foreign countries. Such assets should be reported in item 11c below.				
	a. Accumulated depreciation as of BEGINNING of 1972	080			
	b. Depreciation charges against assets DURING 1972, (including charges against those acquired or completed during the year)	081			
	c. Additions charged to other accounts DURING 1972	082			
	d. Deductions from reserves for retirements, renewals, and replacements during 1972	083			
	e. Accumulated depreciation as of END of 1972 (Lines a + b + c - d)	084			
ITEM 9	RENTAL PAYMENTS MADE DURING 1972 (EXCLUDE LAND) Report all rental payments made or accrued during 1972 to other firms which own the plant and equipment rented or leased by your company and its subsidiaries. In reporting rents paid (or equivalent charges) for use of "Buildings and structures," exclude separately identified fees for leasing of land (such as ground rents). Under "Machinery and equipment," be sure to include rental payments (or equivalent charges) for use of production machinery, office equipment, computer systems, passenger cars, trucks, materials handling equipment, and all other types of machinery or equipment.				
	Rental payments made by your company				
	a. For use of BUILDINGS AND STRUCTURES (excluding land)	085			
	b. For use of MACHINERY AND EQUIPMENT (including furniture and fixtures)	086			
	c. TOTAL RENTAL PAYMENTS DURING 1972 (Sum of lines a and b)	087			
ITEM 10	INVENTORIES, AS OF BEGINNING AND END OF 1972 Report all inventories of your company and its subsidiaries at the beginning and end of 1972 on a comparable basis. Inventories should include: finished products; work-in-process; and materials, supplies, fuels, etc. Exclude inventories of subsidiaries in foreign countries. In aggregating the inventories of your company and its subsidiaries, report value on a current cost basis, if feasible, otherwise at book value.				
	Value of inventories:				
	a. All inventories, as of BEGINNING of 1972	088			
	b. All inventories, as of END of 1972	089			
ITEM 11	TOTAL COMPANY ASSETS, AS OF END OF 1972 Report the balance sheet assets of your company and its subsidiaries on a consolidated basis. Lines a and b should include only domestic assets of your company and its subsidiaries. Line c should include all assets of your company and its subsidiaries in foreign countries, regardless of type. Report all foreign assets on a NET basis. (Line c)				
	Type of company assets:				
	a. Net value of depreciable assets (Should equal line 7e less 8e)	090			
	b. All other domestic assets (i.e., inventories, cash, accounts receivable, land, etc.)	091			
	c. Net foreign assets (i.e., assets located in foreign countries)	092			
	d. TOTAL COMPANY ASSETS, AS OF END OF 1972 (Sum of lines a, b, and c)	093

PENALTY FOR FAILURE TO REPORT DUE DATE: FEBRUARY 15, 1973 Form Approved: O.M.B. No. 41-571102

Form MC-36B (3602) U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMIN. BUREAU OF THE CENSUS

1972 CENSUS OF MANUFACTURES SWITCHGEAR AND SWITCHBOARD APPARATUS AND INDUSTRIAL CONTROL

Please complete and return this form as soon as possible after receipt to: BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130

PLEASE READ ACCOMPANYING INSTRUCTION SHEET AND INSTRUCTIONS WITH EACH ITEM BEFORE COMPLETING

If book figures are not available, carefully prepared estimates are acceptable. Complete every item. Please enter the 11-digit number in the Census File Number space provided at the top of all odd-numbered pages.

If filing by due date causes an undue burden, a request of an extension of time should be sent to the above address. Please mention the 11-digit Census File Number in the upper left of the address box if you write regarding this report.

NOTICE — Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees, and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process.

In correspondence pertaining to this report, please refer to this Census File Number: Employer Identification Number

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

ITEM 1A PHYSICAL LOCATION OF MANUFACTURING ESTABLISHMENT

The purpose of this inquiry is to determine the place (city, county, etc.) where your plant is actually located (which may differ from the mailing address) so that the data can be tabulated in the correct geographic area.

a. Is your manufacturing establishment physically located at the address shown in the address box in the right hand corner of this form?

☐ NO — Enter PHYSICAL location here

Also answer b and c

Street name and number

Place (City or village, etc.)

State ZIP code

☐ YES — Answer b and c

If location cannot be described by street name and number, give as much information as possible such as street intersection, highway number or distance from nearest town, etc.

b. Is your manufacturing establishment located WITHIN the LEGAL boundaries of the city, village, etc., which you indicate is its PHYSICAL location?

☐ YES ☐ NO

c. In what county is your manufacturing establishment PHYSICALLY located?

County

Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4e (Total man-hours)	\$	\$1 — \$10	b. Hours worked per week per production worker	Item 4e (Total man-hours) ÷ 20 ÷ item 2f (Average number of production workers)	Hrs.	20 — 60	c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 18 (Total value of shipments)	\$	05¢ — 95¢	d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 18 (Total value of shipments)	\$	05¢ — 95¢
"Reasonableness" checks	Calculation required for each check	Figures for 1972	Usual range																				
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) ÷ item 4e (Total man-hours)	\$	\$1 — \$10																				
b. Hours worked per week per production worker	Item 4e (Total man-hours) ÷ 20 ÷ item 2f (Average number of production workers)	Hrs.	20 — 60																				
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) ÷ item 18 (Total value of shipments)	\$	05¢ — 95¢																				
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) ÷ item 18 (Total value of shipments)	\$	05¢ — 95¢																				
e. Is the total for Value of Shipments (item 18) greater than the sum for payroll (item 3Ac) plus total Cost of Materials, etc. (item 5f)? <input type="checkbox"/> YES <input type="checkbox"/> NO — Explain in "Remarks"

		Signature of authorized person	Title			Date

INSTRUCTIONS FOR COMPLETING THE 1972 CENSUS OF MANUFACTURES FORMS

GENERAL INSTRUCTIONS

A separate Census report is required for each business location. Therefore, based on Census records, a report form is provided for each location which your company operated in 1972.

For purposes of the Census, a manufacturing establishment is defined as a single physical location where manufacturing operations are performed (e.g., a factory, mill, or plant). Thus a separate report is required for different physical locations even though the establishments may be engaged in the same line of manufacturing.

Please note that establishments engaged in the following activities are also considered to be manufacturing for the purposes of this Census: Poultry dressing; milk pasteurizing and bottling; seafood, fresh packaged or frozen; apparel jobbing and contracting, logging camps and logging; sawmills; printing; publishing—book, magazine, periodical, etc.; manufacturing and delivering ready-mixed concrete; machine shops, including those operating on a job order basis; job casting, stamping, machining; plating, galvanizing, polishing materials owned by others, etc.; ship and boat repairing.

In completing this report, a limited amount of prorating or estimating is acceptable if book records are not readily available. Include all the activities conducted within the establishment: e.g., manufacturing, fabricating, processing,

and assembling; maintenance of plant and equipment; receiving, shipping, warehousing, storage; research; recordkeeping; health, safety, cafeteria, and other services.

Each report should cover the calendar year 1972. However, a report is required even if the establishment operated only part of the year. If your book records are not on a calendar year basis, carefully prepared estimates will be acceptable. If reporting on a calendar year basis will require considerable additional costs, and your fiscal year covers at least 10 months of the calendar year 1972 (i.e., ends between October 31, 1972 and February 28, 1973) you may report on a fiscal year basis. However, all employment, payroll, and man-hour figures should relate to the calendar year rather than the fiscal year. (Calendar year payroll records should be available from your tax records.)

In the certification, enter the exact dates of the period covered by the report. If the ownership changed during the year, complete the report only for that part of 1972 in which your company owned and operated the establishment. Report in item 13 the appropriate information on changes in ownership or operations.

If additional report forms are needed, write to the Bureau of the Census, 1201 East Tenth Street, Jeffersonville, Indiana 47130. Be sure to describe the type of activity of the establishments for which the additional report forms are requested.

INSTRUCTIONS FOR ITEMS 1 THROUGH 14

- **Item 1A and 1B—Physical Location and Employer Identification Number**—Accurate and precise information on the physical location of each establishment is needed in order to prepare the tabulations of manufacturing activity in each State, county, and city. Each establishment has tentatively been coded geographically based on the street address in the mailing label, on the assumption that the physical location and mailing address are the same. Please be certain to complete item 1A, part a, if this is not so. Item 1A, part b, and part c, must be completed even if the physical location and the mailing address are identical. Although the system devised by the Census Bureau codes adequately to State and county in all instances, in many localities it cannot clearly distinguish an address that is in the city from one that is out of the city.

Be certain to enter in item 1B, the current Employer Identification Number if it is different from the one printed in the address label. This information is needed so that the Census Bureau can avoid sending duplicate report forms for the same location. Our file of new business formations is based on the new employer identification numbers issued each year. However, we exclude mailing report forms to new employer identification numbers if we identify them as belonging to existing respondents.

(Definitions of employees and payrolls used to calculate withholding taxes generally may be followed in completing items 2 and 3A, Employment and Payrolls.)

- **Item 2—Number of Employees**—Report employees at the establishment who worked or received pay for part of the pay period including the 12th of specified months (March, May, August, and November). Include all persons on paid sick leave, paid holidays, and paid vacation during these pay periods; exclude members of Armed Forces and pensioners carried on your active rolls. Include officers at this establishment, if a corporation; if an unincorporated concern, exclude proprietor, or partners.
- **Items 2a–2d—Number of Production Workers**—Workers (up through the working foreman level) engaged in fabricating, processing, assembling, inspecting, receiving, packing, warehousing, shipping (but not delivering), maintenance, repair, janitorial, watchman services, product development, auxiliary production for plant's own use (e.g., powerplant), recordkeeping, and other closely associated services. Exclude proprietors and partners.
- **Item 2g—All Other Employees**—Nonproduction personnel, including those engaged in the following activities: supervision above working foreman level, sales (including driver salesmen), sales delivery (truck drivers and helpers), advertising, credit, collection, installation and servicing of own product, clerical and routine office functions, executive, purchasing, finance, legal, personnel (including cafeteria, etc.), professional and technical. Exclude proprietors and partners.

- **Item 3A—Payrolls**—Report the gross earnings paid in the calendar year to employees at the establishment prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and saving bonds.

Include in gross earnings commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind.

Include salaries of officers of this establishment, if a corporation; if an unincorporated concern, exclude payments to proprietors or partners.

Exclude payments to agricultural employees, fishermen, members of the Armed Forces, and pensioners carried on your active payroll.

- **Item 4—Plant Man-Hours of Production Workers by Quarter**—Include all man-hours worked or paid for, except hours paid for vacations, holidays, or sick leave. If an employee elects to work during the vacation period, report only actual hours worked by such employee. Overtime hours should be reported as actual hours worked, not straight-time equivalent hours.

- **Item 5—Cost of Materials**—Report total cost of the materials actually consumed or put in production during the year.

If there are no records of consumption, purchases may be reported instead for minor items. This can also be done for major items if purchases do not differ significantly from the amounts actually used. Where consumption of major items differs significantly from purchases, consumption may be estimated by adding beginning inventories to the amount purchased and subtracting ending inventories.

Cost is delivered cost—i.e., the amount paid or payable after discounts and including freight and other direct charges incurred by the establishment in acquiring the materials.

Include all materials received for consumption; i.e., purchases from other companies, transfers from other establishments of your own company, withdrawals from inventories.

If the establishment produces items subsequently consumed in further production, report cost of original materials consumed only.

- **Item 5a—Cost of Materials, Parts, Components, Containers, etc., Consumed**—The delivered cost figures reported in item 5a should cover all raw materials, containers, scrap, and supplies, etc., which were: (1) put into production, (2) used as operating supplies, (3) used in repair and maintenance. Item 5a should be consistent with the data in item 17.

Include also cost of materials owned by you but consumed by other companies to make products for your establishment under contract. (The value of these products should be reported in item 18). Amounts paid to other companies for such contract work should be reported on Line 5e and should include freight in and out.

Include only physical goods used or put into production.

Exclude services used or overhead charges, such as advertising, telephone, telegram and cable, insurance, development and research, services of engineering, management, marketing and other professional consultants, etc., unless charges for such services are included in the prices paid for materials.

Exclude also overhead items such as depreciation charges against plant and equipment; rent and rental allowances; interest payments, royalties, and patent fees.

Exclude materials, supplies, machinery, and equipment which were used in the construction of new structures or additions to your plant, or new machinery and equipment, and which are chargeable to fixed assets accounts. Exclude products purchased and resold without further manufacture or processing or assembly; their costs should be included in item 5b.

- **Item 5b—Cost of Products Bought and Resold**—Report the cost of all products bought and resold in the same condition as when purchased and not made part of another product manufactured by this establishment. (Total sales value of all products resold is to be reported in item 18 on the line for resales.)

- **Item 5c—Cost of Fuels Consumed**—Report the total amount actually paid or payable during the year for all fuels consumed for heat, power, transportation, or the generation of electricity. Do not include the estimated cost of fuels, such as sawdust or blast furnace gas, produced as a by-product of your manufacturing activities. Include anthracite and bituminous coal, coke, natural and manufactured gas, fuel oil, liquefied petroleum gas, gasoline, and all other fuels including purchased steam.

- **Item 5d—Cost of Purchased Electricity**—Report the total amount actually paid or payable for electric energy purchased during the year from other companies, or received from other establishments of your company. Exclude the value of electricity generated and used at this establishment.

- **Item 5e—Cost of Contract Work Done for You by Others on Your Materials**—If any contract work was done by others on materials furnished by your establishment, report the total payments made during the year for such work, including freight out and in. Exclude the cost of materials worked on, which should be included in item 5a.

- **Item 6—Inventories of This Establishment at Beginning and End of Year**—Inventories should be reported at approximate current costs, if feasible; otherwise at book values. It is important that inventories should be reported on a comparable basis at the beginning and end of year.

- **Item 7—Capital Expenditures During Year (Exclude expenditures for land)**—Include all cost actually incurred during 1972 chargeable to the fixed assets accounts and of the type for which depreciation or amortization accounts are ordinarily maintained.

- **Item 7a—New Structures and New Additions to Plant (Exclude expenditures for land)**—Report total expenditures during the year for new construction (whether constructed on contract or by your own forces), major alterations, capitalized repairs, and improvement of buildings (including all new elevators, cranes, heating and ventilating equipment essentially a part of the buildings), other fixed structures (such as blast furnaces, brick kilns, fractionating towers, shipways, and similar types of structures), and site improvements (such as roads, docks, tracks, parking lots, fences, utilities).

- **Item 7b—New Machinery and New Equipment**—Report total expenditures at this establishment for new production machinery and equipment and other new machinery and equipment. Include replacements as well as additions to capacity. Include all new motors, lathes, punch presses and similar machinery and equipment for use in production, as well as all new office machines and fixtures, furniture, cafeteria and dressing room furnishings, automobiles and trucks, and other similar equipment. Report value of improvement and capitalized repairs to machinery and equipment, whether repairs and improvements were purchased or made by employees of your company.

- **Item 7c—Used Plant and Used Equipment Acquired From Others**—Report total expenditures at this establishment for old or existing plants and for second-hand equipment acquired from others (including the U.S. Government). Include at approximate market value machinery or equipment transferred from other plants of your company.

- **Items 13 and 14—Change in Ownership or Company Affiliation and Organization**—Please complete these items fully if pertinent. Accurate completion of these items will avoid unnecessary correspondence, as well as reduce the possibility of your receiving more than one report form for the manufacturing activity at this location.

APPENDIX C—Continued

QUALITIES FOR FAILURE TO REPORT **DUE DATE: FEBRUARY 15, 1973**

Form Approved: O.M.B. No. 41-571102

RETURN THIS COPY TO: Bureau of the Census
Jeffersonville, Indiana 47130

ITEM 1 a. Is this establishment still located in the State, county, and place shown below? (If blank or incomplete, please complete (1) through (4).)
☐ YES - Skip to part b ☐ NO - Correct or complete lines (1) through (4)

(1) Number and street _____
(2) City, village, or other place _____ State _____ ZIP code _____
(3) County _____ (4) If you corrected lines 1, 2, or 3, give year moved to new location. 19____

b. Is this establishment physically located WITHIN THE LEGAL BOUNDARIES of the city, village, or other place?
☐ YES ☐ NO

c. Is the Employer Identification (EI) Number printed in the address box the SAME as that used for this establishment on your latest Employer's Quarterly Federal Tax Return, Treasury Form 941?
☐ YES ☐ NO - Enter currently assigned EI No. here _____

Please correct errors in name, address and ZIP code. ENTER street and number if not shown.

Be sure to read Instruction Manual before completing report. Report items 3-11 in THOUSANDS (Example: If total payroll is \$215,166, enter \$215).

Complete each item, enter "0" when appropriate		Key	1972	1971	Complete each item, enter "0" when appropriate		Key	1972	Key	1971

ITEM 15 CHECKS to assure a complete and accurate report	The Census Bureau reviews your report for omissions, inconsistencies, and unusual ratios. To save you future correspondence about these problems, please make the following checks before returning your report: (1) Review the report carefully to see that no items are omitted for the year being covered. (2) Calculate and enter figures for the four "reasonableness" checks below, and review the results. (3) Correct your report for any errors you find and explain unusual figures in "Remarks." For most manufacturing establishments, the figures computed usually fall within the ranges indicated.				
"Reasonableness" checks		Calculation required for each check	Figures for 1972	Usual range	
a. Average hourly wages per production worker	Item 3Aa (Production workers' wages) - item 4e (Total man-hours)		\$	\$1 - \$10	
b. Hours worked per week per production worker	Item 4e (Total man-hours) x 20 - item 2f (Average number of production workers)		Hrs.	20 - 60	
c. Salaries and wages per dollar of shipments	Item 3Ac (Total payroll) - item 9p (Total value of shipments)		¢	05¢ - 95¢	
d. Materials cost per dollar of shipments	Item 5f (Total materials cost) - item 9p (Total value of shipments)		¢	05¢ - 95¢	
a. Is the total for Value of Shipments (item 9p) greater than the sum for Payroll (item 3Ac) plus total Cost of Materials, etc. (item 5D)? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks"					
f. Is the gross value of depreciable assets (item 10c) minus total capital expenditures (item 7d), within 5% of gross depreciable assets at the beginning of the survey year? <input type="checkbox"/> YES <input type="checkbox"/> NO - Explain in "Remarks"					
Remarks

APPENDIX C—Continued

PENALTY FOR FAILURE TO REPORT		DUE DATE: FEBRUARY 15, 1973		Form Approved: O.M.B. No. 41-571116	
Form CB-511 U.S. DEPARTMENT OF COMMERCE SOCIAL AND ECONOMIC STATISTICS ADMINISTRATION BUREAU OF THE CENSUS 1972 CENSUS OF BUSINESS MANUFACTURERS' SALES BRANCHES AND SALES OFFICES ELECTRICAL MACHINERY, EQUIPMENT, AND SUPPLIES		NOTICE —Response to this inquiry is required by law (Title 13, U.S. Code). By the same law, your report to the Census Bureau is confidential. It may be seen only by sworn Census employees and may be used only for statistical purposes. The law also provides that copies retained in your files are immune from legal process. In correspondence pertaining to this report, please refer to this Census File Number: CB-511 (5110)			
Please complete this form and RETURN TO: BUREAU OF THE CENSUS 1201 East Tenth Street Jeffersonville, Indiana 47130		Employer Identification Number: _____			
Important - Please read ■ Please answer the questions on this form and return it as soon as you can, but not later than February 15, 1973. If filing by the due date causes an undue burden, a request for extension should be sent to the address shown above. ■ This report should cover the calendar year 1972. If book figures are not available, carefully prepared estimates are acceptable. ■ A separate report is required for each sales branch and sales office operated during 1972. Each sales office without stock should be reported separately as well as each sales branch carrying stocks of merchandise from which deliveries are made to customers. Sales branches and sales offices located at plants or administrative offices should be reported on this form where separate records are available, or if substantially accurate reports can be prepared. Employment, payroll, inventories, and operating expenses reported here should not be included in manufacturer's plant report (MC series). Sales, however, will to some extent duplicate shipments on your plant reports. ■ This report should cover only the establishment identified in the address box.		KEEP THIS COPY FOR YOUR FILES PLEASE COMPLETE AND RETURN THE FORM WHICH SHOWS YOUR NAME AND ADDRESS			
Item 1 - PHYSICAL LOCATION OF BUSINESS ESTABLISHMENT a. The purpose of this inquiry is to determine the place (city, county, etc.) where your business is actually located (which may differ from the mailing address) so that data can be tabulated in the correct geographic area. b. Is this business establishment PHYSICALLY located at the address shown in the address box of this form? <input type="checkbox"/> YES - Answer b and c <input type="checkbox"/> NO - Enter PHYSICAL location Also answer b and c c. In what county is this business establishment PHYSICALLY located? <input type="checkbox"/> YES <input type="checkbox"/> NO		PHYSICAL LOCATION (Enter if different from address shown above) ■ If location cannot be described by street name and number, give as much information as possible such as name of shopping center, street intersection, highway number or distance from nearest town, etc. Street name and number: _____ City (City or village, etc.): _____ State: _____ ZIP code: _____			
Item 2 - EMPLOYER IDENTIFICATION NUMBER a. Is the Employer Identification (E.I.) Number printed in the upper right of the address box the SAME as that used for this establishment on your latest 1972 Employer's Quarterly Federal Tax Return, Treasury Form 941? <input type="checkbox"/> YES <input type="checkbox"/> NO b. Did this establishment also use any other Employer Identification (E.I.) Number during 1972? <input type="checkbox"/> YES <input type="checkbox"/> NO		Enter current E.I. number (9 digits): _____ Enter E.I. number or numbers (9 digits): _____			
Item 3 - PERIOD OPERATED IN 1972 a. Was this establishment in business at the end of 1972? ■ If establishment was inactive during December 1972 due to seasonal or part-time operations, answer "Yes" unless it was not owned by you at the end of the year. <input type="checkbox"/> YES <input type="checkbox"/> NO b. How many months during 1972 did you own this establishment? 030 _____ Number of months		Dollar figures should be reported as illustrated. Please be careful to enter your figures in the correct columns. See example below: EXAMPLE: If figure is \$1,125,628.28 PREFERRED method: 1 125 628 28 Acceptable method: 1 125 628 28			
Item 4 - DOLLAR VOLUME OF BUSINESS Line a - Total net sales after deducting returns, allowances, and discounts, but include excise taxes and sales taxes. Include all company sales credited to the sales branch or sales office even though billings may be made from a central or district office and shipments made from a plant or central warehouse. Also include, at wholesale prices, sales or transfers to any retail stores you may own. Include any receipts from services rendered to customers, but do not include any receipts derived from sources other than customers. Line b - Approximate percentage of sales (Item 4a), if any, accounted for by goods produced by your company, your parent company, or companies corporately affiliated with your company. Line c - Total receipts, if any, from work done by your employees at construction site including the value of any goods you put in place that became a permanent part of the structure or building. Amounts reported here should also be included in items 4a and 17.		a. TOTAL SALES and other operating receipts in 1972: _____ Mil. Thou. Dol. b. What percent of sales represents products produced by your company? _____ % c. Did this establishment do any construction work for others in 1972? <input type="checkbox"/> YES <input type="checkbox"/> NO If "YES," report the value of construction receipts during 1972: _____ Mil. Thou. Dol.			
Item 5 - PAYROLL AND EMPLOYMENT Line a and b - Report the gross earnings paid in calendar year to employees prior to such deductions as employee's Social Security contributions, withholding taxes, group insurance premiums, union dues, and savings bonds. Include in gross earnings all wages, salaries, commissions, dismissal pay, paid bonuses, vacation and sick-leave pay, and the cash equivalent of compensation paid in kind. If a corporation, include salaries of officers; if an unincorporated concern, exclude payments to proprietors or partners. Line c - Be sure to include all persons on paid sick leave, paid holidays, and paid vacation during the pay period indicated, as well as those actually working. If a corporation, include officers; if an unincorporated concern, exclude proprietor or partners.		a. Total ANNUAL payroll in 1972 before deductions: _____ Mil. Thou. Dol. b. Payroll for the FIRST QUARTER of 1972: _____ c. Number of paid employees for the pay period including March 12, 1972: _____ Number			
Item 6 - Not applicable to this form		Item 7 - OPERATING EXPENSES AND INVENTORIES Line a - Include in addition to other operating expenses, the payroll of this establishment and the pro rata share of any general office expense. Do not include the cost of merchandise. Do not include income taxes and excise taxes. Unincorporated businesses should not include withdrawals by owners or part owners. Line b - Report inventories of goods for sale at cost value rather than sale price. Include goods owned by you and consigned to others, but not goods of others in your possession. Report inventories as of the date specified, or nearest inventory date.			
Item 8 - SALES BY CUSTOMER CLASSES Report the approximate percentage of your 1972 sales to each of the classes of customers. If book figures are not available, entries for these lines should represent your best approximations. Percentages should add to 100.		a. Total 1972 operating expenses, including payroll: _____ Mil. Thou. Dol. b. Did you have merchandise inventories during 1972? <input type="checkbox"/> YES <input type="checkbox"/> NO If "YES," what were these merchandise inventories, at cost? (1) December 31, 1972: _____ (2) December 31, 1971: _____			
Line a - Sales to manufacturers, farm operators, and other business concerns or institutions that normally buy for business use rather than for resale of the goods in the form purchased. Line b - Sales to the Federal government (including the military, post exchanges, GSA, GPO, and similar Federal agencies) and to State and local governments. Include here only sales made by this establishment DIRECT to governmental agencies. Sales to companies which in turn sell to governmental agencies should be included under other parts of this inquiry according to the classification of the purchaser. Line c - Sales to construction contractors and builders of all types (general contractors; highway, street, and other heavy construction contractors; and special trade contractors). Line d - Sales to transportation companies, communications and other public utilities. Include sales to railroads, interurban systems, and street railway systems; highway, water, and air transportation companies; telephone and telegraph communications, radio and television broadcasting and other communication services; electric light and power - including combination electric and gas utilities. Line e - Sales to repair shops of all types. Line f - Sales to retailers of all types (retail chain organizations, independent stores, department stores, etc.). Entry should represent percentage of your sales to purchasers who normally buy for resale to home consumers or to individual users. Line g - Sales to organizations that normally purchase for resale at wholesale (including sales to purchasers who buy for resale to industrial, institutional, and similar users). Line h - Sales to household consumers and individual users (including sales to your own employees). Line i - Include sales made direct to buyers in foreign countries, or through their agents in this country. Include transfers, if any, to your own foreign branches. United States possessions should not be considered as foreign countries.		Approximate percent of total sales (Item 4a) (Report in whole percents) a. To institutional, industrial, commercial, professional, and farm users: _____ b. To governmental bodies (Federal, State, and local governments): _____ c. To contractors and builders: _____ d. To public utilities: _____ e. To repair shops: _____ f. To retailers: _____ g. To wholesale organizations: _____ h. To household consumers and individual users: _____ i. Export sales: _____ j. TOTAL (Lines a through i should add to 100): _____ 100 %

Page 2

Item 9 — EMPLOYMENT BY PRINCIPAL ACTIVITY				Approximate number of employees	
Distribute here the employees reported in item 5 according to their principal activity during the pay period including March 12, 1972. Each employee should be counted only once, according to his or her principal activity. Line a — Selling employees — All employees primarily engaged in selling merchandise or services (traveling salesmen, house or telephone salesmen, etc.) Line b — Office, clerical, warehouse employees — Employees primarily engaged in office, clerical, and warehouse work for this establishment (see instruction for central administration). Line c — Central administration — Employees primarily engaged in performing various management, accounting, clerical, warehousing, etc., services for other establishments of your company.				a. Selling employees	121
				b. Office, clerical, and warehouse employees servicing this establishment	122
				c. Central administration, storage, etc.	123
				d. Manufacturing (processing merchandise)	124
				e. Other (Describe)	125
				f. TOTAL (Should equal item 5c)	126
Item 10 — Not applicable to this form					
Item 11 — WAREHOUSE, STOCKROOM, AND OTHER INVENTORY STORAGE SPACE, DECEMBER 31, 1972				140	
Line a — Please indicate if this item is applicable to this establishment by marking either "YES" or "NO." Line b — Exclude floor space occupied by interior walls, permanent aisles, elevator shafts, stairways, offices, receiving and shipping platforms, etc. Line c — Net piling space is space for storing commodities — inside space measured from wall to wall and from floor to ceiling, less space for ventilation (outside of the piling), coils, aisles, posts, sprinklers, etc.				a. Did you have warehouse, stockroom, or other inventory storage space on December 31, 1972?	1 <input type="checkbox"/> YES — Go to b 2 <input type="checkbox"/> NO — SKIP to item 17
				b. Occupiable floor space (under-roof) — occupied and unoccupied — of this establishment	Square feet Mil. : Thou. : 000 141
				c. Refrigerated (net piling) space 50 degrees Fahrenheit or below in this establishment	Cubic feet Mil. : Thou. : 000 142
Items 12 through 16 — Not applicable to this form					
Item 17 — ANALYSIS OF SALES BY PRODUCTS OR COMMODITY LINES				Report value of products bought and sold as well as value of products produced by your company and sold by this establishment. If figures based on records are not available, give best possible approximations.	
Enter below the total dollar sales of each product sold by this branch or office. Products are listed (at a less detailed level) in the same sequence as they appear on the reporting forms for your manufacturing plants.					
Description	Census use only	Estimated sales during 1972	Code	Description	Census use only
		Mil. : Thou. : Dol.			
Electrical industrial equipment	200			Radio, TV, commercial equipment	200
1. Equipment for testing electrical, radio, communications circuits, motors	7010		36112	27. Speaker systems, microphones, home, commercial sound equipment	7380
2. Other electrical measuring instruments	7020		36111, 36113	28. Phonograph records	7410
3. Power, distribution transformers	7030		36122	29. Telephone switching, switchboard equipment	7420
4. Other transformers	7040		36121, 36123	30. Other telephone, telegraph (wire), apparatus, equipment, components	7430
5. Switchgear, ducts, relays	7050		36131, 36133, 36134, 36136, 36137	31. Radio, TV, communications equipment	7440
6. Circuit breakers	7060		36132, 36135	Other electric equipment	200
7. Fractional horsepower motors	7070		36211	32. Electron tubes, receiving types	7450
8. Integral horsepower motors, generators	7080		36212	33. Cathode ray picture tubes	7460
9. Motor-generator sets, other rotating equipment	7110		36215	34. Transmitting industrial, special purpose electron tubes (except X-ray)	7470
10. Other motors, generators	7120		36213, 36214	35. Transistors, rectifiers, semiconductor devices	7480
11. Parts, supplies for motors, generators	7130		36216	36. Electronic components, n.e.c.	7510
12. General industrial power circuit devices, controls	7140		36220	Other electric machinery, equipment	
13. Welding apparatus	7150		36230-36233	37. Storage batteries	7520
14. Carbon and graphite products	7160		36240	38. Primary batteries, dry and wet	7530
15. Electric industrial goods, n.e.c.	7170		36290-36293	39. X-ray therapeutic apparatus	7540
Electrical appliances	200			40. Engine electrical equipment	7550
16. Nonconsole radios (portable, table model, etc.) and record players	7290		XXX	41. Lamp bulb components, other electrical products	7560
17. Major appliances, television sets, console radios and record players				42. Appliance wire, cord, and flexible cord sets (except those in nonferrous wire drawing plants)	7570
a. Electric home kitchen equipment, parts	7301		XXX	43. Copper, copper-base alloy wire, bare (tinned for electrical transmissions)	7580
b. Electric home laundry equipment	7302		XXX	44. Communication wire, cable	7610
c. Television sets	7303		XXX	45. Magnet wire	7620
d. Console radios and record players	7304		XXX	46. Power wire, cable	7630
e. Other major appliances (including gas)	7305		XXX	47. Other drawn, insulated nonferrous wire	7640
f. Total major appliances, etc. (Sum of lines a through e)	7300		XXX	48. Miscellaneous lines of merchandise (Specify)	
18. Electric housewares, small appliances, parts and supplies	7210		XXX	a. _____	9761
19. Room air conditioners	6800		XXX	b. _____	9762
Lighting fixtures, current carrying devices	200			c. _____	9763
20. Electric lamps	7260		36410	d. Total miscellaneous merchandise (Sum of lines a through c)	9760
21. Residential type electric fixtures	7270		36421, 36427	49. Receipts from services and sources other than the sale of merchandise	9930
22. Commercial, institutional, industrial type electrical fixtures	7280		36422, 36423	50. TOTAL SALES IN 1972 (Sum of lines 1 through 49 should be the same as item 4a.)	9990
23. Vehicular lighting equipment, electrical	7310		36424		
24. Other electric and nonelectric lighting equipment	7320		36425, 36426		
25. Current carrying wiring devices	7330		36430		
26. Noncurrent carrying devices	7340		36440-36443

APPENDIX D. Authority for Census: Title 13, United States Code

(Codification of August 1954 amended by Acts of August 1957, September 1960, and June and October 1962, and of August 1964)

Collection and publication: Five-year periods (131)

The Secretary shall take, compile, and publish censuses of manufactures, of mineral industries, and of other businesses... in the year 1964, then in the year 1968, and every fifth year thereafter, and each such census shall relate to the year immediately preceding the taking thereof.

Geographic scope of censuses (191a)

Each of the censuses authorized by this chapter (other than censuses of population) shall include each State, the District of Columbia, Alaska, Hawaii, the Virgin Islands, Guam, and the Commonwealth of Puerto Rico, and as may be determined by the Secretary, such other possessions and areas over which the United States exercises jurisdiction, control, or sovereignty. Censuses of population shall include all geographic areas referred to in the preceding sentence. Inclusion of other areas over which the United States exercises jurisdiction or control shall be subject to the concurrence of the Secretary of State.

Wrongful disclosure of information (214)

Whoever, being an employee referred to in subchapter II of chapter 1 of this title, having taken and subscribed the oath of

office, publishes or communicates, without the written authority of the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, any information coming into his possession by reason of his employment under the provisions of this title, shall be fined not more than \$1,000 or imprisoned not more than two years, or both.

Failure to answer questions affecting companies, businesses, religious bodies, and other organizations: False answers (224)

Whoever, being the owner, official, agent, person in charge, or assistant to the person in charge, of any company, business, institution, establishment, religious body, or organization of any nature whatsoever, neglects or refuses, when requested by the Secretary or other authorized officer or employee of the Department of Commerce or bureau or agency thereof, whether such request be made by registered mail, by certified mail, by telegraph, by visiting representative, or by one or more of these methods, to answer completely and correctly to the best of his knowledge all questions relating to his company, business, institution, establishment, religious body, or other organization, or to records or statistics in his official custody, contained on any census or other schedule prepared and submitted to him under the authority of this title, shall be fined not more than \$500 or imprisoned not more than sixty days, or both; and if he willfully gives a false answer to any such questions, he shall be fined not more than \$10,000 or imprisoned not more than one year, or both.
